FEAR INCEPHALISM AT NAVY YARD

Twenty-One Lost Lives When Boat on Mississippi Capsized and Sank

BANKS OF MISSISSIPPI ARE SEARCHED FOR MILES FOR SURVIVORS OF BOAT PARTY

More Than Score Known to Have Been Drowned When Steamer Norman, Carrying Sixty People, Suddenly Rolled Over and Went Down South of Memphis, Tennessee; Captain Attempted to Beach Craft But Failed.

Memphis, Tenn., May 9.—Twenty-one persons are known to have been drowned as a result of the sinking of the Government steamer Norman last night, according to a statement issued here this morning by Mayor Rowlette Paine.

The steamer had sixty persons on board and was returning from Cow Island, in the Mississippi River. She was moving along smoothly when she suddenly began to sway and then turned completely over and sank in a few minutes.

The rudder failed to respond when the Norman first began to list, according to Howard Fenton, captain of the craft.

The river banks on the Tennessee and Mississippi and Arkansas River below Coahoma Landing, where the Norman sank, were searched all night by steamers with powerful lights in the hope that someone might have reached safety below that point or that bodies might have washed ashore. The search was continued to-day.

CONVENTION VESSELS The Norman, with a sister ship, the Choctaw, had been given over by the Government to take delegates to the convention of the Mid-South Association of Engineers on a trip down the river.

RAIL FREIGHT BILL READY IN FEW DAYS Measure Probably Will be Introduced in Commons Early Next Week

Parliament to Fix Rates on Export Grain, Flour and Cattle, it is Stated

By Times Staff Representative Ottawa, May 9.—With the Federal Cabinet at work to-day on the most sweeping railway freight rate revision in the history of Canada, British Columbia will start next week on the last phase of its long fight for rate justice.

NUMBER RESCUED Only for Tom Lee, a negro, who was passing in a motorboat, virtually all of the sixty or more persons on board the boat would have perished, survivors were unanimous in saying.

NEW ONTARIO BEER RULES ANNOUNCED Breweries, Restaurants, Standard Hotels and Grocery Shops Are to Sell

Toronto, May 9.—Final approval of the regulations governing the sale of 4 1/2 per cent beer in Ontario was given by the Provincial Cabinet at a conference yesterday which lasted about eight hours and terminated at midnight.

Dulwich Hamlet Won Football Cup London, May 9 (Canadian Press Cable)—Dulwich Hamlet defeated Clapton 3 to 0 at Newcross to-day in the London amateur senior soccer cup final.

Officially Informed Berlin, May 9.—Minister of the Interior Schele officially informed Field Marshal von Hindenburg to-day that he had been elected President of Germany, following the action of the federal examining board in declaring the election valid over Socialist complaints of irregularities.

AID TAKEN TO AIRMEN IN ALASKA

Fairbanks, Alaska, May 9.—Fighting a storm which Thursday forced Noel Wein, pilot for a commercial aviation company, to land his plane and two passengers somewhere in the wilderness between Rimpart and Brooks, close to the Arctic Circle, northwest of Fairbanks, a relief party in another aeroplane was on its way to-day to offer aid.

SEATTLE NOW HAS STREET CAR BANDIT

Seattle, May 9.—Boarding a one-man street car in an outlying district here early to-day, a stranger robbed the operator and a passenger and with a drawn pistol forced the operator to "carry" him to the "hitherto" downtown district, where he left the car and escaped.

LIES ILL IN HIS HOME IN LONDON; VISCOUNT MILNER

London, May 9.—Some fears were expressed this morning for Viscount Milner, former War Secretary, who has been suffering from a mild form of sleeping sickness, recently, but it was announced this morning he had suffered a setback.

WEATHER DELAYING AMUNDSEN'S FLIGHT

New York, May 9.—The Amundsen flying expedition to the North Pole will probably be delayed in starting several days more, due to weather conditions, according to the last word received from the explorer's base on Spitzbergen.

PARTY PREPARING FOR PLANE FLIGHT TO DEASE LAKE

Prince Rupert, May 9.—A Little, Detroit mining engineer; Col. P. Williams of Montreal, and C. S. Caldwell of Lacombe, Alta., are here awaiting the arrival of a seaplane from Montreal, which will be piloted by Colonel Williams in a flight to Dease Lake.

BODY OF MISSING POLICE SERGEANT FOUND HANGING IN CELLAR OF JAMES BAY

The body of Sergeant Charles A. Booth, late Provincial police officer who disappeared from sight Tuesday afternoon was found hanging in the basement of a James Bay residence this morning by the Provincial police.

Elderly Caretaker of Untenanted House Lived for Days Above Ghastly Tragedy Without Realizing it; Charles A. Booth Left Note for Coroner Explaining Reason for Suicide.

The body of Sergeant Charles A. Booth, late Provincial police officer who disappeared from sight Tuesday afternoon was found hanging in the basement of a James Bay residence this morning by the Provincial police.

MANY CASES OF LEPROSY IN ROSTOV

Rostov, Russia, May 9.—Two hundred cases of leprosy have been discovered among street peddlers here. The medical authorities are isolating the victims.

ARMS TRAFFIC ALLOWED AS IT IS NEEDED

Geneva, May 9.—The smaller countries represented at the League of Nations International Conference for the Control of Traffic in Arms and Munitions to-day won a signal victory when they succeeded in securing general approval of the principle that liberty of traffic instead of prohibition shall be the basis of the convention.

Amethystine Won Jubilee Handicap Race in England

Kempston Park, Eng., May 9.—Amethystine, by Hainault out of Cairngorm, won the Great Jubilee Handicap, run here to-day. The Duke of Westminster's twelve-pointer was second and Mrs. J. Bancroft's Purple Shade was third.

REPUBLICANS ARE NOT TO WELCOME VON HINDENBURG

Berlin, May 9.—From present indications the inauguration of Field Marshal von Hindenburg as President of Germany will be run off without a hitch next Tuesday.

SUDDEN MOVES BY RUM SHIP MEN PROBABLE

Washington, May 9. (Associated Press)—The rum smugglers' armada on the Atlantic is fighting back. Mobilization of the United States coastguard's fleet in an attempt to drive the supply ships to sea and destroy Rum Row has been answered by a counter-offensive.

CAUTION URGED

With evidence accumulating that land agents of the rum smugglers were ready to take long chances for the high stakes of their illicit traffic, coastguardmen everywhere have been warned by headquarters to expect sudden and drastic moves from any direction and to use caution.

PRAIRIE GRAIN STARTING SEASON UNDER EXCELLENT CONDITIONS, SAY FARMERS

Calgary, May 9.—The Calgary Herald's second crop report for 1925, compiled through the efforts of special correspondents in every part of Central and Southern Alberta, reveals a situation that has never been more promising at this time of the year.

Prince Invited to Visit Delagoa Bay

Lisbon, May 9.—The Portuguese Government has invited the Prince of Wales to visit Delagoa Bay, in Portuguese East Africa, during June.

STRENGTH OF UNITED CHURCH ESTIMATED

Toronto, May 9.—Out of a total of 2,559 self-acting churches in Canada, 228 are uniting churches in Canada. 228 have voted non-concurrence, according to an official statement issued by the Church Union of Information here to-day.

JEWELRY ROBBERY MADE UPROAR IN NEW YORK TO-DAY

New York, May 9.—Three robbers held up the jewelry store of J. Ross in Grand Street to-day and escaped with \$30,000 worth of jewelry, notes and cash, and blinding four employees.

Expectation is Many Aid-receiving Churches in Canada Will Amalgamate

The following tabulation shows the effect on the United Church of the vote of non-concurrence in self-sustaining churches, according to the statement: Methodist, 1,350 total; non-concurring none.

MAGNIFICENT FLOATS AND MILLIONS OF TULIPS WERE FEATURES AT BELLINGHAM

Victoria's Entry Won Honorable Mention Yesterday; Mayor Pendray Speaker at Official Banquet

The bonds of neighborliness which exist between Bellingham and Victoria were considerably strengthened yesterday when this city showed its interest in the sixth annual tulip festival by sending over a civic deputation, a bevy of Princesses, a contingent of 1,000 citizens, a band and an elaborate float to participate in the proceedings. The civic deputation included Mayor Carl Pendray, Aldermen Brown, Shanks and Cullin, while the bevy of royal beauty included the Princesses Sara Grogan, Bertha Ross, Audrey Bennett, Theodore Service, Grace MacCrimmon and Faith Robson.

IMMENSE CROWDS The citizens of Bellingham showed their appreciation of the interest taken by Victorians by arranging a stentorian full moon adding to the pleasure of the journey, and the tired but happy crowd which departed at the wharf at 8.40 carried away with them pleasant memories of Victoria's participation in the sixth annual tulip festival of Bellingham. The homeward trip was made under the most delightful conditions, a storied full moon adding to the pleasure of the journey, and the tired but happy crowd which departed at the wharf at 8.40 carried away with them pleasant memories of Victoria's participation in the sixth annual tulip festival of Bellingham.

VICTORIA'S FLOAT Conspicuous in the parade was the float representing Victoria, the model of the Crystal Garden and made it glitter like a jewel in a golden setting. The huge bird breaking from its shell depicted the familiar slogan, "Follow the Birds to Victoria." The Victoria float won an honorable mention from the judges.

NO WORD RECEIVED Hanover, Germany, May 9.—There has been no communication from Wilhelm Hohensollern, former Kaiser of Germany to Field Marshal von Hindenburg since the latter's election as President of Germany. It was stated today at Hindenburg's headquarters. Numerous proposals of marriage are reaching Hindenburg in the mass of letters that continue to pour in daily. "The former Kaiser is again happily married. Why don't you try your hand once more?" wrote a Thuringian war widow who expressed and aspiration to become the first lady of the land.

THE WEATHER Daily Bulletin Published by the Victoria Meteorological Department. Victoria, May 9.—5 a.m.—The barometer is rising over Northern B.C. and warmer weather with northerly winds may become general for several days. Frosts are again reported in the Prairie Provinces. Reports Victoria—Barometer, 29.88; temperature, maximum yesterday, 53; minimum, 42; wind, 2 miles N.W.; rain, trace; weather, clear. TO RACE IN ENGLAND—Princess Dmitri Goltzine, formerly Frances Stevens of New York, is going to settle in England, where she will race her string of 23 horses, including the star steeplechaser, Sunshine. The princess is shown with two of her thoroughbreds, Sunshine on the right.

BODY OF POLICE SERGEANT FOUND (Continued from Page 1.) Under the improvised scaffold, the cord found around the neck had been taken, it is thought, from window pulleys on the floor above. The body was dressed in a grey tweed suit, a white shirt, a white tie, and a white scarf. The body was found in a room on the second floor of the building. The body was found in a room on the second floor of the building. The body was found in a room on the second floor of the building.

ARMY TRAFFIC (Continued from Page 1.) The framework of the League's protocol, which he said, France was ready to revise accordingly, but which should remain the essential feature of European peace. LACK OF PUBLICITY With regard to the arms conference, he declared the fears of the smaller states were due to the present lack of control and publicity regarding armaments by countries whose manufacture of arms is unrestricted.

RAIL FREIGHT RATES (Continued from Page 1.) This far-reaching programme was before the Cabinet today in broad outline. READY NEXT WEEK As a result of lengthy deliberations today the Government hopes to introduce rate legislation in the Commons early next week. With a definite cleavage of opinion on the rate question apparent in the Commons and in the Cabinet itself, it is probable the scheme of rate revision finally evolved for presentation to Parliament will contain a number of provisions not included in the draft legislation prepared up to now. It is thought probable, for instance, that more than grain, flour and cattle may be included in the class of goods the rates on which are to be made by Parliament. Dairy produce also may be included in this category.

HEROIC MEASURES Montreal, May 9.—To prevent Walter Williams from swallowing three sticks of an alleged narcotic drug, two constables had to pull forward his tongue with pinchers after they had pounced on him in a passageway off City Hall Avenue yesterday.

FROM PRISON CELL TO CHURCH ORGAN—Cured of a drug habit which caused him to be sent to a cell in Port Leavenworth penitentiary, Dr. P. Reginald Deighton has become organist of the Linwood Boulevard Christian Church, one of the largest churches in Kansas City. As organist in Notre-Dame in Paris years ago he won recognition as one of the world's greatest. The death of his wife and a son, killed in the World War, caused him to become a drug addict and later a convict.

They are a Most Wonderful Medicine So Says Ontario Lady of Dodd's Kidney Pills Guelph, Ont., May 8, (Special).—The sterling value of Dodd's Kidney Pills as a kidney remedy is again shown by the following statement from Miss M. Austin, a resident here. "Dodd's Kidney Pills are a wonderful medicine. I suffered with kidney trouble and they could not have benefited anyone more. They were most satisfactory." Dodd's Kidney Pills act directly on the kidneys. They have become a family remedy all over the world because people have tried them and found them good. They are purely and simply a kidney remedy. They help Rheumatism, Lumbago, Diabetes, Lame Back, Heart Disease and Urinary troubles because all of these are either kidney diseases, or are caused by the kidneys failing to do their work. Obtained from all druggists, or The Dodd's Medicine Co., Ltd., Toronto, Ont.

FIRE RAZES NAVAL HALL AT ESQUIMALT

(Continued from Page 1.) WATCHMAN ON DUTY was surveyed last night and all found well at 9 o'clock and again at 1 o'clock. The extensive electrical equipment was not the source of the fire, it is definitely known, as the master switch was pulled at 4 o'clock yesterday afternoon and locked in the non-service position. FIRE TWO WEEKS AGO Two weeks ago fire of unknown origin started in the boiler room and spread to the boat shed at the navy yard, where it did damage estimated at \$50,000 before it was brought under control. On that occasion ratings of the H.M.C.S. Patricia and soldiers from the Work Point Barracks fought the flames, assisted by fire departments from the city and Esquimalt. Four of the fire fighters were hurt, carried from the smoke and flame-filled building in a condition of collapse before the outbreak of April 24 had been quelled.

Half-Brother of Earl of Harewood Committed Suicide Southampton, Eng., May 9.—The body of Hon. Francis John Lascelles, half-brother of the Earl of Harewood, was found at his home at Romey to-day with a gun beside it. The Earl of Harewood is the father-in-law of Princess Mary. The Lascelles family is one of the old, wealthy and distinguished families of England. Its men have usually had prominent careers in the army. Henry Ulrick Lascelles, the fifth Earl of Harewood, is the father of Viscount Lascelles, who in 1922 married Princess Mary, the daughter of King George and Queen Mary. The Hon. Francis John Lascelles, who was found dead to-day, was born in 1871 and educated at Eton and in 1905 married Miss Gerlie Stradling of Bristol. Well-meaning inquirer (after accident): "Have they sent for a doctor yet?" Onlooker: "It was a doctor who ran over him!" "Really? How fortunate!"

"Every bar of Sunlight carries a \$5,000 guarantee of purity—"

says Mrs. Experience

"Purity always means the highest quality—and Sunlight is the only bar laundry soap I know of that is guaranteed to be absolutely free from all impurities or injurious chemicals. And a laundry soap that is all soap—containing no adulterating materials—is bound to be more economical to use.

"For an all-round laundry soap you simply can't beat Sunlight—it just cleans and cleans and cleans! For clothes, dishes, woodwork, linoleum—in fact, for anything that can be cleaned with soap and water—Sunlight is wonderful.

"And because it is pure, Sunlight cleans without being harsh on the hands—it keeps them soft and white." Sunlight is made by Lever Brothers Limited, Toronto.

Sunlight Soap

To Raise Standard of Business Schools

Minneapolis, May 9.—Methods of promoting a professional interest in the study of business and business systems in an effort to place schools of commerce on the same professional basis as schools of law and medicine, will be discussed at the annual convention of the Alpha Kappa Psi fraternity here June 19-22.

Means also will be discussed by which the organization can become more closely affiliated with the schools of commerce throughout the United States. It is proposed that banquets and meetings be held at which prominent business men would address the fraternity—in which the student becomes acquainted with business men and business methods before the gets through college.

Alpha Kappa Psi, the first professional commerce fraternity, was founded at New York University in 1905 by ten students registered in the School of Commerce, Accounts and

Finance. Its membership now includes dozens of prominent deans of universities, noted educators, bankers and accountants.

The twentieth anniversary of the founding of the order will be observed at the convention and more than 150 delegates and officers will be in Minneapolis representing the fraternity's forty-five chapters.

WORLD PEACE IS BRITISHERS' DESIRE

London, May 9.—What Britisners require to-day is peace, not only at home, but abroad, said Austen Chamberlain, British Foreign Secretary, at the annual dinner of the London Chamber of Commerce last night, at which he was the principal guest.

Women attended the banquet for the first time in its history.

"The cry of the world is for security and stability," declared Mr. Chamberlain, "the passionate anxiety of the people being to get away from the horrors of yesterday, to be able to face with courage all difficulties and try to solve the problem of to-day's future."

VANCOUVER ISLAND NEWS

ARCHERY GREEN HAS RETURNED TO FAVOR

Among the Attractions at Metchosin Garden Party

Special to The Times
Metchosin, May 9.—The annual sale of work was held under the auspices of the church committee of St. Mary's Church, Metchosin, on Thursday afternoon, May 7, at the Vicarage.

The financial results were very gratifying to all those who had worked so hard to make the sale a success. During the afternoon games and sports were held in the beautiful grounds of the vicarage. A novel feature was the "Archery Green" under the skillful direction of R. D. Young. Clock golf and a novel sport known as "Bumble Puppy" was in the capable hands of Messrs. H. G. Gibb and R. B. Gibb. The different stalls and booths were ably managed by the following:

Ice cream booth—Miss Meredith Jones; house furnishings—Miss F. I. Blythe and Mrs. J. M. Peasco; candy stall—Mrs. F. A. Peasco and Mrs. Bradford; white elephant stall—Mrs. N. Howars.

Afternoon tea was served under the direction of Mesdames F. Conley, Amy B. Taylor and P. A. (Col) O'Brien, assisted by the Misses Marion Taylor, Meredith Jones, May Hall and Eileen Thain.

An excellent repast in the form of a dinner was served in the early evening which was followed by an enjoyable concert programme. Mrs. F. A. Peasco, Mrs. Gavin F. Wier and the Rev. P. Conley were among the artists who contributed to the programme, and Miss Bertrand made an able and efficient accompanist.

The event was conceded to be an unqualified success by all, and the thanks of the committee are extended to all who so generously gave of their services to the cause.

WOMEN'S INSTITUTE
The regular monthly meeting of the Metchosin women's institute was held in the hall on Wednesday afternoon, May 7. After ordinary routine business two very interesting addresses were given on "Immigration," by Capt. Thain and Mrs. Simpson Hayes.

Mrs. Simpson Hayes endorsed Capt. Thain's remarks and spoke strongly herself on the subject from the society and company standpoint. Afternoon tea was served at the adjournment of the meeting, the hostesses for the afternoon being Mrs. W. Whyte and Mrs. J. S. Suman. The president, Mrs. McCraith occupied the chair and graciously tendered the vote of thanks passed by the meeting to the speakers.

LUXTON AND HAPPY VALLEY
The monthly meeting of the Luxton and Happy Valley Women's Institute will be held in the Luxton Hall on Tuesday next, May 12. The special subject for this meeting will be "Child Welfare" and will be conducted by the convener of the child welfare committee, Miss H. Kelly.

ONTARIO M.P.P. HURT

Thompson, Ont., May 9.—W. H. Chambers, M.P.P. for South Oxford, was severely injured yesterday when his automobile got out of control here on a steep hill and while he was trying to avoid passing vehicles crashed head on into a telephone pole.

CHILDREN TO NAME QUEEN OF SIDNEY

Elaborate Preparations Are Under Way For June Celebration

Special to The Times
Sidney, May 9.—A special meeting of the North Saanich Women's Institute was held to make arrangements about Children's Day, which will be celebrated as usual on the King's birthday, June 3. This year instead of holding it on the athletic grounds it will be held at Beach House. It has been arranged that two girls from each of the three schools in the district will be nominated for queen. There will be a fancy dress parade and sports. Tea and ice cream will be served. A tennis tournament will also be held during the afternoon. Further details will be announced later.

Chemainus News

Special to The Times
Chemainus, May 8.—The usual monthly meeting of the Porter Chapter, I.O.D.E. was held at the home of Mrs. W. Southin Wednesday afternoon. There was a good attendance, the regent, Mrs. T. H. Porter, presided.

It was decided to pack the articles of clothing next Thursday afternoon, which have been donated for the Near East. Tea was served by Mrs. Southin at the close of the meeting.

The Rev. E. M. and Mrs. Cook motored to Victoria last Monday to bid good-bye to Miss Maud Byrd and her father, who left the next day for the Old Country for a three-months' holiday.

Mr. and Mrs. Cook returned to Chemainus on Wednesday.

Miss Lawson—Vancouver—is the guest of her brother-in-law, Mr. H. E. Heep.

Miss Graham a graduate nurse from Victoria has joined the local hospital staff.

Mr. Mat Hemmingen Cowichan Lake was a visitor here at the beginning of the week.

25-YEAR-OLD SIKH WOULD BE PUPIL AT DUNCAN HIGH SCHOOL

Ko Ganda Singh, twenty-five years of age, has made application to enter the Duncan High School as a student. He offers credentials to show that he has attended High School in India for five years. A letter from the Superintendent of Education to the Duncan Consolidated Board stated that he believed he was sufficiently advanced in his education to enter the High School. The principal, A. B. Thorp, differs from the superintendent. He says he has examined the applicant, that he found him a highly intelligent young man but insufficiently advanced educationally to take his place in any class of the local High School. The matter will go to the Board of Education.

SIDNEY CLUB DRIVES FOR SPORT MEMBERS

Delegates Named to Attend League Meetings in Victoria

Special to The Times
Sidney, May 9.—The regular monthly meeting of the Sidney Amateur Athletic Association was held in Matthews Hall. There was a good attendance. Delegates were chosen to attend the league meeting of the Victoria and District Lacrosse League and the Commercial Baseball League. It was decided to hold a membership drive, urging all followers of sport to become members of the association.

BIRTHDAY PARTY

Mrs. Shady gave a very jolly children's party at her home on Fifth Street to celebrate her son Darrell's tenth birthday. At the same time Roberta celebrated his eleventh birthday. The afternoon was spent in games, after which the children sat down to a splendid tea. The table was prettily decorated in pink and green with the two birthday cakes in the centre. Those present were Gladys Roberts, Collins Cochran, Marie Goddard, Joy McMillan, Alberta Critchley, Wilma Creighton, Aiden Cochran, Elaine McKay, Ernest Roberts, Horace Peck, Philip Darlow, Laddie McNairn, Jack Campbell, Maurice Corfield and Jack Conway. Mrs. Shady was assisted by her sister Mrs. Jost of Victoria.

Mr. and Mrs. J. F. Norris have returned to Deep Bay from their honeymoon. They will live on Madrona Drive. Mr. and Mrs. Norris were recently married in Seattle.

Sidney News

Special to The Times
Sidney, May 9.—Mr. and Mrs. A. O. Wheeler of Third Street, have gone to Portland, Oregon, for a holiday.

Mr. Taylor of Toronto is staying at the Chateau, Deep Bay.

Mrs. McNeil and children are spending a few days with friends in Victoria.

The regular monthly meeting of the Sidney Board of Trade will be held in Wesley Hall on Tuesday, May 12, at 8 o'clock. The speaker for the evening will be Mr. J. Duff, president of the Victoria branch of the Royal Astronomical Society. This lecture will be illustrated by slides.

The regular monthly meeting of the Women's Guild of St. Andrew's will be held on Wednesday, May 13, at the home of Mrs. Ward, Queen's Avenue. Mr. Somerville will sing a solo at the Union Church on Sunday, Mother's Day.

Mr. and Mrs. Mitchell, of the Orchard, accompanied by Mrs. T. Harrison, have gone to Vancouver via Bellingham for a holiday. While there Mrs. Harrison will attend the old-timers' re-union.

Mr. Henry Brethour of East Road, has also gone to Vancouver to attend the re-union dinner for old-timers.

Mr. N. C. Stewart, who has been for several months with the Alpine Club, has returned to Vancouver.

NANAIMO CHURCH ELDERS SUSTAINED

Vancouver, May 9.—The elders of St. Andrew's Presbyterian Church, Nanaimo, who appealed for reinstatement, were again sustained in their appeal by the Synod of British Columbia, which also declared by a decision reached late yesterday afternoon that the vote on church union in St. Andrew's was irregular. It instructed the Presbytery of Victoria to transmit the findings of the synod to the Nanaimo congregation.

There were eight elders and a large number of members of St. Andrew's who brought the matter before the Presbytery of Victoria, which reinstated the elders, but took no action on the vote. The elders who petitioned the synod were Dr. E. A. Taylor, Messrs. J. W. Coburn, J. A. Murray, Neil Smith, Neil McCraith, J. T. Hepburn, A. C. Stover and Dr. W. J. Drysdale. Their case was presented by Rev. Thomas Menzies.

Langford News

Mr. Arthur Wate, Millstream Road, celebrated his daughter Frances' ninth anniversary by a birthday party. Fragrant nasturtium decorated the tea-table, while the centre piece of an iced birthday cake attracted the eyes of all the little guests. The visitors were Wilma Pike, Kathleen Goucher, Mildred Peat, Betty, Georgina and Patricia Cooney, Betty and Margaret Smedley, Frances Wate and Ronald McCrimmon. Mrs. Leslie Peat, Mrs. A. McCrimmon assisted the hostess in amusing the children.

Mrs. G. A. Cooney Millstream Road, entertained at the tea hour Thursday afternoon her guests being Mrs. F. Popham, Los Angeles, Mr. and Mrs. Edward Popham, Mr. and Mrs. Harry Popham, from Victoria, Mrs. A. G. Mackie and Miss Winnifred Whippas.

Mrs. F. H. Le-Queue of Goldstream Road who has been visiting friends in Kelowna, B. C., returned home Thursday.

Mrs. W. H. Hilliter of Millstream Road has as house guests, Mr. A. McCloud and W. Holyoak.

Congratulations by their friends are extended to Captain and Mrs. Dorrer on the birth of a daughter yesterday at Victoria Private Hospital.

Ganges News

Special to The Times
Ganges, May 8.—On Wednesday afternoon the Ganges Chapter, I.O. D.E., held their regular meeting in the I.O.D.E. rooms. About \$60 was raised from the rummage sale held at the Mahon Hall. The \$60 was given to the I.O.D.E. memorial fund. Mrs. Cecil Abbott, who has been treasurer for a number of years resigned, as she expects to move into Victoria this summer. Mrs. Frank Crofton was elected in fill the place for term. Mrs. Ringwood will act as secretary the few months that Mrs. Edward Walters expects to be away as she leaves for England this month.

The meteorological report for Ganges for April, by Observer Rev. George Dean, is as follows: High temperature, 72 degrees; low temperature, 48.85 degrees; total rain, 1.83 inches; heaviest rainfall, 43 inches.

E. M. Haynes, post office inspector, was a visitor to Salt Spring Island, this week.

Mrs. Cecil Abbott spent a few days in Vancouver this week to meet her old friend Miss Lillian Faithfull, M.A., J.P., of Cheltenham Ladies' College, England.

Congratulations are extended to Capt. and Mrs. R. Godwin on the birth of a little son at the Lady Minto Hospital, also to Mr. and Mrs. H. Loosemore of Sarnia, a daughter.

Mrs. C. Baker returned from Duncan, where she was the guest of her brother, Mr. Banister.

VETERANS BUILD FOR MEMBER WHO LOST EVERYTHING IN FIRE

Ladysmith, May 9.—The regular monthly meeting of the Ladysmith unit, Army and Navy Veterans in Canada, was held in their clubrooms Thursday evening, a large number of members being in attendance. Many important questions were taken up and acted upon. A letter was read from the Dominion secretary asking for a donation in aid of the Nova Scotia miners, forty per cent. of whom are ex-service men. Ladysmith unit made a donation of \$25 to this cause. An old ex-guardian residing in Ladysmith, who was recently burned out, losing everything, is having his home rebuilt and ready for occupation by members of the unit. Several needy cases among local ex-service men were brought up and will be attended to. The question also came up of positions that are vacant that could be filled by ex-service men and the secretary was instructed to write to the Dominion and Provincial Civil Service Departments for lists of positions open. Ladysmith and Nanaimo units are anticipating holding a joint picnic some time this summer and with this end in view a joint meeting between the two clubs is called. The Saturday night concerts are proving extremely popular and the Ladysmith unit has made great progress during the ten weeks of their formation.

SENT TO PRISON

Winnipeg, May 9.—Immaculately dressed and looking nothing like a criminal, Hollis Walker, seventeen years old Winnipeg youth, just out of school, pleaded guilty to a series of robberies in police court here yesterday. He was sentenced to two years' imprisonment in the Stony Mountain penitentiary. He confessed to "one wolf" burglaries extending over a period of five years.

One Hundred More of This Unusual Value in Hand—made Nightgowns at \$3.95

Six Dainty Designs to Choose From

A value such as this appeals to every woman. The nightgowns are so beautiful, the values so remarkable. The Chinese talent for exquisite needlework has found the daintiest and most ingenious of expression in these gowns. They come to us direct from China, and are exclusive to us in Victoria. There are many dainty patterns to select from at \$3.95

MISSIONARIES, NOT HANGMEN, NEEDED

Knud Rasmussen Criticizes Canadian Government For Costly Trials of Eskimos

Montreal, May 9.—It cost the Canadian Government between \$50,000 and \$65,000 to execute two Eskimos at Herschel Island about a year ago. Dr. Knud Rasmussen, world-famous Danish explorer, said in an interview here yesterday afternoon. He believed medical missionaries at around \$1,000 a year would do much better work among these primitive people than hanging them for infractions of laws of whose moral import they were totally ignorant.

Dr. Rasmussen was here from Ottawa, where his advice had been sought by the Federal Government in regard to projects for the education and elevation of the living standards of the Canadian Eskimos.

Many interesting features of Rasmussen's twenty years of investigation in the far North were revealed by the distinguished explorer yesterday. He spoke of traces he had discovered of the ill-fated expedition of Sir John Franklin, which was lost in the Victoria Straits in 1848, and of conversing with natives whose forebears had told them of the destruction of the Franklin party. He mentioned the Eskimo skeletons and parts of clothing that had belonged to Franklin's men.

Eskimo folk lore had been collected by Dr. Rasmussen, consisting of 2,000 different legends and songs, and in regard to these the explorer said the natives of the interior of the Canadian north have the same sagas and the same speech as the Eskimos of Greenland and all over the fringe of the Arctic Circle.

CAME FROM INLAND

An interesting point stressed by Dr. Rasmussen in his connection was that none of the legends or poetry dealt with the sea, indicating, he believed, that the Eskimos were originally an inland people.

Dr. Rasmussen painted a distressing picture of the social life of these people and the summary manner of disposing of surplus population. Their practice is to kill female children, he repeated, but this works adversely on the social system of the Eskimos, as it tends to a surplus of men in the community. Then when the male Eskimo of marriageable age desires to espouse himself his chief part in the ceremony is to murder the husband of the woman he wants to marry.

REINDEER PLAN

The Federal Government desires to do something for these people and to this end the project of importing herds of reindeer from Alaska has been mooted. It is also intended to maintain trading posts throughout the country and to have Mounted Police stations established at frequent places so the law may gradually be taught the Eskimos. At present the great northern plains still produce great herds of caribou, which are hunted by the Eskimos in addition to fishing and seal hunting. Dr. Rasmussen thinks the Eskimo population is decreasing.

PRISON TERM FOR THEFT OF FUR COAT

Vancouver, May 9.—Convicted on a charge of stealing a fur coat and toilet articles from a room in the Hotel Vancouver on the night of April 16, Charles Gould, alias Hank Gould, alias Joe Beck, was sentenced to two years in the New Westminster penitentiary by Judge Grant in the county court yesterday.

Dr. Rasmussen thinks in Victoria a few days after the offence had been committed.

Miss B Wants a Pie

We have an inquiry for Date Pie. Our recipe is a good one, but it strikes us that some woman may have a better one that she will send to Miss B. through us.

These are several ways to create a date pie, and we should like to have another recipe or two for the files to send in answer to inquiries.

\$3,852,130 VOTED FOR MARINE DEPARTMENT

Ottawa, May 9 (Canadian Press)—The House, in committee of supply, devoted most of last evening to estimates of the Department of Marine and Fisheries. Some of the principal items passed in committee were those for maintenance and new construction of lighthouses, totalling about \$2,000,000. For the meteorological service \$250,000 was voted.

The civil government vote for salaries and contingencies of this department, which was adopted, totalled \$574,120.

Altogether \$3,852,130 was voted in committee for the Marine and Fisheries Department, some \$2,500,000 comprising several big items, being set over for further consideration.

Insurance Doctor "Were you ever in the hospital?" "Yes, once." "What for?" "To see a friend."

CHEERFUL FIGURES

COMMERCIAL PROGRESS in Canada during this week as analyzed by The Monetary Times will be of no use whatsoever to Mr. Meighen's propaganda factory over which Dr. Tolmie presides at Ottawa.

This statement points out that there were fifty-six new companies incorporated in the Dominion during the six days ending Thursday with a combined capitalization of no less a sum than \$43,699,500, as compared with eighty-nine companies with a capitalization of \$17,347,000 in the week previous, and seventy-eight companies capitalized at \$10,707,700 during the last week of last year.

Another significant feature of the week's business under review is the fact that commercial failures in Canada in February of this year numbered 162 as compared with 260 in the corresponding month of last year.

Of special interest to the financial world will be the smaller number of companies incorporated last week as compared with the previous week—fifty-six as against eighty-nine—at a capitalization of considerably more than twice the amount. And if the comparison be made with the last week of last year it will be seen that there were in that week twenty-two more incorporations, but with approximately \$33,000,000 less capital involved.

How will these figures harmonize with the persistent statements of the members of the Party of Gloom? Mr. Meighen and his followers are frequently telling the people of Canada that things are going from bad to worse. According to them this country is headed straight for national bankruptcy.

Some time ago Mr. Meighen said that one thousand industrial establishments had had to close their doors because of the tariff policy of the King Government. Mr. Stevens of Vancouver increased the number to more than two thousand and a Conservative campaigner in Montreal has done better still and brought it up to nearly three thousand.

None of these members of the Party of Gloom has produced his list. No such list exists and they all know it. When they talk about it they talk petty politics.

which he goes, the background which he constructs, during the process of inhabiting it, is of estimable value—priceless building material. The hypothesis that education is creating a disdain for manual work is also unsound. On the contrary, education is gradually destroying the very suggestion that work of any description is menial.

OUR PAVILION AT LEAST THE MANUFACTURERS of Canada are going after business in Great Britain. In the Canadian Pavilion at the British Empire Exhibition—which was opened by King George to-day—sixty per cent. of this year's exhibitors did not show last year.

It is also interesting to note that Canadian tobacco will be shown to the British public for the first time. This is an important innovation because a good deal of correspondence already has taken place in the British newspapers in reference to Empire tobacco.

JOURNALISTIC SPECULATORS are beginning to wonder what attitude the ambassadorial and foreign representatives to official Germany will assume towards the ceremonial of Field-Marshal von Hindenburg's inauguration as President of the German Republic.

There will be no "diplomatic incident" and no "overt act." Much has happened since the British election in 1918, for instance, when Mr. Lloyd George and many of his supporters were quite ready to go and fetch the ex-Kaiser from his rural retreat in Holland and figuratively hang him to the first lamp post.

EDUCATION COSTS IN this country and in Great Britain furnish more than an ordinary amount of material for controversy which only occasionally makes a definite impression upon the public mind. But in spite of the various turns which the discussion nearly always takes the one dominant fact remains that education is one of the strongest forces in our social and economic life to-day.

AT YESTERDAY'S SITTING of the McMaster shipping subsidy committee at Ottawa Mr. David Hosié, a director of the firm which operates the Anchor-Donaldson lines between the United Kingdom and this country, said that low ocean rates and insufficient business have resulted in the laying up of one of the company's ships.

WORDS OF WISE MEN The system in everything ought to be as you please as long as you please to do what is right.—Sydney Smith. Good conscience you owe to yourself; good fame to your neighbor.—St. Augustine. They make it a principle of their irelligion outwardly to conform to any religion.—Edmund Burke. Let us cease shrieking and begin considering.—Carlyle. The way of this world is to praise those who do, and persecute living ones.—Dr. N. Howe. Him whom a little will not content, nothing will content.—Epicurus. Contention with an equal is doubtful; with a superior, madness; with an inferior a degradation.—Seneca. The evangelists may contradict each other, provided only that the gospel does not contradict itself.—Goths. Old religious factions are volcanoes burnt out.—Burke. Silence and modesty are very valuable qualities in conversation.—Montaigne. Shallow men believe in luck, believe in circumstances; strong men believe in cause and effect.—Emerson.

Many Canadian manufacturers have been virtually shut out of the British market, for instance, because the carrying charges across the Atlantic have favored the continental European article. It can thus be truthfully said that there is not sufficient business offering at the present cost of transportation to maintain anything like all the equipment which Conference members operate.

AN EYE-SORE To the Editor:—I note, with pleasure, that at the annual meeting of the Victoria Real Estate Board that vigorous objection was taken to the taxi stand and sign boards being erected in the corner of Bell-ville and Government Streets.

T.B. AND SMALLPOX To the Editor:—As one of the men who can check sufferers from any form of the disease which, as you more correctly say, is spoken of in more or less hushed tones, I read with interest your article in yesterday's Times on smallpox and tuberculosis. Too true do we know that the spectacular smallpox will stir the people up to the eradication of all forms of T.B. will leave them unmoved.

DR. FRANK CRANE On PARTY POLITICS THERE has been a recent movement by prominent men of both parties in the United States to increase interest in party government. According to the figures given, party government seems to be rather a failure if we can test it by the number of votes it gets.

VACANT LOTS To the Editor:—Replying to Mr. Stinson's letter in your issue of yesterday, I think you would require a great deal more than the sum of \$50,000 to corner all the vacant lots that are being offered in the city.

WHO'S WHO IN HISTORY TO-DAY SATURDAY, MAY 9. JOHN BROWN Famous American abolitionist, was born at Torrington, Conn., on May 9, 1800. Moving with his parents to Ohio in infancy, he became an anti-slavery leader.

PAUL KRUGER South African statesman, popularly known as "Oom Paul," became president of the South African Republic on May 9, 1893. He served in this capacity for seventeen years and was active in the Boer War against England.

FLANNEl DANCES—Mrs. Simpson's Saturday night dancing club will hold its regular weekly meeting tonight in the Alexandra House from 7 till 12 o'clock. Due to the number of requests for continuance of these affairs Mrs. Simpson intends to hold them throughout the summer, so that after May 24 these functions will take the form of five business Ray Kinloch's four-piece orchestra will be in charge of the music. Miss Ella Simpson will manage to-night's affair personally.

Air Suction

Is Only One of the Three Essentials of Thorough Rug Cleanliness
And it's only one of the three kinds of work the Hoover does.
Beating and sweeping are most necessary. The Hoover beats as it sweeps as it suction-cleans. The satisfaction of knowing that your rugs are always immaculately clean is worth a whole lot, isn't it? And the ease and speed with which your rugs can be kept immaculately clean—with the Hoover makes it possible for you to have that satisfaction.
For a very small sum down we will deliver your Hoover complete with all the new improved attachments which you will find so helpful in house cleaning.
For a free home demonstration, phone our Hoover Dept.—1670.
WE ARE THE SOLE HOOVER AGENTS IN VICTORIA AND DISTRICT

GARDENERS' PLAN BIG SUMMER SHOW

Expanded Prize List and Much Interest Presage Fine Display July 24 and 25

The Victoria and District Gardeners' Association will hold its second annual Summer Show on July 24 and 25, probably at the Crystal Garden or the auditorium of the Chamber of Commerce.
In order to avoid conflict with the flower show being organized as a feature of the Crystal Garden Carnival, the date selected is somewhat later than that of last year's successful show. An enlarged schedule of classes has been provided, particularly in the floral section, where a new class for collected displays will compete for a handsome cup donated by Rennie and Taylor.
In the rock and Alpine plant section greater interest is being fostered, and special prizes have been donated, while the prizes offered school children have been increased in value.

DONALDSON LINE MAN WAS HEARD AT SHIP INQUIRY

Ottawa, May 8.—David Houle, a director of the firm of Donaldson Brothers, Ltd., of Glasgow, was a witness at yesterday's session of the Commons Committee on Ocean Rates. He said that the total solar eclipse of the present season. He could not recall a passenger ship that he had seen at the outbreak of a season before.
"Were the years 1923 and 1924 profitable ones?" asked G. H. Montgomery, K.C., counsel for the steamship companies.
"No, they were not," was the reply.
"Are you taking off this ship because the rates are too low or business is insufficient?" asked William Duff, Edinburgh, a member of the committee.
"Both, I would say," replied Mr. Houle.

FORMER PRACTICE

The witness practiced some amusement in the committee when, during statements on the cattle trade, he informed the members that from the year 1909 to 1912 it had been the practice for the steamship lines to carry cattle on the seaboard voyages and third class passengers in the same spaces of the seaboard trips. Pitting which were put in for the trip on which cattle were carried. Conditions had changed since 1912, however, and third class passengers no longer consented to occupy spaces which previously had been used for cattle.
Questions put to Mr. Houle by Mr. Montgomery in regard to whether or not steamship business had been profitable were answered by Mr. Houle. H. J. Symington, K.C., Government counsel, Mr. Symington pointed out that while witnesses for the steamship companies answered such questions by saying the trade was unprofitable, they refused to give figures in the open committee which would substantiate their statements.

DOHERTY'S VIEW

The committee concluded examination of J. P. Doherty, traffic manager of the Canadian Government Merchant Marine. Mr. Doherty told the committee he would not want to put ten more merchant marine ships in the Transatlantic trade. This trade had not proved sufficiently profitable.

Duke of Rutland Died in London

London, May 2.—The Duke of Rutland, who was seventy-three years old, died suddenly here yesterday. He had been suffering from pleurisy for about ten days at his London residence, but was reported to be making good progress. Yesterday morning his condition was announced as quite satisfactory.
The attending physicians had just left the Duke's London mansion when the patient suffered a heart attack and died shortly afterwards.
Besides his son, the Marquis of Granby, who succeeds to the title, the Duke of Rutland leaves three daughters, the youngest of whom is Lady Diana Manners, wife of Major Duff-Cooper. The wife of the new Duke of Rutland is a piece of the Countess of Oxford, formerly Mrs. H. H. Asquith.
Henry John Manners, the eighth Duke of Rutland, was principal secretary to the Marquis of Salisbury from 1885 to 1888, and before inheriting his title was a member of the House of Commons from the Melton division of Leicestershire from 1888 to 1895. He owned 15,000 acres of land.

Federal Civil Servants Offer Salary Criticism

Ottawa, May 9.—Disappointment at the new civil service salary schedules is expressed by officials of organizations representing the civil service employees on the ground of discrimination in the schedules and a violation, it is claimed, of the principle of equal pay for equal work. J. H. Ryan, president of the Civil Service Association, said there would be a meeting on Monday, when consideration will be given to the new schedules and action with regard to them decided upon.
CLAIM IS SETTLED
Montreal, May 8.—The suit instituted by Rev. Father Adelard Dorem against the Sauvegarde Insurance Company to obtain payment of \$25,000, which he claimed under a policy insuring the life of his murdered half-brother, Raoul, has been settled out of court.

Yardley's Old English Lavender Soap

ASTRONOMERS STATE ECLIPSE PROGRAMME
Spectacles of Heavens For Next Three Years Listed at Washington Observatory
Washington, May 9.—Prolonged study of the vagaries of the sun and the moon has enabled scientists of the United States Naval Observatory here to work out their eclipser for the next three years. Under the direction of Captain W. S. Eichelberger, U.S.N., they now are starting on the 1925 eclipses.
An annular eclipse of the sun—an eclipse where the rim of the sun shows outside of the eclipsed area—is forecast for July 29-31 this year, in the Eastern States. A total eclipse of the sun will be visible in the Eastern States and wholly visible on the Pacific coast.
NO LUNAR ECLIPSES
There will be no eclipses of the moon next year, but there will be a total eclipse of the sun on January 14, 1926. It will be visible only from Africa to the Indian Ocean, and the observatory will send a party from here to Sumatra to observe it. An annular eclipse of the sun will be visible July 9-10, 1926, in the Central Pacific Ocean, and as a partial eclipse in Northern Australia, the Eastern edge of Asia, the United States and Mexico.
In 1927, there will be five eclipses—three of the sun and two of the moon. Seven eclipses in all, the maximum, five of the sun and two of the moon, and the lowest number in a twelve-month is two, both of the sun, as will be the case in 1924.
An annular solar eclipse, visible in the Southern Pacific, will occur in January 2, 1927. A total eclipse of the moon, June 15, will be visible in the Atlantic Ocean, North Amer-

NEW PENALTIES FOR DAIRY SALE FRAUDS
Ottawa, May 8.—Heavier penalties for the sale of adulterated dairy products are provided in a bill introduced in the House yesterday by the Minister of Agriculture, Hon. W. R. Motherwell. The bill was given second reading and referred to the Committee on Agriculture.
Mr. Motherwell said a number of middlemen had found it actually profitable to pay fines and go on breaking the Act. He now proposed to provide such heavier penalties as would discourage this.

Why Men Crack When on the Highway to Success
"Sleeplessness," Doctor Kennedy tells us, "is one of the commonest signs of nervousness. Another is physical unrest. You are showing signs of nervousness when you cannot keep from twitching your eyebrows, shrugging your shoulders, swinging one foot when your legs are crossed; or when you cannot sit at a desk or table without continually tapping with the fingers."

Dr. Chase's Nerve Food
THE warning symptoms, as outlined above, are well worth careful study because with this knowledge you can detect the indications of failing nervous energy while yet there is time to prevent serious results.
Your digestive system has failed to supply proper nourishment to the nervous system.
On this account outside help is necessary, such as Dr. Chase's Nerve Food, before you can get back your strength and vigor.
You will not be using this restorative treatment long before you are sleeping, and resting better, appetite and digestion will improve and you find yourself well on the way to health and happiness.

APPOINTMENT OF SKIPPERS TO NEW CANADIAN PACIFIC COAST VESSELS ANNOUNCED

Captains Boyce and Rippon Are Commanders of Kathleen and Marguerite Respectively; Engineers Also Selected and Appointed; Vessels Will Start Operations on Regular Schedule May 17.

The captains of the two new Canadian Pacific steamships have been chosen, the Princess Kathleen has been drydocked and is now preparing to make an introductory voyage to Seattle and Vancouver, the Princess Marguerite will be at Yarrow's repair depot for final cleaning and painting shortly and on May 17 their schedule commences.

Captains and chief engineers appointed by the Canadian Pacific Railway to the new steamships Princess Kathleen and Princess Marguerite, which will enter the company's service between Victoria, Vancouver and Seattle on May 17, have been announced as follows:

Capt. William J. Boyce, veteran of the C.P.R. coastwise service, will command the Princess Kathleen. William E. F. Oliver will have charge of the engine-room aboard the Kathleen.

Capt. J. Rippon, who has been skipper of the Princess Victoria for some time past, will be master of the Princess Marguerite. John A. Heritage will be chief engineer of the Marguerite.

but they will not be taxed on their journeys to and from the mainland. Even at a steady average speed they will be able to shorten the schedule time considerably.

Capt. J. W. Troup, manager of the B.C. Coast Service, and whose faith in the possibilities of this coast is largely responsible for the great work of development which the C.P.R. has done here, will be the host on May 12 aboard the Princess Kathleen. Great credit is due to him for his splendid efforts which have gone so far in building up a great wing of Canada's greatest commercial organization in the farthest West.

BUSINESS IN JAPAN IN OLD CHANNELS

Shippers Who Moved to Kobe Back at Yokohama and Tokio

It was natural to expect that as a result of the destruction of Yokohama the port of Kobe would benefit greatly due to the transfer of much new trade to the southern port, says a report on trade in Japan received by the Victoria Chamber of Commerce.

TIMES SHIPPING CHART

Table with columns for ship names, masters, agents, and destinations. Includes sections for OCEAN VESSELS TO ARRIVE, COASTWISE MOVEMENTS, C.G.M.M. MOVEMENTS, SUNRISE AND SUNSET, and TRANSPACIFIC MAILS.

NEW COAST STEAMSHIPS ARE FINISHED WITH LUXURIOUS INTERIOR DESIGNING

1. The smoking room aboard the Princess Kathleen, one of the most attractive parts of the vessel, decorated with the Indian totem pole as the theme of the design. 2. The dining saloon aboard the Princess Marguerite, aft on the big ship, where scooters can be accommodated in a single sitting, and where the room's finishings are tasteful and pleasing.

HALF MOON DODGES HEAVY WEATHER OFF FLATTERY ON INITIAL STAGE OF CRUISE

Capt. Eustace B. Maude, Seventy-seven-year-old Adventurer, Set Forth From Neah Bay Tuesday Morning, Just Before Wind Came From North; on Lonely Voyage to England.

CAPT. T. RIPPON commander of Princess Marguerite, who will take the vessel on her first trip, May 17.

The business is returning gradually to the old channels. During 1924 Kobe increased its total trade by about yen 400,000,000 as compared with 1923. Exports from Kobe were valued at yen 150,027,000 or about forty per cent of the total shipments to the country, and yen 230,000,000 more than passed out of her harbor in 1923.

An old seaman in a little boat left Neah Bay on Tuesday and headed out upon the broad Pacific, with a fresh breeze from the north. Commander Eustace B. Maude, R.N., retired, who is attempting to reach England in his twenty-five-foot dory-type sloop the Half Moon, is now heading down the Pacific for Panama.

According to word received by G. A. Maude of Mayne Island, son of this daring navigator, the Half-Moon is now out on the ocean and sweeping down the coast, many miles from shore.

Flattery and the sun was bright over a rippling Pacific. Commander Maude has promised to send word north when he arrives at Panama. He will take on various supplies there and then make his way across the Atlantic with trade winds towards the coast of Africa, and north again to the English coast. He thinks the voyage will take four months.

SPORT WRITERS' VIEWS ON TIMELY TOPICS

AUDREY BOOMER LOOMING UP IN ENGLISH GOLF

Young Pro Gains Favorable Comment From Vardon; Wins First Match of Season

Vardon Thinks He Will Become Open Golf Champ Soon; Compston Coming on

Boomer Starts Off Season With Splendid Win; Compston Breaks His Clubs

By HARRY VARDON

The season of professional golf has begun with the victory of Audrey Boomer, of St. Cloud, Paris, in the annual tournament on the Roehampton course, London. It is a success that gives a great deal of pleasure to one who, like myself, hails from the same village as Boomer—the little village of Groville, in Jersey, where the game gripped the imagination of the natives over forty years ago, long before it was known in most parts of England.

Boomer is a very worthy man to bear forward with the golfing flag of Jersey and its particular hamlet which somehow seems to produce golfers as naturally as it produces potatoes—an industry in which my father took a much greater interest than in seeing his family of six sons trying to get a small ball into a hole with "instruments sadly ill-adapted to the purpose," as the Oxford professor expressed the situation.

FATHER NOT PLEASED
Nor do I wonder at the somewhat lukewarm paternal enthusiasm which greeted our efforts at the game. Golf was a small item in the scheme of sport in those days, and I know my father thought that I was a foolish son when I decided at the age of twenty to become a professional. He said so repeatedly, and to his honor as a resolute father he said, he never would agree that I was much of a player, although he congratulated me on my six open-championships. "Tom plays the golf," he used to say, "but Harry wins the championships." Understood, one another perfectly, and my brother Tom understood, too.

However, it is of Boomer as the new leader of the Jersey school that I would now write. He is no flash in the pan. He was twenty-one when the war ended, and short of practice though he had been owing to his services, he made his mark almost at once. Nobody created a greater impression than he did at Roehampton-Tennis, in 1917, when he gained a high place in a field that comprised all the leading southern professionals.

THE STRAIGHT LEFT
Very soon Boomer won recognition as a new star in the golfing firmament, and I see no reason why he should fall to become open champion in the near future. His swing is a model of rhythm, compactness and power. Since last year, he seems to me to have relaxed in some degree that "straight left arm" which he was wont to practice in the up swing. It is only a very slight relaxation, but it appears to have introduced just sufficient flexibility into the muscles to improve his game. I am certain that the cult of the "straight left" can be overcome to the extent of making a player stiff and cramped as he hits. While Boomer's swing is full, there is absolutely no waste of effort. It is rather curious how all of us in Jersey have adopted naturally the principle of taking the club to the top of the swing by the shortest track that is consistent with smoothness, and bringing it down with the same regard for consistency.

ALL HAVE SAME SWING
Boomer was not born when I left Jersey, although I knew his father, who was master of the school at which the Groville boys studied—were supposed to study—subjects other than golf, and who came to see me secure the championship at Sandwich in 1923, when Audrey was eighteen months old. Still, the new leader of the Jersey golf nursery has the same Jersey swing that we all chose as though no other existed.

consolidated swing without any undue flourish in it anywhere. More over, he hits the ball with a clean, crisp, and accurate swing, more than any other combination of qualities, betokens the accomplished golfer. In putting, he reminds one somewhat of a golfer in process of evolution. He has all the inborn qualities that a man could want; if anything, he is a little too strong in the muscular development of his 6 feet 3 inches, and 189 pounds. It is written in history that when he reached the semi-final of the Gleneagles tournament in 1922, he broke three mangle nibblicks in one round. And what is not generally known—he broke them not through taking turf with fierce blows, but in striking the ball cleanly. He hit with such force and accuracy that the nibblicks broke with suddenness after the impact that even hickory could not stand the strain. When I met him subsequently in that tournament, he asked if he could borrow my mangle-nibblick if necessary. Naturally, the answer was in the affirmative. Thank goodness, however, he did not need the club. He beat me on the last green without it.

Hagen Drawing \$32,000 a Year As President

St. Petersburg, Fla., May 9.—Walter Hagen, British open golf champion and holder of the unofficial world's title, has signed a contract to remain as president of the Pasadena Golf and Country Club of this city and to play as a representative of that club for two years, beginning December 1, 1925. Salary stipulated in the contract was \$30,000 a year.

MIND THE SPLASH

BETTY NORTON
Meet Miss Betty Norton, juvenile swimming star. Though only a little over two years old, Betty can swim fifty yards with ease and is also a clever diver. She hopes to emulate her older sisters as a water nymph some day. Her parents are Mr. and Mrs. Fay Norton of Los Angeles, Calif.

Sunday Schools to Hold Meeting and Discuss New Sports

A meeting of the Sunday School Athletic Association will be held on Tuesday, May 12, at 7:30 o'clock, at the Y.M.C.A. The basketball season has finished and a report will be made as to the financial condition of the association. There will be a discussion on Summer sports, such as tennis and indoor baseball for boys and girls.

PLAYER IN EVOLUTION
Competition for the English Cup, the tit-bit of English football, began way back in 1872 when the Wanderers beat the Royal Engineers by the only goal of the match. This year the cup was decided by the same margin, Sheffield-United defeating Cardiff City by the orphan goal. The winners of the cup since 1872 are as follows:
1872—Wanderers beat Royal Engineers 1-0.
1873—Wanderers beat Oxford University 3-0.
1874—Oxford University beat Royal Engineers 2-0.
1875—Royal Engineers beat Old Etonians 2-0.
1876—Wanderers beat Old Etonians 3-0.
1877—Wanderers beat Oxford University 2-0.
1878—Wanderers beat Royal Engi-

Jeffries Was a Champion Who Never Dodged a Fight

CORBETT WAS SUPPOSED TO BE LIGHT OF FOOT - ON THE ROAD AROUND CARSON JEFFRIES COULD RUN AWAY FROM HIM AT ANY DISTANCE.

SAY - DID YOU EVER SEE ANY OTHER FIGHTER THAT LOOKS LIKE AN ANGEL? - JIM'S FIGHT HOBBY IS RAISING RARE FLOWERS - ESPECIALLY RAISES.

WHEN A BOY JIM JEFFRIES WOULDNT HAVE NEEDED A MAKE-UP FOR THE MOVIES.

INTEREST IN SPORT MAY SOLVE MEXICO'S CENTURY RIDDLE OF HEAVY WARFARE

EXTERIOR VIEW OF MEXICO CITY STADIUM

Mexico City May 9.—Will athletic contests in Mexico solve the century-old riddle of warfare over which Mexican leaders have puzzled? With the introduction of athletics in the schools during the last few years, it is the opinion of many that fewer and fewer of the younger generation will have home to join outlaw bands and other revolutionary factions. Great interest is being manifested in various types of athletics and young men are participating in several sports.
TRACK, BASEBALL, BASKETBALL and soccer have been received with enthusiasm. Mexico participated last year for the first time in the Olympic games, a team of nine track men, three tennis players, one fencer and two marksmen went to Paris at the expense of the government. A stadium of 60,000 capacity, constructed of reinforced concrete and costing 1,500,000 pesos was completed here last year. It is built on Aztec style. After the bull-fighting season is over, basketball, and now baseball contests are held. These are witnessed by good crowds.
Plans are being made to send the largest delegation of athletes of any country to the first series of games held in the Central American countries. The tournament will be staged at Havana next year.
The program for these games consists of nearly all those on the American repertoire. Mexico's athletic program consists in encouraging sports of all

some ligaments. The blow didn't even knock him down. In noon hour rests Jim boxed with some of the other men and soon was back to work. One night he was pushed up by the other men to fight Hank Griffin, a clever, big, negro pugilist, who traveled around offering to meet all comers. Griffin pasted Jim for several rounds before the boy could hit him. Then one punch knocked Griffin out. That started Jeffries as a fighter. Billy Delaney heard of him and took him up to spar with Corbett. Jim learned a lot about boxing in that four weeks with Corbett, and won a lot of fights in the year following. Just two years and three months after seeing Fitzsimmons fight and knocked out Bob Fitzsimmons at Coney Island, becoming heavyweight champion of the world. JEFFRIES WAS KIND HEARTED
The champion, Jeffries, beat Tom Sharkey in twenty-five rounds, and knocked out Corbett twice, knocked out Fitzsimmons again, knocked out Johnnie Johnson, and Jack Munroe, and ran out of opponents. He was then the greatest heavyweight the world had ever seen—a first class boxer with incomparable strength and great speed for a man of his bulk. He could run 100 yards well under eleven seconds. Jeffries had a gruff manner and disliked being in crowds. His greatest pleasure was in taking long hunting trips in Mexico and the Californian mountains. His hobby was growing rare roses and rare flowers on his home estate. In spite of his forbidding appearance and gruff manner he was gentle and kindly. If Jeffries had possessed Dempsey's ferocity in the ring he would have won his fights in a round or two, but he was always afraid of injuring his opponents, knowing his own great strength, and preferred to win on points and deliver a knockout only when he had to. The only time he ever went into a ring with any personal animosity toward his opponent was when he fought Munroe. He knocked Munroe out in two rounds.
When there were no more fight offers, because no other fighter was supposed to have a chance against him, Jeffries retired. He opened a cafe, lived a soft life and grew fat. He weighed 315 pounds, six years later, when public clamor forced him out again to fight Johnson. He trained off ninety pounds in ten months, but was only a shell of the old Jeffries. He lost in fifteen rounds.
To-day Jeffries is living on his ranch near Burbank, California. He works hard, carries no fat at all on his huge frame, and looks better than he did fifteen years ago. He has fifty years of age April 15. His Burbank home is in the midst of a rose garden. Roses are still his hobby. (Copyright 1925 by The Bell Syndicate Inc.)

Jeffries Knocked Out Corbett While Sparring

Inside Story Told of Interesting Event Prior to Corbett-Fitzsimmons Bout; News Went Around That Corbett Dropped Jeff, But it Now Develops it Was the Other Way About

By ROBERT EDGREN

Jim Jeffries was a champion who never dodged a fight and who didn't go into the moving pictures. That makes him a unique character among title-holders. The only movies ever taken of Jim when he was champion were taken in the ring, while he was fighting and he didn't paint his eyebrows or try to make himself beautiful. He didn't care how the pictures looked. He wasn't interested in posing.

The first time I saw Jim Jeffries he was as fine a looking boy as you'd find in a trip around the world. This was in 1897, at Jim Corbett's training camp at Carson, Nevada, before the Fitzsimmons-Corbett fight. Billy Delaney brought Jeffries to train with Corbett. Jim was six feet two, weighed 220 pounds, was as brown as an Indian, had fine regular features unmarked as yet by fighting, long, curly black hair and in spite of his bulk walked so lightly and moved so easily and swiftly that he was as elusive as a ghost.
Stripped, Jeffries showed a marvelous development. I think he was the strongest man I've ever seen—not excepting George Hackenschmidt, Sandow, Nourie, Turk, or any of the circus strong men.
The first day at Corbett's quarters Corbett tried Jeffries out, privately, in a locked hallway, with only Billy Delaney and one or two others present. The doors were locked for an hour or more, and after the first sounds of scuffling about and thumping blows there was a long silence. "Afterward 'nobody would tell what had occurred in the hallway court, but a story was spread that Corbett had knocked Jeffries out."
A few months ago I asked Jeffries what really happened.
"It's a long time ago and I might as well tell you," said Jim. "It had to be hushed up at the time because it would have spoiled the fight for we were all told to keep our mouths shut. The story that Corbett knocked me out was started to worry Fitz. The fact is I knocked Corbett out."
All through the training Corbett watched Jeffries left hand like a hawk, and seemed to have a great respect for it. Jeffries was left handed, although he boxed in the orthodox style, with left extended and left foot forward. He always could hit a terrific punch with that left, and his right was just as good. He had plenty of speed. Corbett was supposed to be light of foot, but on the road Jeffries could run away from him, whenever he wanted to, at any distance.
HIS FAMILY LIFE UNIQUE
To go back a bit, Jeffries was born in Ohio and his family moved to California when Jim was about five years old. The splendid country home Jeff's father built forty-five years ago still stands at Cypress and Dayton Avenues, Los Angeles. It was far out in the country then, but is now in the heart of the city. The Jeffries ranch covered 160 acres, now in a built up residence district. His father owned a ten-acre plot at Seventh and Broadway and thought he was getting a huge price when he sold it for \$10,000. To-day it is worth more than \$10,000,000. The Jeffries family has always been wealthy, owing to large land purchases in early days.
Jim was the biggest of a large family of little boys. Jack and John were a little lighter, although both big roosters. John was the business man of the family and still manages the big Jeffries estate. Jack did some boxing, but retired to become manager of a mine in Mexico, and is well known among mining men to-day. An older brother is mining in Alaska.

CAME ON FAST
All the boys worked on the Jeffries ranch, where Jim developed his tremendous strength. At eighteen Jim was the strongest man in Southern California. Already famous for feats of strength, he was an iron worker, putting up tanks for oil wells. On one occasion a huge twelve-inch-square timber slipped and was falling on a man below when Jim leaped to catch it on his shoulders. He stopped the timber and held it until a dozen men rushed to relieve him, and it took the whole crowd to lift it. Jim suffered nothing but a strained back. Another time a fifty-pound block and tackle fell on him, the block striking him on the neck and tearing away

Joe McGinnity Goes To Mound and Works In Wonderful Style
Burlington, Ia., May 9.—Joe McGinnity, former "iron man" of the New York Giants and now piloting the Dubuque Club of the Mississippi Valley League, went to the mound yesterday and held Burlington to three hits in the four innings he worked on the hill. McGinnity, who is fifty-four years old, cracked out one hit in his one time at bat and had two assists. His club lost, however, 4 to 1.

First Pro. Golf League Ends And Players Benefit

Spectators Failed to Patronize Stars as Liberally as Expected

Intend to Carry on Next Year and Spread Matches Around a Little More

A professional golf league, patterned after the methods used in conducting a baseball organization, has just finished its season of play over the Florida circuit.

Twelve of the world's greatest golfers, representing six of the leading resorts of Florida, recently finished playing a regular schedule of matches. Leo Diegel and Gene Sarazen won the championship honors.

Artificially, the season was a great success, some remarkable golf being played, but financially the professionals didn't get a very big cut.

NOT A SPECTATOR'S PASTIME
Golf as a regular diet is not a spectator's game. After the first round of the league had been played and the golf enthusiasts had a

JOHNNY FARRELL

chance to see all the stars in action, interest died out. At some of the final matches the gallery consisted only of caddies and scores. Despite the fact that the season was not a profitable one to the professionals, accustomed to getting a fat cut, it is understood the league is to be revived this fall.

However, the players are for a different system of scheduling the matches. Instead of repeating before the same audiences, and repeating certain cities, the players will work as a team, and will make each city only once.

There are many small winter resorts in Florida that have hundreds of golf enthusiasts who would welcome seeing the big stars in action. It is the intention to book games in a number of these places and work on a straight guarantee with a percentage privilege.

Working in such a schedule, the players will be protected against the slim audience that featured the finish of the league's first season because of the novelty soon wore off.

Another thing that worked against good crowds when the golfers repeated

over the circuit, was the fact that most devotees of the game are rather blasé, would rather play than be mere spectators.

There is a suggestion to most golf matches and the professionals are so proficient their play becomes almost automatic. It is only when they pull a bad shot that the spectator really gets a thrill through a remarkable recovery. Bad shots, however, are the exception with the leading professionals.

THESE TWO SHINE

Golf matches draw big crowds only when they have the novelty appeal. Profiting by the experience of the first year it is the intention to try to schedule each week's match before a new audience.

The outstanding feature of the season's play was the work of Johnny Farrell and Leo Diegel. These two young players, Farrell, being the "kid" of the Florida circuit, are about ready to come into their own. Even the great Walter

1894—Notts County beat Bolton Wanderers 4-1.
1895—Aston Villa beat West Bromwich 1-0.
1896—Sheffield Wednesday beat Wolverhampton Wanderers 2-1.
1897—Aston Villa beat Everton 3-2.
1898—Notts Forest beat Derby County 1-1.
1899—Sheffield United beat Derby County 4-1.

AT THE THEATRES

"MEN AND WOMEN" AT COLISEUM IS PICTURE THAT HOLDS AUDIENCE

The new William de Mille production for Paramount, "Men and Women," adapted for the screen by Clara Beranger from the stage success by that name by David Belasco and Henry C. DeMille, will be shown at the Coliseum for the last time to-night.

Richard Dix, Neil Hamilton, Claire Adams and Robert Edeon are featured in the cast. Hamilton plays an assistant bank cashier (Dix is the cashier), who plunges in Wall Street and cleans up a neat sum. His broker gets Dix interested in a deal, and the cashier uses some bank securities to put the thing over.

show, the like of which has never before been seen in pictures. Allan Forrest, leading man, and Mildred Harris head the strong cast playing in support of the principal players.

"ROUGHNECK" SHOWN FOR LAST TIME AT COLUMBIA TO-NIGHT

"The Roughneck" closes its engagement at the Columbia Theatre to-night after a very favorable reception by large audiences. The story, adapted from Robert W. Service's novel, "The Roughneck," by Charles Kenyon and made into a William Fox special directed by John Cowan, is an admirable vehicle for the popular George O'Brien, who is ably supported by the beautiful Billie Dove and an excellent supporting cast.

STRANGE COLLECTION OF HUMANITY SHOWN IN CAPITOL PICTURE

Norma Talmadge has turned cabaret artist in her latest photoplay, "The Lady," to be shown at the Capitol Theatre next Monday. And as premiere chanteuse of an Apache restaurant in Paris, the star sings the latest American songs.

Frank Borzage, directing Norma in "The Lady," learned for the first time during the making of the photoplay that Norma has an exquisite voice, which, although not strong, is delightfully sweet and ideally suited to singing.

Norma sings to a strange collection of humanity, Chinese, Japanese, Turkish, Annapolis, Algerian, Moroccan, Tunisian, Italian, French, Spanish, Maltese, dark-eyed beauties from the South Seas—all are included in the underworld denizens who were gathered together for the safe scenes.

Norma's new photoplay is a story of a wife who lost her baby and baby through one of life's strange twists of circumstance. The picture is a First National attraction produced by Joseph M. Schneck. The special supporting cast includes Wallace MacDonald, Norma's leading man; Alf Goulding, Brandon Hurst, Emily Fitzroy, George Backhouse, Walter Long, Marc MacDermott, Dorris Lloyd, John Fox Jr., Paulette Duval, Edwin Hubbell, Loro Bara, John Herdman, Margie, Scotty, Miles, McCarthy and Charles O'Malley.

"BE YOURSELF, DEARIE" IS MORTON COMPANY OFFERING NEXT WEEK

After a week of serious melodrama, the Morton Company returns next week to its mission of making folks laugh, and with "Be Yourself, Dearie," a new, snappy, up-to-the-minute musical comedy, promises to make the walk-in ring with loud Ha, Ha's and merry He, He's! "Be Yourself" is one of those light, frolicsome farces, having to do with young sweethearts, defied conventions, humorous misunderstandings, and a general all-round mix-up that promises a jovial evening for the fortunate auditor. The light musical half of the programme will be evenly balanced by a real mystery screen thriller, "Thunderbolt," teeming with romance, adventure and intrigue, and redolent of the atmosphere of the Far East.

The successful attractions, the Frank Morton Company in "Boston Blackie" and "The Scarlet Pimpernel" on the screen, will be offered for the last times to-day, with a special matinee.

FIRST OF THREE BIG FIRST NATIONAL PLAYS COMES TO DOMINION

Bradley King, noted dramatist, is doing three of Corinne Griffith's forthcoming First National productions, the first one, which, "Declasse," has just reached the screen. Each one is an adaptation of a stage play of proven entertainment qualities. "Declasse," to be shown at the Dominion Theatre next week, served Ethel Barrymore as one of her most noted stage vehicles. The other two, "The First National Anthem" and "Ashes," both enjoyed long runs on New York's famous theatrical highway. Laurette Taylor starred in the former; the play having been specially written for her by her playwright husband, J. Hartley Manners. Florence Reed was the star of the latter, the author being Reginald Good.

PHOTOGRAPHING FOR MOVIES SIMPLIFIED

Hollywood, Cal., May 8.—Mechanical genius, as well as the creative flourish in this moving picture colony, has given a third hand, a mechanical one, to the moving picture photographer.

Heralding the days when the popular conception of the photographer, intently turning a camera crank with his cap twisted about on his head, will be gone, motor driven cameras have recently been placed in operation.

The device is a small motor attached to the camera and connected in such a way as to insure regularity of speed. A press of a button on the tripod sends the desired speed, while the cameraman turns his attention elsewhere until the scene is "shot." The pressing of another button stops the camera.

While the "third hand" directors say, insures regularity of speed more effectively than the most expert cameraman, the attention of the photographer once taken from the camera, may be directed to lighting effects, which are considered his most important assignment.

LEADING CHOIRS TO STAGE BIG JOINT RECITAL SHORTLY

Arion Club and First Church Singers to Compete at Festival

What may be considered one of the most interesting concerts ever heard in Victoria will be given at the First Presbyterian Church on May 22, when Victorians will be afforded an opportunity of hearing the splendid combined forces of local musicians that will represent this city at the musical festival to be held in Vancouver next June. On this occasion, in addition to hearing the fine programme of competition music they will also have the pleasure, at a very nominal price, of assisting toward the heavy expenses connected with sending so large a representation from Victoria.

The First Presbyterian Church Choir, under the capable leadership of their conductor, Jackson Hanby, has taken part in the two previous festivals with great success. The fact that Mr. Hanby is keenly interested in the work, and was one of the original organizers of the Alberta festival, largely explains the fact that First Church choir has from the inception of the program taken a keen interest and an active part in it.

In the first festival in 1923, the choir entered in the intermediate choir section, secured a creditable number of points, favorable mention from the adjudicator, Granville Bancroft, and was awarded the fine shield presented for this competition by the Mount Pleasant Lodge of the Knights of Pythias. In 1924, entering in the same class, the choir was again taken a keen interest and an active part in it.

This year the choir is again entering in the intermediate choir section, and has great hopes of winning outright the shield it has already won twice. It is also entering a quartette, and in addition to making an entry in the class for large choral societies. It, of course, hopes to again merit the award of the shield. The choir also took first place in its class.

The Arion Club has not entered in any previous competitions, and the Amphion Club of Seattle has twice entered in this class, carrying off the shield in its first appearance. The Arion Club has not entered in any previous competitions, and the Amphion Club of Seattle has twice entered in this class, carrying off the shield in its first appearance.

FOR ARTISTIC VALUES

Mrs. Coolidge set forth her conception of the mission of the auditorium in a letter, in which she said:

"I have wished to make possible, through the Library of Congress, the composition and performance of music in ways which might otherwise be considered too unique or too expensive to be ordinarily undertaken. Not this alone, of course, but with a view to extravagance for its own sake; but as an occasional possibility of giving precedence to considerations of quality rather than to economic values; and to opportunity rather than to experiment."

For this reason, I believe advice should be sought from broadminded and disinterested musicians, whether or not official, whether or not professional. And, for the same reason, I hope the audience may be chosen very largely from those whose musical taste and experience qualify them to listen sincerely and appreciatively.

Drunkness Blamed For German Defeat

Koenigsberg, Germany, May 8.—Did the big German offensive on the Western Front in 1918 fail because the German armies ran amuck among the huge stores of wines and liquors left behind by the Allies?

This question was raised by one of the speakers in the Koenigsberg local option week initiating a nation-wide drive to make Germany dry, which closed Monday.

Referring to an allegation by Dr. Schmidt, professor of theology in the University of Gessen, to the effect that Germany's defeat in 1918 was due to the consumption of alcohol, one of the speakers at the numerous meetings held throughout the city in the past week declared that General Ludendorff was convinced and sufficient evidence procured by two Toronto pathologists to change the diagnosis completely and substantiate the claim that death resulted from disease caused by war injuries.

U.B.C. PLAYERS MAKE HIT AGAIN WITH "YOU AND I"

Some Clever and Interesting Stage Work Presented by Prof. Wood's Proteges

Professor F. G. C. Wood's Players' Club of the University of British Columbia made their annual visit to Victoria yesterday and presented at the Royal Victoria Theatre last night the three-act comedy "You and I."

The production of the University players is looked forward to every year in Victoria, because what they put on is always interesting and interestingly done. In fact, Prof. Wood is becoming known for his stage work throughout this Province as much the same way that Prof. Baker has had his Prof. Baker, known throughout the East. Prof. Baker at Harvard has made the course "English 47" world famous. It is the course on playwriting and has to its credit as the work of members of its classes, the half dozen outstanding plays which have been produced in New York during the last couple of years. So, in a way, it might be remarked that while Harvard has had its Prof. Baker, U.B.C. has had its Prof. Wood.

"You and I" chosen for the club's vehicle this season was the Harvard prize play of 1922, which blossomed out on Broadway early in 1923. The U.B.C. players are the first to bring it to the Coast. It proved to be a happy choice for them as they caught the spirit of the thing. The play presents the problem of whether a young man should stay by his ambition for a career or launch right into matrimony. The problem is solved in the play only as it is in life, by some in one way and others in another.

The lines of the play were particularly bright, especially those which follow the lot of the young woman, Veronicia. Veronicia is the young sweetheart of the play and her line of talk is modern and lively. Miss Bailey fitted well into the part.

Miss Avis Pumphrey, Arts 37, was responsible for a clever bit of characterization as the maid who is used as an artist's model and is anxious to become a de luxe lady.

Miss Bier Clegg, Arts 47, had the heavy female part, that of wife and mother. One so young and attractive faces a serious difficulty in making up to play the part of a mature and philosophical wife.

Armfuls of bouquets were presented to the girls of the company at the end of the second act. The girls in the play, Peter Price of Science 25, Kenneth Caple of Agriculture 25, Tommy Taylor of Arts 25 and Harry Warren of Science 25, were all full of the joy of their work, and were effective with the audience.

The only disappointment of the production was that Prof. Wood or Dean Coleman or somebody like them from the University did not appear before the acts for the usual familiar speech.

The Kiwanis Club, as on other occasions, sponsored the U.B.C. players' production here.

"I didn't know you knew that man." "I didn't—but by the time I discovered I didn't, I did!"

Local Biscuit Plant Viewed by Engineers

Ormonds Limited were yesterday afternoon hosts to the Victoria branch of the Engineering Institute of Canada and their friends, about sixty guests being shown over the well appointed factory in Victoria West.

The visitors examined with interest the processes of manufacture of biscuits, and chocolates, and were entertained to afternoon tea by the staff. Chairman G. B. Mitchell expressed the enjoyment of the party in a vote of thanks to A. E. Ormond and the staff.

Disease Germs Doomed

Many have lost terrors for the Scientist

The progress of recent years in medical research is little short of marvelous. Daily, science kills germs by the million. Daily, new ones are being discovered and exterminated by the march of medicine.

Science is winning. What were once regarded as serious diseases are now laughed out of countenance by the doctors. Fearlessly they plunge naked hands into swarms of them, their only precaution being to rinse their hands afterwards with a reliable germicidal preparation. We are witnessing the birth of an era when the world will have little to fear from microbes.

WILLYS-OVERLAND HAS FINE SERVICE

Company Has Big Parts Department; Special Care Given to Dealers' Orders

Willys-Overland's parts department, which has been carefully planned and built to render service to distributors and dealers, is regarded as one of the speediest and most efficient of the many divisions of the big company at Toledo.

An entire building of mammoth proportions, plus order space in several others, is devoted exclusively to the assembling of parts, filling of orders and shipping of parts to all parts of the world. Hundreds of thousands of dollars in parts value are represented in doley boxes and racks, that line the rooms of the parts department building. Every part placed on each and every model of Overland and Willys-Knight cars is stocked in this big reserve parts fund, from which they can be packed and shipped at the first notice.

Particular care is taken in the marking of stock to prevent mistakes in orders, and each order that comes to the department is checked four times before it is passed to the packer, all to prevent errors in filling.

Every precaution is taken to protect the consignee, both in the filling of orders and in the saving of shipping expense. Every part on Overland products is automatically measured by the packer, who sees that none but absolutely necessary weight and size of lumber is included. Additional care is taken in the use of thousands of yards of excelsior padding, and bale after bale of soft-wood excelsior is packed in each shipment. The parts department of Willys-Overland, Inc., at Toledo has systematized the packing and shipping of parts so as to reduce the chance of damage in transit to a minimum. In the crating of parts for foreign shipments, specially constructed crates are built on the spot to withstand the rough handling of the sea voyage.

In addition, all overseas parcels are lined with waterproof paper to prevent rust from the damp salt water trip. Certain parts, subject to rust and weather infections, are dipped in rust preventative solutions before they are stored and again before crating.

Every Overland or Willys-Knight part, from the smallest screw to frame and motor assembly, is filled from the original order blank, carefully inspected, checked as to number and identity of parts, and finally is packed and shipped from the same department, insuring the shortest possible time in the filling of orders to the buyers. Every consignee of parts from the Willys-Overland, Inc., is free from worry that his shipments are not securely packed, and knows, with but rare exceptions, that he will receive on time exactly what he ordered and in the finest possible shape.

An engine can be kept free from knocks by having the radiator full of water and using a correct grade of oil at the proper level at all times.

A STORY WITHOUT WORDS

WOMAN DRIVES AND OWNS MOTOR COACH

Former Member of Woman's Legion "Can Get Out and Get Under"

Miss Marjorie Batten, a London woman who served in the Women's Legion, takes her place daily at Bournemouth as owner-driver of a fourteen-seater motor-coach. She is believed to be the only woman motor-coach driver in England.

After passing the usual tests she was licensed by the Bournemouth Corporation and pilot for hire among some twenty-five to thirty male drivers, calling on passers-by to patronize her coach.

Asked why she had chosen this occupation, Miss Batten said that her father had lost a good deal of money and she had to do something. The only thing she could do was to drive a car, having done so for twelve years. She chose Bournemouth because of its many attractive drives.

She does her own cleaning and repairing as well as the book-keeping. She intends to extend her business with larger coaches, and if she can get the right kind of woman driver will make it an entirely feminine business.

"But the right kind are hard to find," she declares. "As a class the excellent woman driver is in a minority."

"In the event of a breakdown I can

do ordinary repairs, which means that if required I can get out and get under and put things right."

During the war Miss Batten was attached to the Ministry of Munitions, and among others drove Mr. Churchill, Dr. Addison, and Lt.-Col. Moore-Brabazon, now Parliamentary Secretary to the Ministry of Transport.

GOOD SILENCER

Ordinary cotton braid makes an excellent silencer wherever sheet metal comes in contact with sheet metal. Heavy cotton tape is better where there is heavy wear, as, for instance, under the hood. In the case of squeaking fenders, a length of cotton braid bunched under the fastening nuts, which are drawn up tight on lock-nuts, will be found useful in silencing noise.

GET GOOD PARTS

Because every part must be made to the highest standard and machined to extremely close limits, so that it will fit properly and give the utmost in performance, replacement parts of a car should be genuine and not imitations. The price of cheap parts may be more attractive, but sacrifices are made in quality and safety. Many counterfeit parts are only one-third as strong as the genuine.

HIGH MILEAGE

Automobile manufacturers in Great Britain build cars which consume less gasoline than American cars. It is nothing for a British car to do thirty-five miles per gallon. Gasoline costs about forty-five cents a gallon, so the saving matters. But the price of the British car is from \$1,900 to \$1,500, from double to treble the price of an American car.

STUDEBAKER SALES SHOW BIG INCREASE

Stocks in Hands of Dealers at End of March Reduced 44.2 Per Cent

Arrival of improved economic conditions in the automobile industry is indicated by Studebaker recent activities. Acceleration of production and sales has been in effect for some time. March sales were 14,900 cars, as compared with 12,390 in March, 1924.

For the first three months of 1925, sales were 35.51 per cent. higher than for the same period a year ago. These sales to actual customers, not orders from dealers paid for at the factory.

During the same period stocks in the hands of the 5,000 dealers throughout the world were cut down to a condition where, in many instances, they did not have complete lines of cars for display.

At the end of March the stocks in their hands had been cut to a point 44.2 per cent. lower than they were a year ago and the books of the company disclosed that there was not a single dealer, of all the 5,000, who was not filling preferential schedules in the effort to get more cars.

In 1924 the demand was nearly 75 per cent. for open car models, while at the end of March it was 75 per cent. for the same types. This would have been increased materially but for the steadily growing demand for the company's duplex body, according to officials.

As President A. R. Erskine announced, export sales are more than 50 per cent. higher than for the previous year.

The percentage of increase for each month from November to April, inclusive, is as follows:

November, 1924, over November, 1923, 45.6 per cent.; December, 1924, over December, 1923, 93.9 per cent.; January, 1925, over January, 1924, 24 per cent.; February, 1925, over February, 1924, 108 per cent.; March, 1925, over March, 1924, 69.4 per cent.; April, 1925, over April, 1924, 38.7 per cent.

The April figures were on orders already booked for the month. Canadian sales are not included in these figures. They were 25 per cent. higher during the first quarter of 1925 than during the same quarter in 1924.

DO IT BY DEGREES

When grease cakes in the spring bolts during a cold spell it is a good plan to place the car in the garage in such a way that each night some one particular bolt is nearest the steam pipes. Shoot grease into the respective bolt the next day when you go to get the car. The next night place the car so that another part to be greased will be as near the heat source as possible. By spreading out the work in this manner a customary winter problem can be overcome with little difficulty.

NOT BEING CHEATED

Just because you are accustomed to having the man at the filling station give you the drain from the hose after pumping in five or ten gallons of gas is no reason why you should raise a rumpus some day if it is done. Newer pumps are coming into use all the time, and some of them are designed to start with a hoseful, thus making it unnecessary to drain the hose after the pumping operation.

Drivers Should Know Equipment

That drivers' license laws will not be successful in preventing automobile accidents until applicants for licenses are required to know as much about the equipment of their cars as they do about driving them, is the statement of Arnold A. Mowbray, commissioner of the Asbestos Brake Lining Association, who says further:

"Recent hearings on proposed license laws now before many state legislatures indicate that proponents of these measures are relying primarily upon revocation of licenses to prevent accidents and not upon the examination intended to eliminate the unqualified operator before he causes an accident."

"More tests of an applicant's ability to handle the steering wheel and to shift gears, plus simple questions on rules of the road, are not sufficient to accomplish the purpose of this legislation."

"Included in the written examination should be fundamental questions which will show the state vehicle department that the applicant re-

cognizes the importance of good brakes, that he knows when to use non-skid tire chains to secure traction under certain weather and driving conditions, that he knows something about safe head-lights and their adjustment, and appreciates the necessity of keeping a car in good working order for safety's sake."

"The familiar example of the railway locomotive engineer who must pass a stringent examination of his knowledge of the locomotive should be sufficient proof of the need of similar tests of the motor vehicle operator. The locomotive travels on rails. The engineer is free to concentrate on the operation of his engine and upon the signals which control the train movement. The motorist's responsibility is greater. He must steer, watch the road, watch signals and other motorists, watch the performance of his car and keep out of accidents in crowded traffic without any of the preliminary systematic training received by the engineer."

"Driving licenses for motorists are intended to keep the unfit driver off the highway but such legislation fails of its purpose if the examination does not give a complete picture of the applicant's qualifications."

RENEWING PLUGS GETS EFFICIENCY

Spark Plugs Should Not be Used For More Than 10,000 Miles

The automobile owner who realizes anything of the actual money saving through keeping his car always in good condition wouldn't think of driving with a retarded spark. If his gasoline station charged him 10, 20 or 25 per cent. more than his neighbor pays he would soon see about it. He wouldn't drive with a leak in his gasoline tank. If he discovered one he would go to a repair shop at the earliest possible moment.

Yet, if your spark plugs have been used more than 10,000 miles, you are in effect, driving with the spark retarded. You are really paying 10,

20 or 25 per cent. more for gasoline and oil than your neighbor who has installed new spark plugs recently. And while your gasoline tank is not actually leaking if you are using old spark plugs, your exhaust is shooting good power into the air in the form of only partially burned gas.

Spark plugs lose their efficiency so gradually that you don't realize it. They continue to fire, but their weakened spark wastes gas and oil every mile you drive, decreases efficiency of the entire engine and, as a result, increases wear on the engine's operating parts. Pick-up, speed and power are all cut down.

With a new set of spark plugs you will immediately note a marked improvement. You will get more mileage from gasoline and from oil. Power will increase. Acceleration is faster and starting much easier. In most cases you can set your carburetor on a leaner mixture.

If you have used your present plugs more than 10,000 miles, or have had them installed more than a year, you will find it real economy to put in a complete new set right away. Thousands of tests have proved that beyond question, one test by you will prove it to your entire satisfaction.

WILLYS-KNIGHT SIX
A Powerful, Luxurious Car

For those who want the finest—the new Willys-Knight Six is more than a beautiful new car with a six-cylinder engine.

It far exceeds your greatest expectation of high powered six-cylinder performance, because it has the greater smoothness, power and acceleration that comes only from the Willys-Knight sleeve-valve motor. It is powered with the only type of motor that actually improves with use.

The price of the new Willys-Knight Six is perhaps the most amazing thing about it. That a car of such extraordinary quality, powered with a six-cylinder sleeve-valve motor, can be priced on a level with the best poppet-valve sixes is the supreme accomplishment.

The new Willys-Knight Six now awaits your approval.

All the Signs of Spring

In The Automobile World

HUDSON-ESSEX LEAD CLOSED CAR VOGUE

Company Pioneered With Coach and Has Been Well Rewarded

Three or four years ago some automotive writers predicted that within less than a decade closed cars would be sold at one-car prices and would far outsell, numerically, open cars. These prophets were told that they were bug-house visionaries and scribblers by adverse critics.

The critics were in large part right in their diagnosis, despite the fact that they were utterly wrong as to the symptoms on which they based them. For more than a year ago Hudson coaches were offered at open-car prices. Demand jumped, production jumped, effecting economies, and some months ago Hudson coaches again were revised downwards in price well under touring car prices, despite great improvements in coach bodies, as well as engine and other chassis refinements.

introduced the epochal coach model—epochal because it ushered in the era of closed cars at or about open car prices. Most makers now are producing coach models. The leadership of Essex and Hudson in this has resulted in a production in coaches to meet the demand that now is nearing the quarter million mark. It has resulted not only in the great plant carrying on at peak through the recent period of depression in motor car sales when most plants were operating on part-time schedules, but also in plant extension.

The Essex six's remarkable popularity has not been confined to this continent, for its low slung, light, economical design won it instant favor in Great Britain and Europe. "Over there" reviewers have lauded it and expressed amazement at such performance and so much car for so low a price. A number of refinements have been made in the Essex six that have considerably improved its snappy performance and appearance.

The finish and appearance of the new coach is vastly superior to the first series. Balloon tires have also enhanced its appearance, while adding to its riding comfort. The Essex is made in two body models—coach and touring.

Not all gear levers are the right length for comfortable operation, and when the lever is too short an extension can be purchased in any quantity. These extensions are screwed on the end of the lever and they make shifting of gears very much easier.

ANOTHER VANDAL

Yellowstone Park Opens June 18

All main roads to Yellowstone National Park will be in good condition when the formal opening of the park takes place on June 18 at West Yellowstone, Mont. The Western entrance to the park, according to information received by the touring bureau of the Automobile Club of Washington.

Although the hotels and permanent camps will not be open then, as soon as the roads are free from snow, which sometimes occurs several weeks earlier, motorists having their own camping equipment will be permitted to enter the park. Food supplies are obtainable at the park stores.

Most battery trouble can be traced to the failure of the driver to build up the battery when he has an opportunity. Instead of driving at the speed for maximum charging when the battery is low he speeds up, lowers the charging rate and then after driving, finds the battery is dead.

Brake lining that has worn down to one-sixteenth of an inch at any point should be replaced immediately, as the rivets will become exposed and score the brake drums.

Pete DePaolo, noted racing driver, will not start a race without first attaching his son's tiny footgear to the car.

Worn out washers in the bearing retainer usually can be blamed for oil leakage at the rear bearing. Sometimes the leakage can be traced to a worn bearing itself.

OAKLAND HAVE A VARIETY OF MODELS

The Oakland six introduced the new widely adopted duo finish to motorists over a year ago. It was one of the first makes on this continent to adopt the famous Ricardo head and the first of the popular priced sixes to adopt four-wheel brakes. It is also the car with which Dr. P. E. Doolittle, president of the Canadian Automobile Association, made his famous path-finding trip for the Trans-Canada Highway from Atlantic to Pacific and return, and it did it with a perfect score despite the fact that not a few intrepid records were eclipsed in the process and hub deep gumbo and bentonite clay, to say nothing of desert sands and mountain trails, "negated."

The Oakland six, which now offers a choice of nine body models: roadster, touring, special roadster, coupe, four and landaulets.

CARING FOR THE BALLOON TIRE
A balloon tire may be entirely too soft or too hard if only eight pounds below or above the recommended pressure.

LET THE ENGINE RUN
Letting the engine run during short stops on very cold days has its advantages, but the radiator shutters should be left open at the time. An idling engine heats up quickly, particularly when there is no cold air coming in through the core of the radiator. With the shutters open, safe temperature can be maintained.

COST OF MOTORING
The average cost of running an automobile is 10.27 cents a mile, according to estimates by experts of the Iowa State College of Engineering. Trucks cost 11.05, and buses 24.10 cents a mile.

TAGS FOR WALKERS
Paris officials have found a new use for the kind of identification tags soldiers used to wear around their necks. The plan is to put them around the necks of pedestrians, so they may be easily identified when they're hit!

RAIL-TRUCK DELIVERY
A new way of saving time and highways in the shipment of material by truck, from city to city, is proposed by a British railroad man. He would ship the loaded truck by rail, between cities.

OIL HELPS CLUTCH
A dragging clutch of the "come-type" can be made to operate smoother by applying neatfoot oil. Heat the oil to assure an even application. Hold out the clutch and revolve slowly by hand while applying the oil.

BATTERY SAVER
There is less strain on the battery if the driver holds the clutch in while pressing on the pedal. This precaution will also prevent the car moving in case the driver has forgotten to throw the car out of gear.

FORD ANNOUNCES NEW STAKE BODY

For Use on One-ton Truck; Distribution Has Commenced

The Ford Motor Company has added a stake body to its one-ton truck equipment and distribution has begun through the dealer organization, it is announced.

The body may be used in combination with the all-steel cab. Stakes, which are easily removable, permit a platform truck of good proportions. Except for floor and rick boards, which are constructed from especially seasoned wood, the body is all steel. The floor space is five feet wide and eight feet two inches long. The sides rise twenty-six inches above the floor. Stakes are in five sections, two on either side and one at the rear. The sections are held together with sturdy steel stakes, ends of which fit snugly into sockets cut into the outer steel frame of the platform. Special connections hold the sections into a rigid body of exceptional strength and durability.

either side and one at the rear. The sections are held together with sturdy steel stakes, ends of which fit snugly into sockets cut into the outer steel frame of the platform. Special connections hold the sections into a rigid body of exceptional strength and durability.

RUSTED SPRINGS

When a spring is rusted to the extent that it becomes "frozen" in a rigid mass, it should be taken apart, each leaf washed with kerosene, and replaced, inserting a heavy piece of wrapping paper thoroughly saturated with a good grade of graphite grease between each leaf. Apply engine oil freely—it is a good plan to paint the spring leaves with oil. The oil will work down between the leaves.

\$3,300,000,000 SPENT BY WORLD FOR AUTOS

The world spent \$3,300,000,000 last year for automobiles and motor-cycles. The commerce department estimated this on the basis of an average cost of \$1,000 each for automobiles and \$200 for motor-cycles. The increase in automobiles for the year was 3,479,000 or eighteen per cent. of a total of 22,769,000.

OUT OF A RUT

Backing the car slowly, with the front wheels toward the left, is the right way to get out of a rut, especially on a muddy road. Thus the least effort is put upon the engine and there is no strain on the wheel-spokes and front axle.

our Automobile
TIMELY TIPS ON ITS CARE
By E.H. Scott

What You Should Know About An Automobile Engine

All owners of an automobile know that before a car will run, it is necessary to fill the gasoline tank, have sufficient water in the radiator and oil in the crankcase. You know in a general way that a gasoline mixture or gas is taken into the cylinders and is exploded by a spark at the spark plug, and that this explosion forces down the piston, causing the engine to operate and move the car along the road.

HOW ABOUT A SPRING FIX-UP FOR YOUR CAR?

Changes Should be Made to Enable Motor to Work Best After Winter Adjustment

With the coming of Spring weather, the careful motorist will see to it that certain inspections and adjustments are made on his car to insure its operation at the highest point of efficiency.

It is well to remember that the average motor car has been operated during the Winter under conditions diametrically opposed to the warm weather which spring ushers in. Adjustments and repairs made at this time will add materially to the uninterrupted joy of motoring through Spring, Summer and Fall—the period when the greatest mileage is run up on the car.

The following six items should have special attention: cooling system, electrical system, lubrication, engine, brakes and tires.

FLUSH RADIATOR
To make sure that the cooling system will function properly, flush out the radiator with a hose and refill with clean water. This not only takes away the accumulated particles of dust sediment and rust, but also removes the alcohol which would make the radiator boil in warm weather. The hose connections should be examined, and changed if they show signs of rotting.

It is also well to blow out the radiator core with compressed air if possible, as all dust collected here militates against the proper cooling of the engine. The fan belt should be inspected and replaced if found badly worn or too loose.

The electrical system should also be checked over carefully. See that all connections are tightened in the ignition system, and the breaker points and spark plug gaps adjusted. If the charging rate of the generator has been increased for the Winter months, it should be lowered again for the Summer driving. Of course the battery should be inspected every two weeks and distilled water added as needed.

The carburetor should likewise be adjusted for warm weather, as it is obvious that you do not need as rich a mixture as in Winter. If considerable driving is done in hot weather, proper adjustment of the manifold heater should be made.

CHANGE OF OIL
The oil in the transmission should be changed regularly after each succeeding 3,000 miles of driving. If the owner lubricates the car himself, he should use heavier oil in the gear. The light oil that was placed in the rear axle for Winter driving should be changed and a heavier oil, such as 500 W, substituted.

OBSEVRE RULES OF ROAD
There are certain safety rules of the road which the careful driver observes, and these precautions should always be carried out. Slow up for all turns in the road. Blind corners are dangerous. When it is impossible to see what is coming from around the corner, it is well to be prepared to stop. And it is bad business to get in the threads where they are dangerous. When it is impossible to see what is coming from around the corner, it is well to be prepared to stop. And it is bad business to get in the threads where they are dangerous.

KEEP DIRT FROM THREADS
When changing tires, lug bolts should be laid aside in a way that the inside is facing upward as they are removed. This prevents any dirt from getting in the threads where they commence, and thus prevents delay in screwing on the bolts.

ENAMEL WILL HELP
When overhauling the engine for the Spring season, try scraping all the oily dirt off the outside surfaces, thoroughly clean with gasoline and, after drying, paint with motor enamel. This can be obtained in several colors and will decidedly improve the appearance of an old engine.

SHELLAC FOR TOP REPAIR
Shellac is the best substance to use in top repairs. Clean the torn parts thoroughly and then roughen slightly with sandpaper. The patch is applied by using the shellac as a cement, pressing the patch down firmly.

RUST FROM TOOLS
It is a good plan to wipe off all tools on a bit of oil waste before restoring them to the tool box. The oil deposited on the metal keeps it from rusting, which is a trouble to be guarded against.

TO REMOVE BOLT
When the head of a bolt is broken off, the broken part can be removed by cutting a slot across its face with a hacksaw. A screwdriver is all that is necessary to remove the remaining part of the bolt.

STOPS LEAKAGE
The leakage of grease about the hub flange of a full-floating axle can be stopped by making a gasket of common wrapping paper and inserting it between the flange and the wheel.

SLEMP OVER RUTS
When you travel over rough roads travel in second and slump way down in your seat. This relieves the spine from shock, says an osteopathic physician.

WILLING TO WAIT
Salesman (at motor show)—This is the type of car that pays for itself, sir.
Prospective Buyer—Well, as soon as it has done that you can have it delivered at my garage.

It forces out the burnt or exhausted gases past the exhaust valve into the exhaust manifold or muffler. This is called the EXHAUST STROKE.

**OBJECT OF WORLD
 SERVICE EXHIBIT**
**Glances of World's Work
 and Human Needs in
 Miniature**

In a preliminary announcement of
 proposed World Service Exhibition,
 to be held in the Memorial Hall, Sep-
 tember 21-23, the purpose of the
 undertaking is stated in the follow-
 ing terms:
 "The object of the World Service
 Exhibition is to show in miniature,
 by picturesque and varied ways,
 glimpses of the world's work and hu-
 man needs, and that the purpose of
 God as declared by Christianity re-
 quires men, women, young people and
 children to co-operate with God in a
 universal fellowship of service for
 one another and all mankind."
 Conveners and groups of workers
 have been appointed to the various
 Courts of Service in the exhibition.
 The Court of Service in Worship,
 which will occupy the chapel in the
 Memorial Hall and will include an
 exhibit of ecclesiastical art, will be
 in charge of the Ven. Archdeacon
 Laycock, who will be assisted by
 members of the Cathedral Chancel
 Guild. The Court of Service in Dram-
 atics, with the Very Rev. Dean
 Quinlan as convener, will arrange
 for daily opening ceremonies and the
 production of a mystery play and
 missionary pageant. Mrs. E. P. Lay-
 cock has been appointed general-con-
 vener of the Court of Service in the
 Ministry of the Gospel throughout the
 World, which will occupy two large
 rooms on the upper floor of the
 Memorial Hall. The Court of Service
 will have charge of a Court of Ser-
 vice in Education. Rev. H. T. Arch-
 bold has been made convener of the
 Court of Service in Social Welfare,
 in which will be depicted several
 phases of social service work. The
 Court of Service in Commerce and
 Industry has been referred to the
 Cathedral Men's Guild. Representa-
 tives of a number of church organi-
 zations will show what is being done
 by their respective societies by ex-
 hibits in a Court of Service in the
 Organized Work of the Church. A
 Court of Service of teachers will
 be conducted by A. R. Merz,
 assisted by a number of Sun-
 day School workers.
 The large auditorium in the Mem-
 orial Hall will be used as a Court of
 Service in Homecraft and Handicraft.
 This will be the scene of bazaars,
 in which the various stalls will be
 decorated to represent the League of
 Nations. Mrs. Duncan Ross has been
 appointed convener, and will be
 assisted by a large number of
 workers in charge of the stalls.

**SPECIAL FUNERAL
 RECORDED AT
 FIRST CHURCH**

**Music Will be Feature With
 Sunday School Choir at
 Morning Service**
 At the morning service the First
 Presbyterian Church will hold a
 special service in celebration of
 Mothers' Day, which is being ob-
 served throughout Canada in all the
 churches.
 A most interesting order of service
 will be used and special floral decora-
 tions have been arranged by the
 Victory Young Ladies' Bible Class.
 The scholars of the Sunday School
 will occupy the body of the church
 on this occasion, and it is fully ex-
 pected that the church will be filled
 to capacity with older members of the
 congregation.
 The music will form a special fea-
 ture and the Sunday School choir
 under the leadership of Alfred Curney
 will lead the singing and will render
 an anthem entitled "The Magnificent,"
 by E. Bunnett, the well-known
 English choral composer. Special
 hymns have been chosen and this ser-
 vice promises to be one of unusual
 interest. Rev. Dr. Wilson will give
 an address suitable for the occasion.
 Everyone is asked to wear a flower
 on Sunday, this custom being fol-
 lowed throughout Canada.

MIND AND EMOTIONS
 At a public meeting of the Victoria
 Theological Society, Independent, to-
 day Sunday evening, at 8 o'clock,
 "Mind and Emotions" will
 be the subject of an address and dis-
 cussion. The meeting will be held in
 the rooms of the society, 161 Union
 Bank Building.

Times Sunday School Lesson
 By REV. GEO. C. PIDGEON, D.D.

PAUL BECOMES A CHRISTIAN
 Acts ix, 1-31

In the New Testament Paul is the
 Universalist, the one who changed
 Christianity from a little Jewish
 sect to a religion world-wide in its
 scope. In every account of his con-
 version (Acts ix, Acts xxii, Acts
 xxvii, Gal. 1:13-14) Christ's ap-
 pearance and call, and Paul's acceptance
 of a commission to evangelize the
 Gentiles are found together. The one
 issue out of the other. The recog-
 nition of Jesus as the Messiah in-
 volved the ministry to the Gentiles.
 It is striking, therefore, that Paul
 be introduced to us as a persecutor,
 hunting to death the followers of the
 Nazarene. The reason seems to be
 that from the first the issue between
 Jesus and Paul was the universalism
 of Christianity. If there was one
 thing for which the Jew of that day
 would fight with desperation, it was
 for his peculiar privileges as the only
 elect of God. Everything he valued
 hinged on this. Paul saw the uni-
 versalism latent in Stephen's mes-
 sage which we studied a few weeks
 ago. If it were true that the worship
 of God was spiritual, and that the
 spiritual could find God anywhere,
 then there was no necessary place
 for the distinctive rites of Judaism,
 and the heart of God was open to all
 the world. To his soul this was a
 doctrine hateful to God and ruinous
 to his race, and in order to destroy
 it he set himself to exterminate those
 who taught it. He was in the thick
 of this struggle when Jesus met him
 on the way to Damascus. At
 glance he saw that the Nazarene
 was the Son of God, and to see Jesus
 as Divine meant seeing Him as the
 universal general convener, and will
 where Jesus' mental penetration
 more clearly shown than in his dis-
 cernment in his pre-Christian days
 that the issue between Jesus and
 Judaism was vital to both, and turned
 on the idea of the scope of the grace
 of God; nowhere is his moral thor-
 oughness more evident than in his
 acceptance of that universalism for
 which Jesus stood the moment that
 he recognized Him as Divine.
 The peculiarity, therefore, of Paul's
 case is that it is the conversion of a
 zealot. Augustine, for example, was
 converted from sin to service; Paul
 merely changed the form of his
 obedience, but in conversion was
 not a change of purpose toward God,
 it was a change in his conception of
 what God was. Paul always served
 God with his whole heart, but in his
 pre-Christian days he had a woefully
 distorted view of God's nature and
 requirements. From his earliest
 years he could not but believe in
 God, and believing, he could not but
 throw all his energies into God's ser-
 vice.
 There is something inherently
 noble in the zealot, no matter how
 mistaken his notions. To be pos-
 sessed by a great idea to the extent
 of putting one's whole life into its
 realization, is the greatest quality
 in the soul developed. Such a
 character has unlimited potential-
 ity; when God gains possession of
 such a man, he can make him a force
 for eternity.
 There are two aspects of the ap-
 pearance of Christ to Paul, which
 had a place in his account of his
 experience. The one is objective, the
 actual appearance of the risen Jesus;
 the other subjective, the spiritual
 revelation of Christ to his soul.
 In the three passages in the Acts
 (Acts ix 1-9, xxii 3-23, xxvii 4-20)
 it is the former that is described. Paul
 believed that the risen Jesus came
 to him and was seen by his own eyes
 as really as He came to the disciples
 in the forty days following the re-
 surrection. In I Corinthians xv 8
 he uses this appearance of Jesus to
 himself as one of the arguments for
 His bodily resurrection. In I Cor-
 inthians ix 1 he uses it as one of
 his claims to Apostleship equal to
 that of the Twelve. There is no
 doubt that Paul attached great
 importance to this fact.

**IMPRESSIVE SERVICE AT OAK BAY
 CHURCH WILL COMMENCE AT
 11 O'CLOCK SUNDAY**

St. Mary's Church, Oak Bay, will
 be the scene of an interesting cere-
 mony on Sunday morning, when the
 memorial window erected to com-
 memorate the late rector, Rev. G. H.
 Andrews, will be unveiled before a
 large congregation.
 The unveiling ceremony will take
 place at 11 o'clock to-morrow morn-
 ing and the order of service will be
 as follows:
 Anthem, "What Are These?"
 (Stainer)
 Unveiling of the window by Gen.
 Sir Percy Lake, K.C.B., K.C.M.G.
 Dedication of the memorial. The
 memorial consists of the extension of
 the chancel, the erection of the
 stained glass east window, and the
 addition of two vestries. The fund-
 raising for the chancel and the other
 for the lady members of the choir.
 The Last Post.
 The National Anthem.
 Hymn 327, "Lord of All Creation."
 Sermon, the Archdeacon of Colum-
 bia.
 Hymn (offertory), 219, "For All the
 Saints."
 Recessional hymn, 624, "The
 Church's One Foundation."

**The Victoria British Israel Asso-
 ciation will meet in the Victoria Club
 Rooms, Campbell Building, on Tues-
 day evening at 8 o'clock. W. H.
 Blackler will deliver an address
 entitled "Two Concepts: The Bible and
 the British Empire."**

**FIRST CONGREGATIONAL CHURCH
 WILL OBSERVE MOTHERS' DAY**

Mothers' Day will be celebrated at
 the First Congregational Church on
 Sunday morning. A message ap-
 peared to the occasion will be deliv-
 ered by the pastor, Rev. A. K. McMin-
 n, and special music will be given by
 the choir.
 "Those whose mother is wither
 reach are asked to take her to church,
 to sit beside her, and wear a red flower
 in her honor; those whose mother is
 at a distance can best do her rever-
 ence by attending church; and those
 whose mothers have passed on, let
 beyond will hold her in grateful re-
 membrance and wear a white flower
 to commemorate those never-giving
 mothers in her life and spirit," urges
 Mr. McMinn.
 At the evening service Rev. A. K.
 McMinn will speak briefly on "What
 the Congregationalist Contribution to
 the United Church." "Here in Western
 Canada, where Congregationalism is
 not numerically strong, there has
 been a tendency during the discus-
 sion on union to overlook the con-
 tribution of Congregationalism to
 the United Church," says Mr. McMinn.
 "Surely these are the days when vital
 values are not to be confused with
 numbers and the church, least of all,
 should underestimate such spiritual
 assets."
 "Congregationalists have not done
 any boasting throughout the negotia-
 tions for union, but that does not
 mean that the denomination is a
 behind either of the other two in the
 glory of her history and traditions,
 the values and methods of her service
 to society, her missions and her fi-
 nancial contribution to the United
 Church."
 "Congregationalism is one of the
 oldest of the free churches, has held
 the reputation of being a public-
 minded denomination, has wielded a
 strong influence on education and
 political life, has held aloft the ideal
 of thorough-going democracy, and
 has been remarkable for its mis-
 sionary spirit and enterprise."
 "The passion of Congregationalism
 for freedom and her pioneering are
 witnessed to by the called church in
 the Netherlands in the early days,
 by the story of the Pilgrim Fathers
 and the sailing of the Mayflower, and
 the founding of the New England col-
 onies; by such organizations as the
 London Missionary Society, the
 American Board of Commissioners for
 Foreign Missions, the brotherhood
 movement, the Young People's Soci-
 ety of Christian Endeavor."
 "Congregationalism in Canada is
 inseparably connected with the
 fountain of its life in England and
 with the broadening stream in the
 United States. The denomination
 among our people has a rich heri-
 tance of history and receives in
 return a like glorious share in the
 historical inheritance of the other
 two churches."
 "Even in the matter of finances the
 Congregationalists have no reason
 to be ashamed. According to com-
 parative figures compiled at Toronto
 by the Church Union Committee the
 three denominations will take into
 the United Church the following
 amounts per member: Presbyterian,
 \$108.45; Methodist, \$145.00; Con-
 gregationalists, \$195.70.
 "The evening service will be brief
 to provide ample time for a full Con-
 gregational meeting immediately
 afterward to discuss freely and in-
 formally the suggestion that this
 denomination be united with the
 Methodist Church on the basis of
 union laid down in Schedule A to
 the Act Incorporating the United
 Church of Canada," concludes Mr. McMinn.

ANGELICAN
 CHRIST CHURCH CATHEDRAL—Holy
 Communion, 8 a.m., and 7.30 a.m.;
 Matins and sermon, 11 a.m., preacher,
 the Rev. T. Archibald, Evening and
 morning, 7.30 p.m., preacher, the Rev. W.

**FLOWERS WILL BE
 WORN TO INDICATE
 TRIBUTE TO MOTHERS**

"Mother is the magic word which
 will call together thousands of wor-
 shippers on Sunday next. However
 far a man may have drifted the
 shortest line back is through the
 memory of a mother's love," says
 Rev. E. L. Best.
 "That is the reason why James Bay
 Church will make Mother the
 entire theme of the day's services.
 Both the morning and evening ser-
 mons, preached by the pastor, will
 centre about this idea, so rich and
 resilient of the finest of human
 affection.
 Each worshipper is asked to wear
 a flower in memory of their mother,
 red is to be the color if the mother
 is living, and white if the mother
 has departed from this life.
 It is hoped that no one will refuse
 to respond to the appeal of mother's
 memory, for if a man or woman has
 the rudiments of good in them such
 a memory will bring it out. This is
 in no sense exploiting for the sake
 of advertising church services, but
 the desire, to collectively and indi-
 vidualy pay a tribute to the greatest
 of all human relationships.
 "Wear a flower for mother's sake—
 come to church for mother's sake,"
 says Rev. Best.

**James Bay Church Has Novel
 Plan For Mothers' Day**

Mothers' Day will be celebrated at
 the First Congregational Church on
 Sunday morning. A message ap-
 peared to the occasion will be deliv-
 ered by the pastor, Rev. A. K. McMin-
 n, and special music will be given by
 the choir.
 "Those whose mother is wither
 reach are asked to take her to church,
 to sit beside her, and wear a red flower
 in her honor; those whose mother is
 at a distance can best do her rever-
 ence by attending church; and those
 whose mothers have passed on, let
 beyond will hold her in grateful re-
 membrance and wear a white flower
 to commemorate those never-giving
 mothers in her life and spirit," urges
 Mr. McMinn.
 At the evening service Rev. A. K.
 McMinn will speak briefly on "What
 the Congregationalist Contribution to
 the United Church." "Here in Western
 Canada, where Congregationalism is
 not numerically strong, there has
 been a tendency during the discus-
 sion on union to overlook the con-
 tribution of Congregationalism to
 the United Church," says Mr. McMinn.
 "Surely these are the days when vital
 values are not to be confused with
 numbers and the church, least of all,
 should underestimate such spiritual
 assets."
 "Congregationalists have not done
 any boasting throughout the negotia-
 tions for union, but that does not
 mean that the denomination is a
 behind either of the other two in the
 glory of her history and traditions,
 the values and methods of her service
 to society, her missions and her fi-
 nancial contribution to the United
 Church."
 "Congregationalism is one of the
 oldest of the free churches, has held
 the reputation of being a public-
 minded denomination, has wielded a
 strong influence on education and
 political life, has held aloft the ideal
 of thorough-going democracy, and
 has been remarkable for its mis-
 sionary spirit and enterprise."
 "The passion of Congregationalism
 for freedom and her pioneering are
 witnessed to by the called church in
 the Netherlands in the early days,
 by the story of the Pilgrim Fathers
 and the sailing of the Mayflower, and
 the founding of the New England col-
 onies; by such organizations as the
 London Missionary Society, the
 American Board of Commissioners for
 Foreign Missions, the brotherhood
 movement, the Young People's Soci-
 ety of Christian Endeavor."
 "Congregationalism in Canada is
 inseparably connected with the
 fountain of its life in England and
 with the broadening stream in the
 United States. The denomination
 among our people has a rich heri-
 tance of history and receives in
 return a like glorious share in the
 historical inheritance of the other
 two churches."
 "Even in the matter of finances the
 Congregationalists have no reason
 to be ashamed. According to com-
 parative figures compiled at Toronto
 by the Church Union Committee the
 three denominations will take into
 the United Church the following
 amounts per member: Presbyterian,
 \$108.45; Methodist, \$145.00; Con-
 gregationalists, \$195.70.
 "The evening service will be brief
 to provide ample time for a full Con-
 gregational meeting immediately
 afterward to discuss freely and in-
 formally the suggestion that this
 denomination be united with the
 Methodist Church on the basis of
 union laid down in Schedule A to
 the Act Incorporating the United
 Church of Canada," concludes Mr. McMinn.

**CONGREGATION
 WILL PASS ON
 UNION PROPOSAL**

**Centennial Church Will Ob-
 serve Mothers' Day To-
 morrow**

To-morrow morning there will be
 the observance of "Mothers' Day,"
 when the pastor, Rev. W. Hibbert
 will speak on the subject "The Hero-
 ism of Home." The choir will
 sing "Lord, I Call Upon Thee."
 The evening congregation will be
 addressed by Rev. B. C. Freeman of
 Cranbrook, chairman of the West
 Kootenay District, who is in the city
 in connection with the business of
 the Methodist Conference. Miss
 Claire Powell will sing "I Know That
 My Redeemer Liveth,"
 and the choir will give "Lo, the Day
 of Rest Descendeth."
 At the close of the evening ser-
 vice the members will be asked to
 consider the proposal of amalgama-
 tion with the Congregational Church
 of the city, and an opportunity will
 be given to the members to indicate
 their attitude towards the proposal.
 This is a matter of vital importance
 to the people of Centennial and it
 is expected that the membership will
 be well represented at this gather-
 ing, it is stated.

**Mothers' Day
 At Emmanuel
 Baptist Church**

Mothers' Day will be observed at
 the Emmanuel Baptist Church by a
 special service to-morrow morning
 when the Rev. Henry Knox will give
 an appropriate address to the girls
 and boys. The sermon will be spe-
 cially for mothers, and suitable
 music will be rendered by the choir.
 Mrs. G. H. E. Green will sing "The
 Sweet to be Remembered." At this
 service several mothers will bring
 their babies for dedication.

Last Minute News on Stocks and Financial Affairs

New York, May 9 (By R. P. Clark & Co.)—The week's encouraging reports on business supported by the record April volume of building contracts placed were the outstanding news features.

Motor shares are discounting this quarter's favorable outlook, there was nothing special to influence the rail issues, though the new merger possibilities and heavy traffic figures continue to act as the outstanding influence.

Southern Railway was off 3/4 at 91 in response to the statement of President Harrison that no dividend increase would likely be distributed until the end of the year.

CHICAGO GRAIN

Chicago, May 9 (By R. P. Clark & Co.)—Wheat—The Government report of yesterday is undoubtedly bullish, the recent advance had left the trade long without much new buying to sustain the market in the face of increased pressure from those who were disappointed in the report not being more bullish than it was.

Corn solid off with wheat, but declines were not drastic, and on declines there was considerable buying by commission houses.

Eye Clearances for wheat much smaller than recently. However, there was no special pressure on market. Report business was light.

Chicago, May 9 (By B.C. Bond Corporation's Direct Pit Wire)—Wheat broke sharply on general selling headed by local operators on the floor.

TO-DAYS MINING MARKETS

Not satisfied with waiting longer for developments in the Dunwell silver property, the Government has started the work in the north which are well advanced in development started out this week with an advance on their own account.

The Silver Ledge Company was reorganized here during the week. The personnel of the board altered to include H. A. Hayward, H. Leiser, R. G. Christy with John Woods, Dr. Bryant and J. R. McTear.

There were a few sales during the week of Dunwell under 14. Rumors have been floating about the terms of the Dunwell deal, the popular ones of the last few days ranging from terms of \$2 cash and three shares to \$6 cash and twenty shares.

Premier weakened during the week with high bids on the market today down to \$2.30, which is a new low for some time.

Independence and Porter-Idaho have both been quiet. There was bidding, however, for Porter around 17 to-day. Phoenix holds well above 24, awaiting news on Dunwell.

Table of mining market prices with columns for Cash Price, High, Low, and various stock names like Montana Power, National Breweries, etc.

HEAT PRICES SPILL, AS MILLERS UNLOAD

Winnipeg, May 9—Construed by the grain trade as bearish, the United States Government crop report issued yesterday, precipitated a drastic reaction in the price of wheat on to-day's brief session here.

The coarse grains were swept downward in the general price cutting, rye suffering the most being five cents lower. Buying power was extremely light with longs meeting difficulty in liquidating their holdings.

Winnipeg, May 9 (By R. P. Clark & Co.)—Wheat—The United States Government report was the big feature of the market to-day, being construed bearish by the trade and brought out a lot of liquidation of long wheat, although there was a little export business being worked on the scale down, the absorption was not sufficient and prices gradually slipped lower.

At might be expected in the face of the Government report, there was very little export business worked overnight, the foreigner being inclined to pause in his buying and wait to see how America took the report. The report when properly digested may not prove so bearish, as it showed a very moderate winter wheat crop, about 445 million bushels, as against 590,000,000 last year, and some 30,000,000 less than the report of a month ago.

VICTORY BONDS

Table of Victory Bond prices with columns for Buy, Sell, and various bond names like Victory Loan, etc.

Winnipeg, May 9 (By B.C. Bond Corporation's Direct Pit Wire)—American Government report of yesterday afternoon was construed as being a little bearish in that it showed figures slightly better than expected and owing to condition being very well disclosed by recent advances in anticipation of the report it was not surprising therefore to see considerable weakness in the grain markets this morning.

Mining Development in British Columbia

MORMOT METALS OUTLOOK BRIGHT

Stewart, B.C., May 6 (By Mail).—The Marmot Metals Mining Company Limited, non-personal liability, which has been incorporated under the laws of British Columbia, for the purpose of taking over, developing and operating the well known Montana group of six claims, is situated on the south fork of Marmot river, five miles by trail from Idewater, at an elevation of from 1,500 to 3,500 feet.

This was the first property staked on Marmot river and has long been recognized by mining men as a property of great merit. Staked and owned by H. C. Magee, of Stewart and Vancouver, George W. Brugg, of Alice Arm and Angus McLeod, of Stewart, considerable work has been done consisting of a great deal of surface prospecting and open cuts, a total of 140 feet of tunnels and a twenty-foot shaft.

Small shipments, that can only be looked upon as smelter tests, have from time to time been made, that have returns of over \$100 in gold, silver and lead. Assays have given as high as 1.616 oz. silver, with good gold and heavy lead content.

A large mineralized zone from 100 to 200 feet wide traverses the entire length of the four upper claims, be-

LOW VEIN, FIVE TO SIX FEET WIDE, CARRYING HIGH GRADE ORE, HAVE BEEN LOCATED AND TO AN EXTENT DEVELOPED. THESE VEINS HEAD DIRECTLY FOR THE BIG ZONE, AND AT THEIR INTERSECTION WITH IT SHOULD MAKE LARGE AND VALUABLE ORE BODIES. OWING TO THE NATURE OF THE CONTOURS GREAT DEPTH CAN EASILY BE OBTAINED.

A good horse trail runs from Idewater at the mouth of Marmot river right up to and past the foot of the property.

The new company has a capitalization of \$1,500,000, divided into 3,000,000 shares, par value 50c. One-third of the capital stock, 1,000,000 shares, is paid to the vendors in full payment for the property and to cover incorporation and organization costs. This stock is to be placed in escrow for two years. The balance, or 2,000,000 shares, is placed in the treasury for public subscription, for the purpose of financing development and later equipping the property. The company takes over the property clear of all liabilities and with no payments to be made.

In the interests of economy the head office will, for the time being at least, be in Stewart. Angus McLeod, one of the owners and a well known northern mining man of experience and repute, will be the managing director.

"My wife is a fine singer. I have known her to hold her audience for hours at a time."

"Yes; after which she would put it in the cradle and rock it to sleep."

HOMEGUARD ORE DISCOVERY MADE

Alice Arm, May 9.—An entirely new discovery was recently made on the Homeguard property by Wm. McFarlane who brought samples of the ore to town. The vein width of the ore is about five feet and it is located only about 300 feet from the Kitsault River. Samples of the ore brought down are similar to flint found previously on the property and which gave assay returns of \$18 gold per ton. The samples have been sent out for assaying for zinc, gold and silver.

Wm. McFarlane has taken in supplies and is driving a tunnel on the vein, which is already in eight feet.

The Homeguard is one of the properties of the Alice Arm district from which big things are expected. Previous development work has proved up a big tonnage of copper ore, chiefly in the form of gigantic boulders. Ore was discovered in place last Fall and this new strike of ore in place is considered of great importance.

SUPPLIES RUSHED TO RUBY SILVER

Stewart, B.C., May 6 (By Mail).—A. W. Fays, Lesieur, managing director of the Ruby Silver Mining Company, has arrived from Victoria to take charge of the season's development work. He brought in a quantity of camp supplies and 5,000 feet of lumber, which Ernie Armstrong started moving up the valley this week.

The trail to the Terminus has been pretty well broken this winter, leaving only one and one-half miles for the Ruby Silver operators to open up; but at that they are three weeks behind what would be called a good schedule, and find bare ground at this end of the route, with decomposing snow at the upper end.

The American Creek roadhouse on the Terminus trail will make a headquarters until the Ruby Silver camp trail is made available; then the latter's cabin, 15x30 feet in size, will be used. A supply of grub will be taken in first, and a crew put to work on the construction of a mess house as the lumber arrives.

WORKING CREW OFF TO PORTER

Stewart, B.C., May 6 (By Mail).—Work was started this week on the Porter Idaho, the contractors, Gus Erickson and O. Cedar, accompanied by Clay Porter, president and managing director, having gone up to the property last week. They were preceded by several days by three men, who would have the camp in order and the tunnel site cleared of snow by the time the contractors arrived.

The working crew comprises some of the best miners of the camp and fast progress is expected of them in driving the 300-foot crosscut tunnel for which the contract calls. The ground is comparatively easy to work. Later, when it is possible to get pack horses to the property, a second crew will be put to work under Mr. Porter's personal supervision, getting out ore from the existing tunnels and continuing them.

MAY FLOWER YIELDS HIGH GRADE ORE

Stewart, B.C., May 6 (By Mail).—Some fine specimens of ore were brought down this week from the Mayflower Group, on which Alex Stewart and Hugh McDonald are working for H. P. Gibson, locator of the property. The group is under bond to an English syndicate, and Mr. Gibson is looking after their interests until they send their permanent representative.

The Mayflower Group consists of five claims, adjoining the Dunwell on the north and Victoria on the west. The workings are only five minutes' walk from the Bear River wagon road. The ore shows zinc and iron pyrite and fine-grained galena, and assays around \$50 per ton, with gold values predominating at \$13.

Mr. Gibson made a small shipment of selected ore from which gratifying results were obtained.

The present crew, consisting of continuing a tunnel along the course of the vein. This is now in ninety feet and has gained a depth of the same distance. The ore is improving as depth is attained. The vein which is fifteen feet wide on the surface, will be crosscut when the 100-foot station is reached.

Crop Report Shows Yield by States

Washington, May 9.—The United States Government crop report shows the yield by states and conditions as follows:

Ohio, condition 62; production 22,060,000.

Indiana, condition 74; production 26,285,000.

Illinois, condition 85; production 44,950,000.

Michigan, condition 83; production 15,670,000.

Missouri, condition 89; production 30,835,000.

Nebraska, condition 77; production 37,939,000.

Kansas, condition 75; production 95,997,000.

Oklahoma, condition 61; production 27,789,000.

Texas, condition 38; production 4,102,000.

Penn., condition 85; production 21,085,000.

Washington, condition 76; production 8,559,000.

Oregon, condition 80; production 5,630,000.

Montana, condition 68; production 2,846,000.

California, condition 86; production 20,846,000.

U.S. Crop to be Less

Chicago, May 9.—The Chicago Tribune to-day says: The Government crop report was construed as bearish as compared with trade expectations, but bullish as considered with last year's harvest, showing 145,000,000 bushels less from 1924 and 108,000,000 from May last year. The trade has been buying in expectation of a showing of around 450,000,000 last year. Domestic requirements total 670,000,000, leaving only 24,000,000 for export compared with exports averaging 250,000,000 each year since 1915.

The rice crop is estimated at 57,555,000, a loss of more than 4,000,000, and compared with 63,446,000 last year. Harvest abandonment in Texas of 53,000,000 to 450,000,000.

The short interests have been cut down on the advance of late and the impression of the trade is that commission houses are mostly long on July and September wheat.

Corn traders who took profits on Thursday in a number of instances re-

instated their lines yesterday. On the basis of the Government report of 445,000,000, with an average spring wheat crop, there would be an aggregate of all wheat of 694,000,000 as estimated by Geo. C. Bryant, compared with 520,000,000 last year. Domestic requirements total 670,000,000, leaving only 24,000,000 for export compared with exports averaging 250,000,000 each year since 1915.

The rice crop is estimated at 57,555,000, a loss of more than 4,000,000, and compared with 63,446,000 last year. Harvest abandonment in Texas of 53,000,000 to 450,000,000.

DILLON NOW ONLY 42, SWINGS BIGGEST DEALS

New York, May 9.—The young man who just swung a \$150,000,000 deal—the largest cash transaction in financial history—wanted to grow up a motorman.

And now he cannot decide which would have made him happier—the realization of his childhood dream, or Big Business. For the dream, outgrown, is lost forever.

Clarence Dillon, of gentle voice and manner, has just eased his way to the top rung of the Wall Street ladder, up which most men try to batter their way.

At forty-two—a young age for the Street—he has to his credit the successful engineering of a \$100,000,000 steel and tube company merger; issuance of \$25,000,000 Standard Oil Company of California bonds; underwriting of \$250,000,000 securities for the Canadian National Railway; loan of \$50,000,000 to Brazil, and numerous other transactions of millions, culminating in the recent record purchase of the Dodge Brothers automobile company.

Yet in his childhood in San Antonio, Tex., he aspired only to pilot a street car.

"Really, there is nothing outstanding about me," he says modestly. "As a youngster I wasn't too naughty, nor too bright. My family was of moderate circumstances. My father was a merchant and local banker.

"I don't remember getting any steady spending money. As a reward for good behavior, my dad would take me on his shooting trips."

Dillon is now bringing up his children under the same rules. His son, C. Douglas, fifteen, is at boarding school; his daughter, Dorothy Ann, twelve, is at home. When either does meritorious work, the father shows his appreciation, not by an added allowance, but by an invitation for a fishing or hunting trip.

"All of us," he adds, like the outdoors, and get our greatest kick tramping around through the woods together."

The eye of the artist hasn't been dimmed by the shaded lights of the

Clarence Dillon

banking office. Dillon studied art on his graduation from Harvard, and still ranks it among his chief avocations.

After his marriage and return from European studies, he went into a manufacturing business in Milwaukee. When he sold out he came to New York, joined William A. Phillips, a former classmate, and began banking work in the "shop" of William A. Read & Co., of which he is now head.

"And I hope that my son," the banker concludes, "instead of dreaming of growing up to be a street car motorman, will aspire to come in with me."

BIG PROGRAMME FOR SCHUBERT RECITAL

Mrs. McCannan and Drury Pryce to Assist Tuesday

It is expected that the Memorial Hall will be filled to capacity next Tuesday evening upon the occasion of the second recital of the Schubert Club. The programme shows unusual merit and it is considered one of the most interesting of this season's offerings.

Mrs. D. B. McCannan and Drury Pryce will be the assisting artists. Miss Rita Ormiston, Miss Eleanor Barfoot and Miss Muriel Bishop will be the pianists.

The programme in detail follows: Choruses—"To a Wild Rose," MacDowell; "Whither," Schubert; "Wanderer's Night Song," Rubinstein; Violin and piano—"Sonata No. 4, in D," Handel. Soprano—"Vissi d'Arte," Puccini; "Ten Teux," Rene Raby; violin obligato by Mr. Pryce. Choruses—"Slumber Song," Rebikov; "Dawn," Tschakowsky. Violin—Slavonic Dance, No. 1, G Minor, Dvozak-Kreiser; ballet music from "Rosamunde," Schubert-Kreiser. Choruses—"My Marguerite," old French melody; "Sands of Dee," Frederic Clay; "Little Papoose on the Wind-swing Bough," Cadman. Soprano—"Song of the Open," La Forge; "The Answer," Robert Huntington-Terry; Negro spirituals; Choruses—"Deep River," arr. Ambrose; "Goin' Home," Dvozak; "Oh! Didn't It Rain?" Burleigh. "God Save the King."

STERLING PREPARES FOR MINING CREW

Stewart, B.C., May 6 (By Mail).—Acting on telegraphic instructions from Thomas Campbell, president and managing director of the Sterling mining company, a crew of men left this week for the property to put the camp in order for accommodating the crew of miners who will be put to work upon Mr. Campbell's arrival, which it is expected will be within a few days.

Chapter's Anniversary Tea.—Mrs. H. H. Smith, 1406 Eford Street, has kindly loaned her home for a tea and musicale to be held on Wednesday afternoon, 4 to 6 o'clock, to commemorate the thirteenth anniversary of the Lady Douglas Chapter L.O.O.F. A delightful programme is being arranged and will include songs by Mrs. Charles E. Wilson and recitations by Mrs. F. K. Blowers. Fortune-telling will be an added attraction.

The Hollywood Presbyterian Mission Ladies Aid will meet at the home of Mrs. Baylis, 230 Robertson Street, on Thursday, May 14, at 3 p.m.

LAKEVIEW

Secures Full Control of Claims Adjoining its Property to the South Known as the RIVERSIDE GROUP

The Board of Directors considered this action advisable for the future development of the property. This purchase gives LAKEVIEW a solid block of SEVEN CLAIMS and a fraction. It will enable the company to obtain access by tunnelling through its own ground to at least 1,500 feet of depth on the vein.

DUNWELL has definitely proved this zone to a depth of nearly 1,000 FEET. To finance purchase of Riverside Group, without drawing on the company's Development Funds, the directors have decided to make

A SPECIAL OFFER

of Treasury Stock at 50c per share.

LAKEVIEW has already passed through 4 mineralized zones in its No. 3 Tunnel, one of which is a foot wide and carries values as high as \$65. Another is 25 to 40 feet wide, which may prove to be a body of milling ore on further prospecting.

NO. 3 TUNNEL will reach the "Cabin Vein" some time during this month.

NO. 1 TUNNEL proved the "Cabin Vein" to be a strong fissure vein carrying good grade primary ore, showing assay values as high as \$1,000 in gold, silver, lead and zinc. This class of mineralization carries its values to great depth, as has been proved by DUNWELL.

LAKEVIEW will be out of the prospect stage when it encounters the "Cabin Vein" in No. 3 Tunnel. It will then be a Mine.

LAKEVIEW will stay with the Ore and ship all High Grade to the smelter.

Stewart Consolidated Gold Mines Limited

A MINING COMPANY, correctly speaking, is fundamentally a different organization to a company formed to operate a certain mine or group of claims.

A MINE OR GROUP OF CLAIMS may not turn out to be of value, and that is generally the end of the effort—on the other hand, it may turn out to be a valuable property, in which case every subscriber is pleased.

A MINING COMPANY which is organized to go into the general business of mining in all its ramifications irrespective of any particular property or group, is on a different basis. Its stability will not be affected if one or several of its properties proves to be of small value.

THIS COMPANY is being organized on these lines. Of course we have secured properties of value. Our holdings adjoining the Premier are well situated. The ore exposures show high-grade mineral. You could not expect anything else from their position. There are plenty more claims to be acquired in the district. We are frequently offered new additions.

THE STEWART is a great mining camp, but the Liard Division of the Cassiar, in our opinion, is one of the greatest on the Continent. About placers we have nothing to say, nor about the new finds; but we know that metalliferous veins already discovered in that district in dimensions and values are of great economic importance.

WE ARE ORGANIZED to acquire some of these, and we would like to advise our many clients that the small amount of stock that we are offering at twenty-five cents a share will soon be exhausted.

Managing Director J. H. HAWTHORNTWHAITE

Acting Secretary EUSTACE L. SAVILE

ACCIDENTAL DEATH

St. Thomas, Ont., May 9.—Martine McLachlin, a prominent young St. Thomas lawyer, was accidentally killed yesterday afternoon when a gun he was cleaning accidentally discharged.

TIMES CROSS-WORD PUZZLE

After trying out the notes in this unusual crossword puzzle, you may be ready to do justice to at least one good-sized portion of 11 vertical.

Cross-word Puzzle 02139

HOW TO SOLVE THE CROSSWORD PUZZLE

Every number in the form represents the beginning of a word, reading either horizontally or vertically. If there is a black square to the left of the number, the word is horizontal; if above it, the word is vertical. The same number may be used to begin both a horizontal and a vertical. The definitions for the correct words to fill the form are found below, with numbers corresponding to those on the form. Run through the definitions till you find one that you recognize, and furnish several cross-clues to the words linking with it at right angles. Continue in this manner till the form is completely filled. If you have solved it a puzzle correctly it should read both horizontally and vertically with words corresponding to the definitions. The correct solution of to-day's puzzle will be printed in the next issue of The Times.

FIGHTS FIRES BUT ANSWERS NO ALARMS

Five Men in Underwriters' Laboratory in Chicago Test Many Devices

Chicago, May 9.—Five fire-fighters who never ride an engine in its wild dash through the streets, never climb a ladder, and never get their pictures in the papers, spend their days clad in oilskins and rubber boots in the Underwriters' Laboratory here in the grim task of combating the fire demon.

Scientifically and deliberately they go about their tasks, always in the moist atmosphere of a hydraulic laboratory.

They are three engineers and two mechanics, who test everything in connection with the fire-fighting equipment. Inventions and improvements are sent to them each day in the night against the great destroyer.

Valves and tanks fill a huge room, 450 valves of all sizes from tiny ones with a bore of one-thirty-second of an inch to great pieces of mechanism which require the lifting power of a 24,000-pound traveling crane to swing into place.

A fifty-foot straight length of rubber-lined fire hose throwing a stream through the standard one and one-eighth inch nozzle loses thirteen pounds of pressure, they say, and a hose which requires the lifting power of a 24,000-pound traveling crane to swing into place.

Much of their work is done on a platform built atop a 25,000-gallon concrete cistern and two 4,000-gallon pressure tanks.

SPRINKLER SYSTEMS

At present they are working on pipe valves controlling the flow to sprinkler heads. One giant valve is so arranged that the air pressure above it will hold back water with a pressure six times greater, yet the moment one tiny sprinkler head is melted it releases a flow of water that will send a spray over the area immediately about the fused sprinkler head.

That system is designed for use in buildings in which pipes of light-gauge galvanized iron are so arranged that, while the pipes are filled with water, pressure is held back until a fused sprinkler head automatically warns that pressure is needed to throw a spray on a burning area, when, also automatically, an increased pressure is admitted to the pipes.

In each instance the fusing of a sprinkler head sends two electrical contacts to a gong in the building and the other to a telegraph station, which in turn sounds a city fire alarm. Each of the sprinkler heads is wired electrically and the fusing, at a very low temperature, permits a telegraphic contact which sounds the alarm.

DEMAND FOR SADDLE HORSES NOW IN U.S.

Washington, May 9.—While the number of riding horses bred in recent years has decreased enormously, U.S. army officers say the kind and type of this day's fare superior in quality and breeding to any in the past.

Not only is there a demand in the army for good riding horses, many officers of the Quartermaster Corps, but horseback riding, polo and hunting are greatly on the increase throughout the United States, and a good, well-bred riding horse is bringing a better price than at any previous time in the history of the country.

Declaring breeders appreciate this, the officers point to the numerous applications being made to the Quartermaster-General's office for remount sties, more than 1,500 having been received. To encourage the breeding of light horses, the Quartermaster-General is distributing stallions of thoroughbred, Arab and Morgan breeds. The thoroughbred, or running horse, the officers say, is by far the most popular sire for the production of riding horses.

BOARDS MAKE SELECTIONS

In the army's quest for appropriate horses the entire country has been covered by army purchasing boards, and while the purchasing programme is now up to schedule, Major C. L. Scott of the remount service, said "the fact that horses of proper type were so hard to locate shows the neglect of breeding in the past and the scarcity of good sires of riding type at the present."

During the World War, and for a dozen years previous, breeding of light horses, particularly riding horses, decreased greatly, in many states the drop being from seventy-five to ninety per cent. The breeder has now discovered that it only pays to raise a high-class, well-bred

VICKSBURG TO HONOR PIONEER SETTLERS

Vicksburg, Miss., May 9.—The story of Vicksburg's hundred years and of the first American to settle here, the Rev. Newitt Vick, a Methodist minister from Virginia, will be told in a series of historical pageants as part of the celebration May 14 and 15 of the city's centennial. Vicksburg was incorporated January 23, 1825, but it was decided to wait until Spring to celebrate the centennial.

One of the pageants will portray the early struggles of Spanish and French conquerors, another the fighting between Union and Confederate armies, while others will show the country along the Mississippi River under four flags, French, Spanish, Confederate and United States.

There was once an old Spanish fortress here called Fort Nogales, but it was almost forgotten when, about the year 1815, Mr. Vick and his family took possession of several hundred acres along the river and the minister plotted it off, saying he was "laying the foundations of a great

CULTURE A THING OF PAST, DECLARES DR. GEORG BRANDES

Berlin, May 9.—Georg Brandes, the Danish critic, lecturing in Berlin on "Europe as it is To-day," has shown that despite his eighty-four years his mental keenness and elasticity are surprising.

Brandes is not infatuated with the Europe of to-day. Culture, he believes, is a thing of the past. In 1913, he said, the fires of the impending world conflagration were glimmering everywhere in Europe and quite as much in Paris as elsewhere. When he made this declaration there was a dead silence in the crowded hall. He continued to speak

LITTLE GIRL KILLED

Edmonton, May 9.—Violet, two-year-old daughter of Mr. and Mrs. William Forrester of Innesfall, was killed by an automobile when playing in the road in front of her home. The driver did not stop, and provincial police are trying to trace the car.

NOT EVERY METEOR FEELS IT'S OBLIGED TO FALL IN KANSAS

McPherson, Kan., May 9.—Kansas has attained a reputation beyond this planet as a landing field for stray meteorites, but that reputation would not stand the test of science, declared Prof. H. H. Nininger of McPherson College, past president of the Kansas Academy of Science, in an address on the subject of meteorites.

SCOTLAND TURNS TO FOX FARMING

Five Separate Companies Engaged in Breeding Silvers

Fox farming, which has made such great strides on Vancouver Island in the last year, is now developing into an industry in Scotland, according to a report received by the Victoria Chamber of Commerce. In Scotland there are known to be five separate companies or individuals engaged in breeding silver foxes, all of whom have imported their stock from Prince Edward Island. The latest shipment, so far as known, was one of thirty-six foxes from Canada, landed at Glasgow in December last and consigned to an up-to-date and fully equipped ranch on an estate in East Lothian. This consignment constituted the initial breeding stock for the company concerned, which is the sixth of the kind which has been organized in Great Britain with the object of rearing these valuable animals in captivity. Owing to the large demand for silver fox pelts—one of the most beautiful of all furs—great hopes are entertained that the success which has been achieved by breeders in Canada will also attend the operations of those who are introducing the industry into this country.

TO PLAN FOR U.S. 1932 CELEBRATION

Washington, May 9.—The people of the United States probably will be given a free voice as to the character of the celebration which is to commemorate in 1932 the two-hundredth anniversary of the birth of George Washington. The celebration will be held here in the city which Washington founded, and will be under the direction of a commission created by the last Congress and of which President Coolidge is the ex-officio chairman. Some suggestions as to the nature of the event now are being received. Sponsors of the celebration hope it will be more spiritual than materialistic, stressing the character, achievements and institutions of the Father of his Country. Charles W. Elliot, president emeritus of Harvard University, has expressed the view that the celebration should be directed in large measure to the rising generation, not to the passing or the past, and that its aim should be to increase the number of Washington's disciples and followers in and for the struggles of the future.

THE COMMISSION
Besides the President of the United States the members of the commission are the President of the Senate and Speaker of the House, as ex-officio commissioners; Senators Fess, Ohio, vice-chairman, and Spencer, Missouri, Republican; Glass, Virginia, and Bagard, Delaware, Democrats; Representatives Hawley, Oregon, Tison, Connecticut, Republican; Garner, Texas, and Eyrine, Tennessee, Democrats. The commissioners appointed by the President are: Mrs. Anthony Wayne Cook of Pennsylvania, president-general of the Daughters of the American Revolution; Mrs. Mary Sherman of Colorado, president-general of the Federation of Women's Clubs; Henry Ford of Michigan; Hanford MacNider of Iowa, former national commander of the American Legion; C. Bascom Simpson, former secretary to President Coolidge; A. Lawrence Lowell, president of Harvard; Edgar B. Piper, Portland, Ore., publisher; Frank A. Munsey, New York, publisher, and John Hays Hammond of Washington, engineer.

Dean Inge Speaks of Divorce Problem

Toronto, May 9.—A special dispatch from "New York to The Toronto Globe says: "The Very Rev. William Ralph Inge, the 'gloomy dean,' of St. Paul's Cathedral, London, advanced what he said was his personal solution of the divorce problem yesterday at a farewell luncheon given him by The Forum Magazine at the Century Club of New York. "I have sometimes thought," he said, "that the best thing would be to hang the guilty parties, so the innocent survivors might marry again without breaking any laws of the church." The dean's suggestion was advanced in response to a question as to what he thought the attitude of the church should be, in view of the increasing frequency of divorce. "The Church of England has a very decided opinion," the dean declared. "There is hardly a clergyman who would marry the guilty parties in a divorce, and in many cases they would be refused communion. There is a difference of opinion about innocent persons who would be admitted to the sacraments, but guilty couples are ostracized."

TALK FROM MOVING TRAIN NOW—Dr. Ehrich Huth of Berlin, Germany, has made it possible with his new invention to talk over the telephone from one moving train to another or to a stationary phone. Wires strung on the roof of the train send and receive flashes from wires strung along the route. Photo shows how the wires are strung on the train, and inset (left) shows man on train telephoning his wife, and inset (right), the train operator.

INTERNATIONAL PAPER EXPANDS IN CANADA

New York, May 9. (By Canadian Press)—The Wall Street Journal carries the following in its news columns: "Annual report of International Paper Co., for the year ended December 31, last, which indicated net equivalent to \$5.16 a share on the 200,000 common shares, does not give an accurate picture of the earnings result for 1924. The management saw fit—and properly—to set up a reserve of \$1,000,000 for contingencies, which was included in the item of \$1,158,000 for taxes and contingencies. This reserve was in keeping with the conservative methods of the management; whether necessary for its use will vary, only the future can tell. If for purposes of analysis this charge off, which is largely a bookkeeping matter, is applied to the common stock, there will be revealed an earning power of more than \$10 a share.

"The contingencies against which the \$1,000,000 was set up as a reserve, were the possibility of a decline in wood pulp prices, any vicissitudes that might be incurred by International's expansion in Canada becomes actually effective. "Comparison of operating revenues for the last two years furnishes a clue to the real earnings. In 1924, although International Paper met with very real difficulties in the way of low water and consequent curtailment of operations, and lower prices of newsprint, operating revenues were \$7,815,594, against \$8,074,577 in 1923. This showing was better than would ordinarily be expected in view of the conditions with which the company had to contend, and was undoubtedly the result of more economical operations. "Contracts have been let for the final enlargement of the Three Rivers mill, which will give it a capacity of 700 tons of newsprint daily, and makes it the largest paper mill in the world. Present capacity is about 330 tons daily.

"Plans are under consideration by the company for the electric development of two of its water powers in the United States. One of its paper mills is being surveyed with the idea of transition to the production of finer papers. "At the end of 1924, International Paper had bank loans of around \$7,000,000. Proceeds from the sale of \$15,587,000 new six per cent. bonds provided cash to wipe these out, and the company now has net working capital of over \$20,000,000. Total current assets approximate \$35,500,000, and current liabilities \$4,500,000."

New Treatment For Stomach Ills

Toronto, May 9.—What is expected to be an important advance in the treatment of chronic gastric and duodenal ulcers of the stomach was described by Dr. D. H. Arnot of London, Ont., before the Ontario Medical Association to-day. Dr. Arnot reported that for ten years he had been experimenting on a treatment of the stomach, with success, instead of the hitherto recognized cure by surgery. Dr. Arnot's treatment, in short, is a diet and six months' medical treatment, which enables the stomach to perform a function akin to healing itself. The theory at the base of Dr. Arnot's treatment is that the motility and digestive juices of the stomach retard the healing of an ulcer, which needs rest. He puts the stomach as it were, in splints to direct and assist the natural effort which the stomach itself makes to heal its lesion.

Experts in Housing Aid Middle Classes

New York, May 9.—The need of proper housing for people of the middle class for intellectual workers, will come up for serious study this summer in Paris. The subject will be given primary consideration at the International Congress of Building and Public Works, to be held in the French capital June 15-19, according to Willard Wood Messenger of New York, who recently inaugurated a movement for better housing for intellectual workers in the United States following his investigations abroad. "The conference will be under the patronage of the French premier and other high officials, and participants will be entertained by the President of the Republic," says Mr. Messenger. "Detailed comparisons will be made of the different methods of different nations to combat the housing shortage. All new means and methods to reduce costs of building will be considered, and a practical constructive programme fostered."

WONG IN COURT ON TUESDAY NEXT

Vancouver, May 9.—One day's work of the Point Grey police court in the preliminary inquiry into the murder charge against Wong Foon Sing arising from the death of

Janet Smith resulted in two achievements. First, the court was provided with a complete description of the prisoner at 3851 Osler Avenue, where the Scottish nursemaid met her death on July 28 last; and, second, arrangements were made for the translation of all the evidence into Chinese for

His aching back relieved

"The Love that Never Dies"

VICTORIA, B.C., SATURDAY, MAY 9, 1925

The Whole Continent Is Interested In Victoria's Three Exceptionally Fine Harbors

Victoria can show this picture of its Water Front in Competition with that of any in the World

As City Becomes More Widely Known Through Tourist Propaganda Attention Is Directed To Its Port Facilities

Over 10,000 Ocean and Coastal Vessels Cleared Last Year. Ogden Point Docks Has Berthage for Eight Ocean-going Vessels; Landlocked Esquimalt Harbor Has Two Drydocks; Inner Harbor Offers Safe Anchorage for Coastwise Craft.

To meet the demand of newspapers and magazines throughout Canada and the United States for information dealing with Victoria from an industrial viewpoint, complete data regarding its three great harbors have been prepared by Frank Giolma, publicity writer of the Victoria and Island Publicity Bureau. The requests for industrial news of Victoria and vicinity follow the flood of tourist articles and literature which have been sent out by the Bureau. These articles have whetted the appetite of the continent for information on Victoria. Having established Victoria and Vancouver Island as a tourist centre it is a satisfactory development that there is now a steady demand for industrial articles. Two years ago Mr. Giolma believes an industrial article on Victoria would have been refused. Now interest has been aroused to such an extent in Victoria that the demand for industrial news is as great as the demand for tourists' information.

in his article. Still, the number of vessels arriving and clearing, both ocean and coastal, last year was 10,674—the tonnage being 10,999,978. While these figures place Victoria as one of the largest ports in Canada, the number of vessels is small when one considers the harbor facilities available.

THREE EXCELLENT HARBORS

In talking of Victoria as a port one should really use the plural, for Victoria has no less than three excellent harbors—the Outer Wharf, comprising Rithet's wharves with an area of sixteen acres, and the Canadian National Docks at Ogden Point (these covering some thirty acres); the Inner Harbor, and the famous Esquimalt Harbor, 940 acres in extent. The Outer Harbor and Esquimalt are used chiefly by

their own steam. When the ships of the Special British Empire Squadron visited Victoria, both the Hood and Repulse not only entered the Ogden Point Docks under their own steam, but tied up alongside each other in the same basin.

PROTECTED BY SOLID GRANITE

The Ogden Point Docks have two piers protected by a solid granite-block breakwater 2,750 feet in length. One side of the pier nearest the breakwater is 1,000 feet in length. The other side, and the sides of the adjoining piers, are each 800 feet. The width of each pier is 250 feet, separated by a minimum depth of 36 feet at low tide. These piers have a warehouse space of 180,000 square feet, fresh-water hose connections every 20 feet, good passenger accommodation and conveniences, and all berths on Pier A are fitted with floating fender logs and the corners of both piers with spring buffers. As both piers are constructed of solid stone and cement they will carry any weight. There is ample berthage for eight ocean-going vessels. Besides other merchandise, over 12,000,000 feet of lumber was shipped from the Ogden Point Docks during the last twelve months and the Canadian National Railroads, who manage them for the Canadian Government, now have under advisement the organization there of a lumber assembly plant for the whole Island, the lumber resources of which are over 120 billion feet, and the erection of grain elevators, these latter to facilitate the shipping of Canadian wheat via the Pacific Coast and Panama to Europe.

THREE WHARVES OF OUTER HARBOR

Rithet's Wharf, being the other section of Victoria's Outer Harbor, comprises three wharves in from 27 to 33 feet of water. No. 1 Wharf has a length of 688 feet by 100 feet wide and a shed of 541 feet by 60 feet, with a carrying capacity of 1,600 tons. At the ends of the sheds are open spaces for rough freight of 58,000 feet and 10,500 feet. Five slips give ample facilities for handling cargo through the ship's ports. No. 2 Wharf, which is 1,050 feet in length by 125 feet in width, with shed 818 feet in length, varying in width from 59 feet to 90 feet; floor area, 68,090; carrying capacity, 13,000 tons; open space at ends of shed, 21,500, and 18,000 for rough freight; depth of water, 31 feet. Space between wharves, 190 feet. There is also berthage

of 300 feet frontage, where small vessels can be made fast in 25 feet of water, and two sheds respectively of 20,100, storing about 4,000 tons, and 8,000 feet carrying about 1,800 tons.

LUMBER AND SHINGLE MILLS

The Inner Harbor is used chiefly by coastwise vessels, but as many of the great lumber and shingle mills are built on its waterfront, many sailing ships and steamers engaged in this business enter it. Also on its northwest shores are 80 acres of industrial sites with railroad and trackage facilities and a waterfront of 3,500 feet with a depth of 20 feet. These sites are owned by the Provincial Government and such as are not at present being utilized can be leased at very reasonable rates.

Esquimalt Harbor is naturally land-locked, has an excellent and easy entrance, an area of 940 acres and a depth of from 6 to 8 fathoms. It was originally used as the Pacific station of the British Fleet, and is to-day the headquarters on the Pacific of the Canadian Navy. Besides Yarrow's shipbuilding and repair plant, there are two drydocks at Esquimalt. The length of the older dock to gate is 450 feet at keel blocks; 480 feet at curb; width at gates, 63 feet; depth of water, 27 to 29 feet.

NEW DRYDOCK NEARING COMPLETION

The new drydock which will be completed this Summer is the second largest on the American Continent, being only 29 feet shorter than the Commonwealth at Boston. The giant basin, hewn out of the living rock, will cost approximately \$6,000,000, and measures 1,150 feet long, 149 feet in width at the top, 126 feet at the bottom; its depth is 49 feet 6 inches, with 40 feet of water on sills at high water. The dock will take any ship afloat, or, if desired, can be divided into two sections of 400 feet and 750 feet respectively. It is lined with concrete, with granite keel and bilge block seats, and is equipped with four caisson berths of granite. The dock will be operate electrically. There will be three 54-inch main pumps and two 22-inch auxiliary pumps, which will empty the dock in four hours. The water will be pumped out into the sea through a 600-foot tunnel measuring 9 feet by 14 feet. When filled, the dock will contain 42,000,000 gallons of water.

TARIFF FOR DRYDOCK

The use of the present drydock is subject to the following tariff:

into Victoria or vice versa, 50 cents per foot draft and 1/2 cent per net register ton to a maximum of 3,500 tons.

LOWER PORT CHARGES OF ANY SEAPORT

Victoria claims to have the lowest port charges of any sea-

Yarrow's Plant at Esquimalt Harbor

Gross tonnage of vessel	For the First Day of Docking		For Each Undocking Day

8,999 to 9,500 tons	750.00	200.00	750.00	200.00
Minimum charge	\$100 per day.		\$100 per day.	

All vessels over 440 feet in length, requiring keel blocks raised, will be charged for extra pumping \$150.00.

When a vessel is docked solely for painting and scraping, or change of or repair to propeller, tail shafts and liners, rudder pintals or bushes, the ordinary tariff will be suspended and the rate shall be \$200 for the first day of docking and ten cents per ton per day for lay days, the time not to exceed four days in all.

No charge for Sundays and holidays unless work is done on the vessel.

There are first class facilities for outfitting and repairing ships and bunkering either fuel or oil while harbor charges are the lowest on the Pacific Coast.

Pilotage is optional. To or from William Head, Royal Roads or Brutchie Ledge

port on the Coast. And, finally, to show that Victoria is at last beginning to utilize her wonderful natural advantages as a port, it will only be necessary to add that the B.C. Salvage Company has this year had built a specially constructed salvage steamer, the "Salvage King," at a cost of \$500,000. This vessel has a steaming radius of 10,000 miles and is equipped with all the most modern appliances necessary for successful salvage work. She is recognized as the premier vessel of her kind in the world to-day.

The three harbors referred to are only those of Greater Victoria. While the southern portion of Vancouver Island is unusually fortunate in its fine water frontage the rest of the Island has port facilities of which it can justly boast. Each year sees improvements at some point on the Island in the way of new docks and wharves. A great system of ferry services is rapidly being expanded to meet the demand for tourists coming to Vancouver Island with their cars and new wharves are necessary to give them berthage.

This Great Drydock is Nearing Completion—It is the Largest in Canada

Great changes have taken place in the movements of shipping on the Pacific Coast. In the past San Francisco was the principal port, but to-day by far the greater movement of shipping is in the Straits of Juan de Fuca en route to Seattle and other Washington ports and Vancouver City and

British Columbia generally. Perhaps because she has been more interested in the past in other commercial and industrial pursuits than in purely maritime matters, Victoria does not rank quite so highly as a port as her natural position and advantages should place her, Mr. Giolma says

ocean-going ships; the Inner Harbor by coastwise vessels. Besides these harbors safe, sheltered anchorage can be found in the Royal Roads off the entrance to Esquimalt Harbor. The Outer Docks are able to berth any ship afloat and all vessels can enter and leave under

Some Idea of the Accommodation of the Outer Docks can be Gleaned from this—Two Great Battleships Docked and Room to Spare

WITH LAWRENCE IN ARABIA

By **LOWELL THOMAS**

XI Feisal Becomes King in Bagdad

DURING a lull in the long siege in the council-chambers at Paris, Lawrence had one more adventure—the last, his diaries and the preliminary check of the peace conference had been completed, Lawrence found himself in need of his notes and papers.

He heard that ten British machines—giant Handley-Page planes, with Rolls-Royce engines, that had seen service in many a night raid over Germany—were leaving for Egypt to blaze a new air-route from London to Cairo. Lawrence promptly arranged to accompany them. But the machines were old and nearly worn out, and the pilots were daredevil chaps who literally ran their planes to pieces. In fact, some of the pilots had never flown a Handley-Page, and some of their mechanics had never even worked on a Rolls-Royce engine. On the way from Cologne to Lyons five disastrous landings were made. Nearly all the planes had to be rebuilt several times during the journey to Egypt.

The Air Ministry in London had vaguely directed the squadron to an aerodrome at Rome. When the pilots reached the Eternal City, they flew back and forth across the Tiber, over St. Peter's, the Colosseum, the Forum, and up and down the Appian Way, but nowhere on any of the Seven Hills could they spot a landing-ground. Finally the pilot of Lawrence's plane saw what he thought might be an aerodrome. But when he swooped down it turned out to be a stone-quarry. Just before reaching the quarry he saw his mistake, and switched on the engine, and tried to ascend again. Unluckily he was unable to get up sufficiently, and the plane, which was along the ground, then bolted over the edge of the quarry, and crashed down into a tree-top.

Lawrence was seated in the gun-pit. The occupants had a vague impression of a tree coming toward them at amazing speed. Suddenly there was a noise like the crack of a machine-gun. In the flash of a second the great plane toppled over on its nose and right wing and splintered into match-wood. Both pilots were killed outright. The two mechanics who were seated with Lawrence in the rear of the machine-gunner's compartment, were pitched out on their heads. One suffered concussion of the brain; the other was merely stunned. As soon as the second recovered consciousness he began to dig Lawrence out of the debris's shroud, collar-bone, and three ribs were broken. In the excavating process, which took ten minutes, the mechanic kept sputtering excitedly that the plane might catch fire any minute. Lawrence replied, "Well, if it does, when I arrive in the other world I may find it chilly."

In spite of the accident, however, Lawrence jumped into another plane a few days later and continued his flight to Egypt. Our strangest sensation, he afterward told me in Paris, "was breakfasting on the Isle of Crete and dining the same day in Cairo seven hundred miles away." After he had gathered up his papers, and still somewhat shaken up as a result of his aerial interlude, he returned to the seats of the mighty in Paris.

At the conclusion of the peace conference, Lawrence and staff visited London and then made a tour of the British Isles. Colonel Lawrence took delight in showing his Arab friends around. Everything was new to several of the sheikhs who had just arrived from Arabia, and one would have expected them to be tremendously impressed by the subways, the automobiles, and the thousand and one wonders of the capital of the British Empire. But these things merely excited a supercilious, sheik-like smile. They were too proud ever to show any signs of surprise, except on one occasion in their room at the Ritz. They were dumfounded when they turned on the water-faucets and found that one ran hot and the other cold. In the holy Koran, they said, they had been told of the fountains of paradise, which flow with milk or with honey at will; but they had never

heard of earthly fountains such as these at the Ritz. After alternating them a bit and making quite sure that they themselves were not dreaming, they themselves wanted to take some of those magic faucets back to Arabia so that they could carry them in their camel-bags to supply them with hot and cold water while trekking across the desert!

On one occasion Emir Feisal visited Glasgow and was entertained at a great civic banquet. He had been so busy seeing the sights along the Clyde that when it came time to respond to the toast in his honor he was unprepared. The only other person present who could understand Arabic was Lord Balfour, who sat beside him to act as his interpreter; and Emir Feisal leaned over and whispered in his ear. "I haven't a thing to say, so I am going to repeat the passage from the Koran on the cow. When you get up to interpret you can tell them anything you like!" It happens that the most sonorous and euphonious parts of the Koran, and the business-men of Glasgow were tremendously impressed by the marvelous flow of eloquence that rolled Niagara from the lips of the Oriental monarch, never dreaming that he was simply reading off the Prophet Mohammed's dissertation on the cow.

Shortly before he returned to the Near East the Emir was entertained at a banquet in London, and Lord Balfour during the course of a conversation tried to find out what Emir Feisal thought of the British Government. He succeeded. "It reminds me of a caravan in the desert," replied the George Washington of Arabia. "If you take a caravan from afar off, when you are approaching it from the rear, it looks like one camel. But, riding on, you see that camel tied to the tail of the next, and so on until you come to the head of the caravan, where you find it the whole string of camels." Lord Balfour wondered to just whom the Emir was referring!

FEISAL WELCOMED TO SYRIA

When Feisal returned to Syria the people again welcomed him as their liberator, and after a few weeks they proclaimed him King of Syria, with Damascus as his capital. But this new state was short-lived, for without foreign co-operation to help him finance his government his position soon became impossible. After using up his own private fortune in a vain attempt to develop order out of chaos, he was obliged to leave Damascus, and the French at once arbitrarily occupied the whole of Syria. For the moment it seemed as though Feisal's hopes were shattered. But Lawrence and the other British leaders who had been associated with the Arabian Revolution still had another card to play.

All through these turbulent days Emir Feisal's father had continued to strengthen his position in the Hedjaz. Galloping out of Mecca in the gorgeous Arabian twilight, a slight, lean figure was often seen by the Bedouins of the desert; it was Hussein, their King, on a night journey to Jeddah, forty miles away. No music preceded him, nor stately pageantry; he rides alone and a muleback.

Simple, even severe in his tastes, Hussein is a rigid upholder of the Volstead clauses in Al Qu'ran. After a successful train-robbing expedition, two of Lawrence's Arab officers went to Mecca on a week's leave, taking along something with which to celebrate. This breach of piety reached the ears of the king, who had the officers beaten in public. After that no one chose Mecca as the Arabian Montreux.

Although he is only five feet two inches in height, his regal bearing does not belie his ancient lineage and his high ambition. At sixty he is still a man of exceptional vigor, although that is not common in men of his age in the Southern Arabian Desert.

His hands, delicate and beautiful as a musician's, impress one with a sense of power and finesse; whether or no they will be able to control the two hundred and fifty millions of the great brotherhood of Islam in one of the fascinating problems of the future.

But the real hope for the future of Arabia is centered in his son, King Feisal, who realizes that the Arabs need European and American assistance in educational and industrial fields, and Feisal is eager to see accurate changes that may revolutionize Arabia.

On the other hand, King Hussein is desirous that both Mecca and Medina should remain isolated from the world, during his lifetime, at least. "I am an old man," says he, "but I am happy in the things as they are. I realize that changes must come." It is possible that after the king has ruled Mecca for a few more years he may retire and allow Feisal, Abdullah, and Ali to attempt to work out their great plan for a United States of Arabia. In fact, the event even Mecca may be opened up to the Christian and unbeliever, for

may take me several years to find myself. In the meantime I hope to discover a secluded corner somewhere in England, far from war, politics, and diplomacy, where I can read a bit of Greek without being interrupted."

His attitude regarding return to the Near East seemed to me another indication of his far-sightedness. During their war of liberation, the Ara daboefah dilwo amopot the Arabs had followed Lawrence partly because of his own personality but mainly because he offered them a substitute for Turkish oppression. He well knew that as soon as the excitement of war disappeared his power over them would diminish. What would have happened if he had returned to the Near East? What would have been the outcome if he had temporarily gained a position of political authority equivalent to the military position he had attained in Arabia? It is conceivable

that he had never dreamed might occur, because our material had been obtained solely for America. Naturally one of the first things I endeavored to do upon arrival in England was to find Colonel Lawrence. I wanted to show him what Auda Abu Tayi and the rest of his Arab knights looked like on the screen. Both at the War Office and the Foreign Office no one seemed to know what had become of him. He had apparently vanished into the blue just as he used to do in the desert. But a fortnight later I received a letter from him. It was addressed to My dear Lowell Thomas:

"I saw your show last night. And thank God the lights were out!"

T. E. Lawrence.

I discovered that this man, whom all London would have been delighted to honor, was living inconspicuously in a modest furnished room in a side street over the Dover tube-station. Not even his landlady had any suspicion of his identity. But he could not long keep it a secret.

A few days later he came around and had tea with us. When he discovered that I was married and that my wife was with me, he seemed very much embarrassed and blushed all over. He implored me to return to America and to stop telling the public about his exploits. He said that if he stayed in London any longer he would not be worth living for him, because as a result of my production at Covent Garden he was being hounded night and day by autograph hounds, reporters, magazine-editors, book-publishers, and representatives of the gentler sex whom he feared more than a Turkish army corps. He said that as a result of the two weeks I had been speaking in London he had received some twenty-eight proposals of marriage, and they were arriving on every mail, most of them via Oxford.

Despite Lawrence's desire to live in retirement, with only his books for his companions, his countrymen would not listen to it. When Winston Churchill took up the cabinet post of colonial secretary, one of the first things he did was to force Law-

rence him partly because of his personal prowess, his ability to outdo them at the things in which they excel, such as camel-riding and shooting, and also because of his courage and modesty. He usually led them in battle, and under fire he was courageous to a fault. Wounded a number of times, his injuries, fortunately, were never serious enough to keep him out of action. Often he was too far from a base to get medical attention, so that his wounds were obliged to heal themselves. The Arabs became devoted to him because he gained them victories and then tactfully gave all the credit to his companions.

That he was a Christian they considered unfortunate, and they decided that it was an accident and he some mysterious way "the will of Allah," but some of them regarded him as one sent from heaven by their Prophet to help free them from the Turks.

West and East fraternized politely, if rather inharmoniously, in the more accessible towns of Arabia and Syria, for the West has money to spend and the East is avaricious. But away in the desert and wild places it is different. The nomads, whose ancestors have roamed the country for four thousand years and more, resist the inquisitive eyes and hungry note-books of foreigners who are not proved friends. They still regard stray Europeans with hostile suspicion and as fair subjects for loot. But Lawrence's minute knowledge of their intricate customs, and his apparent complete mastery of the Koran and complex Mohammedan law caused them to regard him with a tolerance and respect which are exceedingly rare among the fanatical peoples of the Near East. And of course this knowledge of their customs and laws was of incalculable importance in enabling him to settle disputes between antagonistic factions.

To gain his end it was necessary for Lawrence to be a consummate actor. He was obliged completely to submerge his European mode of living, even at the risk of winning the

Tommy Atkins and his "officers" are world famous. Lawrence rarely saluted, and when he did it was simply with a wave of the hand, as though he were saying, "Hullo, old man," to a pal. He rarely saluted any one senior to him, although he always made it a point to acknowledge salutes from men in the ranks. As for military titles, he abhorred them, and from general to private he was known as plain "Lawrence." Several times in the desert he told me how thoroughly he disliked the red tape of the army and said that even as the war was over he intended to go back to archaeology.

HIS PHOTOGRAPHS

Several years ago, in Calcutta, Colonel Robert Lorraine, the eminent actor-artist, said to me, "But if Lawrence is so extremely modest and shy, why does he pose for so many photographs for you?" A keen question and a natural one. And out of justice to Lawrence I think I ought to answer it, even at the expense of disclosing a professional secret. My cameraman, Mr. Chase, uses a high-speed camera. We saw considerable of Colonel Lawrence in Arabia, and although he arranged for us to get both "still" and motion pictures of Emir Feisal, Auda Abu would turn away when he saw the Tayi, and other Arab leaders, he lens pointing in his direction. We got more pictures of the back of his kuffeh than of his face. But after much strategy and after using all the artifices that I had learned as a reporter on a Chicago newspaper, where it was worth one's job to fail to bring back a photograph of the fair lady involved in the latest scandal, I finally manoeuvred Lawrence into allowing Chase to take a "sting shot" on two different occasions. Then while I kept Colonel Lawrence's attention away from Mr. Chase by keeping up a rapid fire of questions regarding our projected trip to the "lost city" of Petra, which he believed to be the primary object of our visit to Arabia, Mr. Chase hurriedly took a dozen pictures from as many different angles, and in less time than it usually requires for a

that for thirteen hundred years, since the days of Mohammed, fewer Europeans have explored Holy Arabia than have penetrated mysterious Tibet or Central Africa. The zealous Mohammedans who live around the sacred cities of Mecca and Medina prevent Christians, Jews and other non-Mohammedans from profaning holy soil, and the unbeliever who ventures into this part of Arabia is indeed lucky if he returns alive. So Lawrence's achievements seem all the more extraordinary when we remember that he admitted openly that he was a Christian. For even though he did wear the robes and accoutrements of a sheereef of Mecca, he only actually posed as an Oriental when he slipped through the Turkish lines wearing the veil of a native woman.

Of course the vast wealth which he had at his disposal, the seemingly inexhaustible supply of gold sovereigns with which he paid his army, was of vast importance. But though the Germans and Turks also tried using gold, their weakness lay in the fact that they "had no Lawrence," declares H. St. John Philby, the Arabian authority, who represented Britain in the Central Arabian Desert ruled over by the sheikhs.

Colonel Lawrence played the part of a man of mystery endowed with the ability to do everything superlatively well, outwitting the Arabs at everything from statecraft to camel-riding, and even to using delicate shadings of their own language. In fact, language seems easy for him. In addition to his mother-tongue, he speaks French, Italian, Spanish, and German, some Dutch, Norwegian, and Hindustani, is a master of ancient Latin and Greek, and can manipulate many of the Arabic dialects of the Near East.

Lawrence was exceedingly careful never to enter into competition with the Bedouins unless he was quite certain of excelling them. He also gained a reputation as a man of deeds rather than of words, which greatly impressed the desert-dwellers, who for the most part chatter as incessantly as the crows of India. When he did speak he had something of importance to say and knew whereof he spoke. He seldom made errors, and when he did he took care that they were ultimately regarded it as a success. He was an indefatigable worker even under conditions of ever-insistent hospitality, and he would work far into the night when his Arab colleagues would have slept. At night, or while trekking across the desert swaying in the camel-ranch, that he would plan his far-reaching policies of diplomacy and strategy. Small and wiry, he seemed made of steel, but the desert was left its indelible mark on him in more ways than one, for one of his brothers confided to me that ever since his return from Arabia he has suffered from severe heart-strain.

Auda Abu Tayi, always sincere in his judgment of people, once said to me: "I have never seen any one with such a capacity for work, and he is one of the finest camel-riders that ever trekked across the desert." A Bedouin can pay no finer compliment. Then added Auda, "By the head of the Prophet, he seems more than a man!"

Field Marshal Viscount Allenby of Jerusalem and King Feisal of Bagdad

Colonel Lawrence and the Author

few rifles and no stores, and Lawrence has revealed the fact that he kept up the spirit of his men with the thought of material rewards to follow by filling his treasure-chest with stones and ostentatiously loading it on a camel.

Lawrence believes that Feisal has a combination of qualities admirably fitting him for the leadership of the new Arab state which may rise out of the ashes of the old Ottoman Empire. Lawrence is of the opinion that Feisal will go down in history, next to Mahomed and Saladin, as the greatest Arab who ever lived. He was and still is the soul of the Arab movement. He lives only for his ideals and for his country. His only thought for the future of Arabia, that he and his father were liberal-minded enough to take advantage of the genius and unique ability of a European unbeliever, a mere youth many years their junior, seems incredible to anyone who knows the Mohammedans of the Near East, because to the average Moslem Arab, all Christians are dogs; but King Hussein and his enlightened son even went so far as to accept their fair-haired British advisor as a fellow-Arabian prince and an honorary sheereef of Mecca, a title which had always been reserved in the past for direct descendants of the Prophet, and which had never before been awarded to any other person, either Moslem or Christian.

After the peace conference, and after Emir Feisal had returned to Damascus, Lawrence vanished. Many of his friends thought that he had returned to Arabia to resume the role of mystery man. But I doubted this, for when I had last talked to him in Paris I had asked him point-blank if he intended to go back to the East in order to help the Arabs build up their new state. His answer was most emphatically in the negative.

"I am not going to return for some years—perhaps never," he said. "It would not do for the good of the Arabs to be here. As a matter of fact, I haven't the remotest idea of what I will do. The war has so completely upset my life that it

that because of his tremendous influence over the Arabs during the war, he might at the outset have had a large following. But in a few months someone would have raised the cry, "Away with the infidel!" If he had returned to Damascus simply in the capacity of advisor to Feisal, that alone might have undermined the Emir's hold over his people. The Arabs are jealous, fickle, and suspicious, and they would have accused Feisal of being a mere puppet. If Lawrence had craved power, he might conceivably have made himself an Arabian dictator by turning Feisal into a puppet ruler, and then he would have been more remote from his mind. He had not led the Arabs to gratify his personal ambition. His sole motive was to defeat the Germans and Turks, and at the same time to help his friends the Arabs win their freedom.

While the peace conference was still in session, many people said to me that young Lawrence was the person best equipped to represent the Near East, because to the average Moslem Arab, all Christians are dogs; but King Hussein and his enlightened son even went so far as to accept their fair-haired British advisor as a fellow-Arabian prince and an honorary sheereef of Mecca, a title which had always been reserved in the past for direct descendants of the Prophet, and which had never before been awarded to any other person, either Moslem or Christian.

After the peace conference, and after Emir Feisal had returned to Damascus, Lawrence vanished. Many of his friends thought that he had returned to Arabia to resume the role of mystery man. But I doubted this, for when I had last talked to him in Paris I had asked him point-blank if he intended to go back to the East in order to help the Arabs build up their new state. His answer was most emphatically in the negative.

"I am not going to return for some years—perhaps never," he said. "It would not do for the good of the Arabs to be here. As a matter of fact, I haven't the remotest idea of what I will do. The war has so completely upset my life that it

criticism and ridicule of his own countrymen, by appearing in cities like Cairo, where East and West mingle, garbed as an Oriental. He critics scoffed and said that he did this merely to gain notoriety. But there was a far deeper reason, Lawrence knew that he was being watched constantly by sheereefs, sheikhs, and tribesmen, and he knew that they would regard it as a very great compliment to them if he went about, even among his own people, dressed in the costume of the desert.

"When in the desert he never wore anything but Arab garb, nor could he have succeeded in the amazing way that he did if he had offended the Arabs by wearing European costume. When off "in the blue" in his she-dromedary, it was not feasible for Lawrence to take a wardrobe along in his camel-bags. The speed with which he trekked obliged him to travel light. In fact, he usually carried nothing but a lump of unleavened bread, a bit of chocolate, his canteen, chlorine tablets, a toothbrush, a rifle, a revolver and ammunition, and his little volume of the satires of Aristophanes in the original.

Occasionally when he went to Cairo or to Jerusalem to make a report to General Allenby, he wore the uniform of a British officer, but even after he had attained the rank of a second lieutenant, usually without insignia of any kind, I have seen him in the streets of Cairo without a belt and with unpolished boots—negligence next to high treason in the British army! To my knowledge he was the only British officer in the war who so completely disregarded all the little niceties and military formalities for which

funny studio photographer to set up and expose two plates. Anyone familiar with the methods of newspaper photographer will appreciate the simplicity of this when you are working out of doors in good light. If you've got a fast lens and don't get stricken with buck-fever at the critical moment, you can get photographs of St. Vitus himself, I realized that Lawrence was one of the most romantic figures of the war. I knew that we had a great scoop, and I had made up my mind that we would not leave Arabia until we had the photographs we wanted. Frequently Chase snapped pictures of the colonel without his knowledge, or just at the instant that he turned and found himself facing the lens and discovered our perfidy. When two experienced hunters start out for game, one to act as decoy and the other to do the shooting, the decoy has about as much chance as the Bengal tiger who has been selected as the target for visiting royalty.

But to get back to the topic of how Lawrence succeeded in obtaining such a wonderful hold over the Arabs by dressing like them and mastering the smallest details of their daily life, by his courage, his modesty, his physical powers and his mature wisdom, there can hardly be any question that the way in which this youth gained the confidence, not only of the more cosmopolitan descendants of the Prophet who rule over the cities of Holy Arabia, but also of the Bedouin tribes of the desert, will be regarded by historians of the future as one of the most amazing personal achievements of this age.

The phenomenal character of his accomplishment can be more accurately appraised if we keep in mind

SINGE 'EM!

Bingham—Women are certainly funny! My wife thought a shaving mirror was the only utensil I needed in order to shave.

Berham—Where did she get that idea?

Bingham—Oh, she thought it would be something like a burning glass!

PAINS ACROSS THE BACK

Relieved by Lydia E. Pinkham's Vegetable Compound

Mitchell, Ontario.—"I have taken your medicine for a number of years. I do not take it steady all the time, but I am never without it. I always keep it in the house. I took it first for pains in the abdomen and bearing-down pains, headaches and pains across the back. I have my home to look after and many a day I could not get up at all. I saw the advertisement in the paper about Lydia E. Pinkham's Vegetable Compound, and Mrs. John Miller told me about it, too. Every time I take it, it makes me feel better and I always recommend it to my friends. I am willing to answer letters from women asking about this medicine and you may use this letter as a testimonial."—Mrs. F. J. WASSMANN, Mitchell, Ontario.

The merit of Lydia E. Pinkham's Vegetable Compound is told by women to each other. Many women know by experience what this medicine will do and they are anxious for others to know. Such testimony should cause any woman suffering from the troubles so common to bear sex to give this well-known medicine a fair trial.

Do you know that in a recent canvass among women users of the Vegetable Compound over 230,000 replies were received. To the question, "Have you reason to bear sex to give this medicine?" 98 per cent. replied "Yes." This means 98 out of every 100 women are in better health because they have given this medicine a fair trial.

WOMEN'S CLUB ORGANIZATIONS

SITE ON MALAHAT CHOSEN FOR SOLARIUM FOR KIDDIES

Committee Appeals for \$25,000 to Buy Site and Erect Institution; History of Movement

In view of the appeal which is being launched to raise \$25,000 for the purchase of a suitable site on Vancouver Island and the erection of a solarium for the treatment of crippled children of British Columbia, a history of the movement will be of timely interest.

A MOTHER'S PLEA

In 1922 a mother on Hornby Island, B.C., wrote to the Government Secretary of the British Columbia Women's Institutes and asked for help to obtain treatment for her crippled child. The child was sent to the Vancouver General Hospital under the care of Dr. McTavish. The Central Park Women's Institute of Vancouver at a meeting voted the sum of \$25 towards the personal expenses of the child. From this small beginning a movement grew among the B.C. Women's Institute to provide funds for the treatment of any crippled child in cases where parents were unable to bear the necessary expenses.

This movement led to the formation of a daughter organization of the B.C. Women's Institutes, which was called "The Women's Institutes Hospital Association for Crippled Children." The ultimate object aimed at by this organization was the establishment in Vancouver of a Children's Hospital.

CLIMATE SUITABLE

In February, 1925, at the second annual meeting of the Women's Institutes Hospital Association it was proposed that, in addition to the establishment of this hospital in Vancouver, a committee should be formed on Vancouver Island to build and equip a country home for the double purpose of providing treatment for the prevention of illness in delicate children and the prolonged treatment of crippled children.

It was realized that in no other part of Western Canada could a more suitable climate be found in which to carry out the treatment of such cases on the lines now clearly and scientifically defined by the work of Dr. Rollier at Leysin in Switzerland and Sir Henry Gauvain at Alton and Hayling Island in England, as well as at many other institutions in Europe and America. The hospital when built in Vancouver and the home on Vancouver Island would thus form a complete unit of service for the crippled children of Western Canada.

INFLUENTIAL COMMITTEE

An influential committee has been formed on Vancouver Island to carry out this work. Mrs. W. Nichol has graciously consented to become a patroness. His Honor the Lieutenant-Governor and the Hon. E. D. Barrow, Minister of Agriculture, to be patrons. The personnel of the committee follows: Mrs. W. Curtis Sampson, chairman of committee; Mrs. A. Booth, Mrs. W. Peden, Miss Crease, Mrs. W. Grieve, Mrs. Moss, Mrs. A. Taylor, Mrs. MacLachlan, Sir R. Lake, K.C., M.G., J. P. Babcock, J. W. Spencer, H. Goulding Wilson, C. Williams, Dr. H. E. Young, Dr. Russell Robertson, Dr. Irene Bastow Hudson and Dr. Wace.

Subscriptions and donations may be sent to the honorary treasurer, Mrs. W. Peden, box 984, Victoria, or to Dr. C. Wace, box 1244, Victoria.

NOT TO OVERLAP

This home on Vancouver Island for crippled children will in no sense overlap or duplicate the work of existing institutions. It will not be a hospital for the treatment of acute illness and will not be built or equipped as such, but it will provide ideal conditions for the prolonged treatment of delicate or crippled children after the acute stage of illness or operation is past. The modern treatment of tubercular disease and physical deformities in children from whatsoever cause arising, is based on a realization of the value of sunlight and fresh air combined with the scientific use of methods of physiotherapy, splints and other appliances with patient re-education of the injured and wasted muscles.

This line of treatment requires time, more time than can be provided in an active treatment hospital, and carries with it the need for a system of education during the time treatment is going on.

FOR PARALYSIS AND DEFORMITY

The British Medical Journal, after describing the nature course and treatment of infantile paralysis to prove the urgent necessity for the institutional treatment of these cases, continues:

"A similar claim might also be made for other groups of surgical cases, such as tuberculous disease of bones and joints, and many cases of deformity—for example, club-foot, congenital dislocation of the hip, and septal arthritis. All these diseases have this in common—they are curable, but they require years for their treatment. They need to be treated by a team of men—physician, surgeon, mechanic, and physiotherapist—as well as by specially trained nurses, who shall do nothing else and shall not be taken away just as soon as they know their work. Further, fresh air and open-air hospitals with the maximum of sunshine are necessary for most, whilst from an economic point of view education must be provided during the prolonged treatment."

SITE IS CHOSEN

It is known that not only are there many children in British Columbia who could be greatly benefited by treatment in such an institution as is here proposed, but also that there are in the Middle West many delicate and crippled children who, in the great cold of the winter months, must suffer greatly in health and endure much grievous pain as a direct result of the climate. It is therefore the hope and intent of the Women's Institutes Hospital Association for Crippled Children that this Home on Vancouver Island shall offer a means of prolonged treatment for any crippled child of the Great West of Canada.

The committee, after careful consideration and with the advice of Mr. Napier Dennison, has decided on a suitable site on the Malahat Beach. The land lies between the Island Highway and the sea, two miles from the wharf of the Brentwood Mill Bay ferry and four to five miles from Shawnigan and Cobble Hill Stations on the E. & N. Railway, thus providing good transportation facilities not only for the Island but also from the Mainland via Nanaimo.

\$25,000 NEEDED

A sum of approximately \$25,000 will allow of the purchase of the land and the construction of a suitable building in which the treatment of fifteen to twenty children can be commenced.

The committee confidently issue this appeal for financial help well knowing that the cause of the crippled child will receive the whole-hearted support of the men and women of British Columbia.

ENGLISH HOUSES OF CORK AND STEEL A NEW EXPERIMENT

New Models Supposed to Save 25 Per Cent in Heating Costs

Deal, Eng., May 9.—Not far from the famous Deal Castle, built by Henry VIII several workmen's houses of cork with steel framework, are being built as an experiment designed to assist in relieving the housing shortage in England.

The entire skeleton of the newly conceived houses is of steel and the insulation core of the walls is formed of slabs of compressed cork. On the exterior the cork is enclosed in solid concrete to the depth of an inch and a half by a "cement gun," which applies the concrete under pressure. The cork itself, having been pressed into a mould, will not swell and burns very slowly. Calculations of the builders show that its insulation value saved twenty-five per cent in heating costs.

Another advantage for the cork house claimed by the inventors is that it is sound-proof in comparison with the ordinary structure of brick, stone or timber. Owing to the fact that it may be built by unskilled labor under direction of experienced hands the cost is low and the authorities hope buildings of this kind may prove popular among the coal miners and other workmen in the industrial districts.

REPRESENTED B.C. AT WASHINGTON

MRS. J. H. MACGILL, Judge of the Vancouver Juvenile Court, represented the Local Council of British Columbia, including Victoria, at the International Council meetings in Washington this week.

White marks on an oak table, caused by hot plates, can be removed by rubbing boiled linseed oil into them.

If jelly is needed in a hurry, dissolve a packet in just enough hot water to cover it and fill up to the required amount with cold water. The jelly will "set" more quickly than if made entirely with hot water.

INVALID WINS NEEDLEWORK PRIZE—H. B. McDermott, bed-ridden for six years at a St. Paul, Minn. hospital, won over 1,000 Minnesota women in a fancy needlework contest. The winning piece was selected solely on merit, the judges selecting the work by a number system.

GRANT'S GRANDDAUGHTER TO WED

The engagement of Princess Bertha Cantacuzene, daughter of the former Julla Dent Grant, now Princess Cantacuzene of Washington, to Bruce Smith, son of Mr. and Mrs. Thomas Floyd Smith of Louisville, Ky., has just been announced. The bride is a granddaughter of the late President of the U.S., Ulysses S. Grant, and has been writing a series of interesting stories on his life.

CENTENARIAN RECALLS MANY CHANGES IN HER LIFETIME

Mrs. Haldane, Mother of Former Lord Chancellor, Congratulated by King and Queen on One Hundredth Birthday.

Many interesting changes have been witnessed in the course of her long life by Mrs. Haldane, mother of Lord Haldane, former Lord Chancellor of Britain, who recently celebrated her one hundredth birthday at her home in Auchterarder, Perthshire, Scotland.

Mrs. Haldane's memory is remarkable in spite of her great age and among many interesting things she recalled on her birthday was the change from the carriages and sedans which were used when she was a child to the motor car of the present day. She also saw the first balloon ascent ever made in England and is greatly interested in the recent developments in air travel. She contracted the coach which first brought the news to her home of the passage of the Reform Bill with the modern wireless transmission of messages of to-day.

Mrs. Haldane as a child was subjected to the rigorous discipline meted out to children in those days and she learned her tables with her feet imprisoned in the "stocks," to ensure that she could not get away! She was able to read at three years of age and by the age of thirteen had mastered the English, French and Italian classics—a remarkable achievement.

Hundreds of messages and gifts were received by Mrs. Haldane on her centenary, including the following from the King and Queen: "The Queen and I sincerely congratulate you upon the hundredth anniversary of your birthday, and trust you may be blessed with a continuance of your wonderful good health."

Birthday gifts included a casket, on top of which were two sovereigns for 1925 and 1926. Another was a collection of Maundy Thursday coins for each year since Mrs. Haldane was born.

To mark the event an Institute has been presented by the Haldane family to Auchterarder.

WOMAN INVENTOR IS HEAD NEW COMPANY

Descendant of Inventor of Miner's Safety Lamp is Mechanical Genius

London, May 9.—Women as inventors have applied for more patents in England during the last few months than at any other period in history. Most of these devices are labor saving machines for use in the ordinary household where there are no servants. Among them is an electrical dish washing machine which will clean the dishes of a family

MUSICAL CLUB ANNUAL MEETING

The Victoria Ladies' Musical Club will hold its annual meeting on Wednesday, May 29, at 8 p.m., at the Empress Hotel. The following have been nominated for election to the executive, fourteen only to be elected: Mrs. F. G. Aldous, Mrs. D. E. Campbell, Mrs. Cecil French, Mrs. N. D. Hall, Mrs. Gideon Hicks, Mr. Forrest Leeder, Mrs. S. Maclure, Mrs. Richard Nash, Miss Schwartz, Mrs. Chas. E. Wilson, Mrs. J. O. Cameron, Mrs. J. H. Delves, Mrs. G. H. Hall, Mrs. Horace Hamlet, Mrs. Alan Horsfield, Mrs. Jesse Longfield, Mrs. D. B. McConnan, Mrs. Hermann Robertson, Mrs. Edmund Senkler and W. G. Wilson.

twelve within a few minutes at the cost of 1-12 of an English penny.

One of the best known British women inventors is Mrs. E. M. Bolton, member of a family of inventors and who recently organized a company which will manufacture labor-saving devices. She is a grand niece of Sir Humphrey Davy, who conceived the miner's safety lamp. One of her inventions is a complete laundry which may be operated by a housewife who has no maid, without getting so much as even a drop of water on her fair hands.

BOAT PROCESSION AT RIVER WEDDING

Floods in England Lead to Novel Bridal Procedure

London, May 9.—An unusual wedding took place at Ely, Cambridgeshire. Owing to the flooded Fens access to the house of the bride, Miss Rose Furness of Adelaide, near Ely, except by river, was impossible.

It was, however, decided to have a river wedding, and at 1 o'clock a procession of decorated boats was formed, in the first of which were the bride, the bridegroom, Mr. Harry Saunders, the bride's father, and the bridesmaids, while in other boats were over 100 guests.

The party disembarked at Ely boathouse and were conveyed to the church by motor-car.

After the ceremony, the procession of boats, reformed and returned to the bride's house for the reception. An aeroplane hovered over the boats and dropped colored streamers on the way down the river.

To remove water spots from materials, pass through the steam from a boiling tea kettle with a thin cloth tied over the spout. When evenly damp, shake in a current of air until dry.

WORRIED MOTHERS WHO DO NOT KNOW THEIR OWN BABY

If asked as to whether they could positively identify their own babies the majority of mothers in Victoria would indignantly repudiate any suggestion to the contrary. But the old familiar saying "It is a wise father who knows his own son" was given a material significance the other day when an English judge was asked to settle a problem calling for the wisdom of Solomon.

CURIOS COINCIDENCE

Two women both claimed a baby, each declaring that she was its mother. Finally, the more tearful of the disputants pointed out that the child had a cord from the inner part of the upper lip to the gum that occurs only once in 2,000 cases, and that she herself and two of her older children possessed the same peculiarity, whereupon the other mother showed that this formation cropped out again and again in her family!

Though a mother should know her own child, such strange dramas as this are not uncommon. There was one only a few months ago at Feldkirch in the Tyrol. Two boys, both one year old, were placed in a children's home by their mothers, and one of them died. The survivor was claimed by both women, and the magistrate, after hearing the arguments, ordered that the boy should remain in the home for three years and then be brought to court, so that any likeness to one or the other woman may be noted by experts.

THE KIDNAPPED BABY

Equally remarkable was a case which came before a London stipendiary. Three mothers laid claim to a child which had been found on a doorstep. One was soon got rid of, as it was evident she wanted the child merely to obtain possession of the clothes with which it had been supplied; but the others, both of whom had undoubtedly had a child kidnapped, were not to be shaken off. So a magistrate was called upon to adjudicate between them. After a stern fight, he awarded the baby to the woman whom it most closely resembled.

In connection with another little castaway there was a strange imbroglio. Three mothers laid claim to a child which had been found on a doorstep. One was soon got rid of, as it was evident she wanted the child merely to obtain possession of the clothes with which it had been supplied; but the others, both of whom had undoubtedly had a child kidnapped, were not to be shaken off. So a magistrate was called upon to adjudicate between them. After a stern fight, he awarded the baby to the woman whom it most closely resembled.

In some countries parents are bound by law to have babies weighed, measured, and "finger-printed" within twenty-four hours of birth, as well as to have noted on an official form any birthmark, and they are liable to heavy penalties for default. This system was first introduced in a Paris hospital after

SALVATION ARMY CELEBRATES DIAMOND JUBILEE THIS YEAR

Wonderful Work of Religious and Social Reclamation Needs Funds; Self-denial Week

That great religious and philanthropic organization, the Salvation Army, will this year celebrate its diamond jubilee. The anniversary adds a special significance to its work and to the annual self-denial week, which the local officers are observing, simultaneously with the Army throughout the world, in order to raise funds for its new unitarian work among the poor, the distressed and the unfortunate.

Founded as the Christian Mission in East London in 1865, the work spread in the following decade to many English cities. In 1878 it took its present name and adopted a military plan of organization—with uniform and other distinctive features. From the early eighties it spread to many parts of the world, so that at the death of the founder and the appointment of General Bramwell Booth in 1912, it was operating in fifty-nine different countries. It is now at work in eighty countries and colonies, and proclaims its messages in fifty-three languages.

While first and last the Army seeks to spread the religion of Jesus Christ, it has developed a considerable variety of agencies in its purpose to serve the people.

While first and last the Army seeks to spread the religion of Jesus Christ, it has developed a considerable variety of agencies in its purpose to serve the people.

WELFARE WORK

Men of all nations are pleased to applaud its welfare work—its care for the neglected and friendless—and similar services. They recognize in it a valuable agency of social regeneration. Through its instrumentality men and women are made good and turned into a force for righteousness; drunken mothers are made sober and home-loving; prisoners, the despair of loved ones and authorities are made new.

The Army's work in the social realm is unquestionably a gain. It's homes are havens for the distressed and friendless. It has hospitals for the sick, homes for the wayward and unfortunate girl, and a range of other helpful agencies, including the Inquiries Department. This department has branches in every town in countries all over the world for the tracing of lost friends and relatives.

WORK AMONG PRISONERS

Army officers visit weekly all the prisons and assist the men and women to get on their feet again upon discharge. Magistrates frequently send prisoners over to the Army's care, the great majority of these do not enter prison, but are helped back to better living and worthy citizenship.

In Western Canada the Salvation Army maintains four Rescue and Maternity Homes. Through these agencies an annual average of 200 girls are saved from a life of shame. Besides these institutions the Army

has also homes for children and for girls, as well as metropolitan for men.

The fact of Western Canada being a new country has made it impossible to meet the actual requirements. Social institutions are badly needed in many cities—women's rescue homes, children's homes, men's "metropolises"—but the Army has not the money to erect the buildings. In centres where it has been able to open this work it has found accommodation inadequate to meet the needs. All the homes are overcrowded, and it is with sadness that the devoted and hardworking officers have to turn away many through lack of room.

TRAINED OFFICERS ESSENTIAL

It will be recognized that for all this work, officers are required, and it is therefore essential that adequate training be provided whereby men and women consecrating their lives to this service may be trained and equipped. This training makes a great demand upon the army's limited resources. At present there is only one small building for this purpose, and for such training the best and most adequate facilities possible should be provided.

It was one of the dreams of the founder, William Booth, to found a University of Humanity. "There are," he said, "great universities for knowledge and its pursuit, then why not for the service of humanity? But our hands are tied in this as in other sections, through lack of money."

In view of the fact that the army is this year completing its sixtieth year of service, and celebrating its diamond jubilee, in view of the fact that the army is operating a total of twenty social institutions in Western Canada, in view of the fact that there was a deficit of over \$25,000 in the operations of these institutions last year, in view of the fact that the officers serve for the bare cost of living, and that all these institutions are operating at a minimum of cost, a cordial response is anticipated for the financial appeal which the army makes on this occasion of self-denial.

there had been a scandal in consequence of an exchange of two babies, and it is now proposed to make it compulsory in all public institutions in the United States.

Household Hints

Eating a couple of biscuits when wakeful at night will sometimes induce sleep when nothing else will.

If a few drops of vinegar and olive oil are beaten up with mutton dripping, it can be used for baking purposes just as well as beef dripping.

If a cake sticks to the baking tin, wrap round the sides, and over the bottom with a hot wet cloth, and in a few minutes the cake will come out easily.

The enameled outside parts of a gas cooker can be kept in good condition by polishing them with furniture cream, after wiping clean with a damp cloth.

If lace curtains are frail and delicate, fold them in four and tuck them together before washing. They will not then become torn or damaged in any way.

Soak new household brushes in cold water, and dry thoroughly before using. They should not stand on their bristles, but should be hung up or reversed.

Rub the sashboards of windows with melted grease, such as candle grease. This will help them to resist the strong Summer sun that is apt to rot the strongest cords.

Scorched fabrics should be rubbed lightly with white flannel wrung out of cold water and dampened with glycerine. If the glycerine leaves a mark, sponge out with alcohol.

New curtains should be steeped overnight in water in which a packet of salt has been dissolved. The salt removes all lime from the curtains and makes it easy to get them clean.

Woolen garments should be squeezed through warm, soapy water and rinsed in water of the same temperature. Washing in hot water and rubbing with soap causes woolens to shrink.

Half a pint of paraffin mixed with half a pint of vinegar makes a good cleanser and polisher. It polishes all kinds of furniture without effort, cleans and polishes tiles, marble, linoleum and oilcloth, and any kind of paintedwork.

A PAGE OF INTEREST TO CHILDREN

Mankind Has Many Neighbors On the Planet Earth, Which Fact is Sometimes Forgotten

If Man's Powers Were in Proportion to Those of Insects He Would be a Giant Indeed

The unending wonders of Nature's storehouse are sometimes too little appreciated by mankind, for whom they were created. Set on two feet the human race has come to the belief that the earth is here solely for its pleasure, forgetting that in the air, the water, and the very soil under foot are creatures also entitled to live their days and feed on the bounty of a planet, itself insignificant in the celestial vault of the heavens.

Mankind prides itself on its brain, its ability to think and reason things out, forgetting that some of the lower animals can do more by instinct than can human beings, despite the added encouragement of a brain.

An ordinary spider, such as may be seen in millions in almost any country, can make a web of silken cords stronger in proportion to its size than man's most ingenious steel cables.

Most ants, and particularly those known as soldier ants, can lift a weight 100 to 1,000 times heavier than they are themselves.

The yellow humped wasp we are apt to consider such a nuisance on picnic days can pick up a weight eight to ten times greater than itself and fly off with it as far as it likes.

Humbly hidden in the soil there are forms of grubs that can bore through the dry baked earth much more powerfully than any tunnel-borer that man has ever improved.

In the waters of more than one tropical river there are fish which can within the limits of their own small bodies generate enough electricity to start their prey into submission, surpassing man even in the science he is most apt to pride himself upon.

The beaver, in relation to its size and materials with which it works is the master bridge and dam builder of the world. It has neither compass nor steel at its disposal yet can raise the level of a river as much as it requires with materials ready there to hand.

When man works, the output of his ingenuity is called the result of brains, but when an insect, fish, or animal of the lower world performs a far greater miracle we call it instinct.

Mankind has been experimenting with anaesthetics, or materials to soothe pain, for many years, yet there is quite an ordinary form of wasp that catches small caterpillars and stings them into living sleep that will last for months, so that they may be preserved as fresh food for little wasps in due season.

No flower is so poor or devoid of instinct that it does not fashion its very shape to aid its chances of a long and useful life. It picks its color with discretion and by arranging its tiny parts ensures that it will attract just the one insect in the world that can prolong its life by carrying seed to the warm brown earth.

Few birds are so devoid of instinct that they do not build their own homes, and bring up their children in security and comfort.

No squirrel is so lost to its own pleasure that it does not lay by a store of pine cones for the winter snows.

Few animals there are which do not display an affectionate care of their own that puts to shame man's average efforts in this regard. If mankind had the patience of the ant, the spider, or even the comfort-loving house cat no obstacle would be too big for him to surmount. If he had the thrift and industry of some of the very lowest creatures he would never have cause to complain about the state of his habitation upon this planet.

"Can't" is one word in the language which man declined to put into the dictionary, no doubt, on the ground that it was so well known that to do so would be merely a loss of time.

If you were to ask a spider, and be capable of receiving a reply intelligent to your ears, you would find that "patience," "thrift," "industry" and such words were those it omitted from its dictionary for the same reason. "Can't" would most likely include, as being a strange, meaningless word that few spiders could be expected to understand anyway.

If you will study Nature's creatures at work in their millions of ways and take from each the lesson that would be to your benefit to acquire then indeed you will achieve a scholarship in the richest school of life.

All of Nature's creatures, you would find, have a definite mission in life. Each has work to do and the means are provided for it to do it. There are few drones in the hive of Nature's lower creatures, and war is almost unknown.

Man in truth is the lord of the earth, but all too often he misjudges his calling, misuses his talents, and runs a sorry race in consideration of his added start, the faculty of an mind. Train your mind to work for you so that your contribution to life may be a serious one, filling a worthwhile place in a worthwhile way.

"Mary," said the father to his little daughter, who had just returned from a children's party, "did you have any attention paid you?" "Oh, yes, daddy. One little boy made faces at me all the time."

Illustrated Bible Stories

Commencing to-day, a new series of illustrated Bible stories will be published weekly. To-day's story deals with the banishment of Adam and Eve from the Garden of Eden.

searched for a spring or brook of water but could find none. More and more thirsty they became. Their tongues were dry and their throats hurt. Oh, how they wanted water.

Then, all of a sudden, there was a buzzing sound in the air and along flew the Bumble Bee.

"Perhaps he is bringing us water!" croaked Bully.

"No, I am not big enough to carry water," said the Bee. "But if you will tip that over you will get some to drink," and the Bee pointed to a big Jack in the Pulpit plant, which is like a green pitcher on a stem, growing in the woods.

Bully hopped to the plant, pulled it over and out splashed a lot of water, giving the frog boy a shower bath, and splashing some on Uncle Wiggily. But the rabbit gentleman did not mind, for he was very dry.

"To all the water you want!" said the Bee. "It rains in these pulpit plants and remains there for thirty animal folk."

Then Bully splashed more water out of the queer plant, and Uncle Wiggily and Bawly found other plants, which gave them drinks, and they were no longer thirsty.

"The Bee did you a favor after all," said Bully to the bunny as they hopped home. And if the wind does not shake the hands of the clock, so they tell the wrong time for the bee to go to sleep, I'll tell you next about Uncle Wiggily and Bawly's boat.

THE BIBLE IN PICTURES AND TEXT

By HELEN E. OHRENSCHALL

THE BANISHMENT

THE Lord called "Adam, where art thou?" Adam answered "I heard thy voice in the garden. I was afraid and I hid myself." But the Lord said "Hast thou eaten of the tree whereof I commanded thee that thou shouldst not eat?" Adam blamed Eve and Eve blamed the serpent. God was angry and said they should be punished. He told the woman she should have sickness and sorrow and the serpent that he should crawl on the ground all the days of his life. And God drove Adam and Eve out of the beautiful garden.

WHAT IS FEAR?

HEAVENS HOLD MORE THAN MANKIND FIRST BELIEVED POSSIBLE

Those interested in the study of the heavens, learned men called astronomers, are at a loss to say just what precise period mankind first pursued the science of professional star-gazing. Long before history was written, it is suspected, men tried to puzzle out the strange laws that governed the little twinkling stars they could see at night.

The sun, the biggest and brightest object they could see in the sky, drew their attention first, and many were the stories made to account for its rise in the East and seeming loss in the West. One such suggested the sun had an attendant whose duty it was to row across the ocean and catch the sun in his boat as it sank in the West. The boatman would then row all night by way of the North and shoot the sun up into the Eastern sky again in time to start the next day. This satisfied men for some time, but not for long.

At a quite early day mankind discovered that it was the same sun that rose and set each day, and the boatman and his supposed mission passed out of account.

Many years elapsed before inhabitants of the earth knew that it was round. They had deemed it a flat plane surrounded by water on all sides as far as the eye could see or the mind conceive. Ptolemy struck out a new explanation to account for the fact that the sun and other stars pursued a regular course the season around. He said the earth was the centre of everything, and that the sun, moon, and all the stars revolved around the earth.

Then came other men who held that this was giving too much importance to the true position of the earth, and the truth was realized that the earth itself revolved around the sun, as well as many of the stars we see.

After a great many years came others who said the sun itself was only a star, not even so large or magnificent as many in the sky, and suggested that the sun as centre of our solar system had many counterparts in the limitless expanse of the heavens.

It is now known that the sky is much more magnificent and full of stars than once supposed. The naked eye can on a clear night see far too many stars to count. An ordinary telescope will triple the number and a powerful telescope will increase it a hundredfold.

The study of the stars has been of very great use to mankind in so many ways that many of them are often quite forgotten. The stars, long before compasses were used by men to find their way on land and ocean.

The science of measurement was achieved chiefly by men who wished to be able to reason out a law for the heavens, and our system of sun setting owes its birth to that source. Splitting up the rays of the sun which has taught man what lies in the very ground under his feet, something he would have had little likelihood of finding out for himself by any other means. Helium, the gas that is now used in large airships, was first discovered in the sun.

To get some idea of the magnitude of the heavens it is only necessary to learn that the sun, by no means the greatest star but a very useful one to us, is 93,000,000 miles away from the earth and lights our way from that great distance.

Many of the larger stars are so far away that men could not see the distance in light-years, the distance light would travel in 365 days and nights.

It is a wonderful thing to realize that mankind has succeeded in weighing and measuring to his own satisfaction stars the light of which takes many years to reach this planet; that a map can be drawn of the heavens which, while by no means complete, yet is accurate enough to predict 100 years ahead where many stars will

Kindness to Dumb Animals Is Duty of Everyone Say S.P.C.A. Prize Essayists

Contest Winners Teach Real Lesson in Practical Humanity, Fair Dealing to All

Leading awards in the S.P.C.A. essay contest, the annual feature of Animal Week, announced by the committee in charge of the judging accord honors to Dick Boiston, Bryan Renwick and Lillian Elston. Dick Boiston wins the first prize in the senior class; Bryan Renwick takes the first prize in the junior class; while Lillian Elston, aged eight, is accorded a special prize for merit in contributions from the youngest entrants of all.

The essays of prize winners given herewith are excellent examples of right thinking along the lines of fair dealing for man's greatest friends, the dumb animals. The question that had to be

answered was what can a boy or girl do to prevent cruelty to animals. And here is how the leading essayists have answered that question:

FIRST PRIZE, CLASS 1

"A boy or girl can do a lot to prevent cruelty to animals. Quite a few people make a practice of poisoning dogs or cats. We can prevent this by reporting it to the authorities.

"When going away camping, leave your pets in good hands, if not they are liable to die of hunger or thirst if the people forget to attend to them.

"Animals have feelings as much as we. It is just as easy to put a horse in the shade as it is to put it in the heat.

"People that have dogs should treat them kindly because it is cruelty to animals to make them bad tempered. Many dogs have been spoiled by being treated badly.

"Doctors sometimes experiment medicine on dogs to see if it will be all right to try on people. That shows what little thought some people have for animals."—By Dick Boiston.

FIRST PRIZE, CLASS 2

Here is what Bryan Renwick, aged eleven, has to say:

"There are very few people who dislike animals, and yet some people say that they love birds and keep them in a small cage. If they really like birds they should let the birds free and make a small drinking trough on a board and lay crumbs on the board. You will see plenty of birds, and you are making them more happy than if they were in a cage.

"It is very cruel to leave a dog chained up all the time. You should let him run loose and take him for walks every day.

"If you have a dog and you are going away, leave it with a friend. Don't leave it alone. If you can, take him with you.

"To end up with, I think that every child should do all they can to prevent cruelty to animals."—SPECIAL PRIZE

Here is what an eight-year-old girl says about her pets:

"Animals are mankind's most faithful friends and so we should be kind to them at all times. Our pets could be helped in many ways such as the following:

"One should try to prevent dogs from running behind cars or bicycles when going long distance. Also one could scatter crumbs in winter for our feathered friends. These are often treated cruelly by boys who shoot them with cap pistols.

"This most cruel of the mother birds who perhaps have little ones waiting for them.

"Moreover our horses should not be overstrained by heavy loads as hills are hard to climb.

"We should see that all animals in our care are kept clean, warm and well fed.

"A little thought and kindness on everyone's part would make the world a happier place for our dumb friends."—Lillian Margaret Elston, aged eight years.

hurry and scooped up her books on the run.

Now, what happened at school was very peculiar. Mollie had always been very good at her studies and it was something of an experience to see her teacher say, "Now, Mollie, this is wrong."

"This was her arithmetic paper. Mollie discovered, and it was very wrong indeed. In fact, there did not appear to be anything right about it. Mollie blushed with shame as she became the occupant of the teacher's stool.

Now of course it must have been coincident but still there was a pin on that stool just like the pin that had been on the seat the teddy bear sat on. Mollie writhed but the teacher cautioned her: "I said you have to sit there for ten minutes, young lady, and I meant it."

"But, teacher, there is a—," began Mollie.

"No buts if you please, Mollie Smart, just do as you are told," was her rebuke.

Mollie suffered in silence for the remaining nine minutes and fifty-nine seconds.

When Mollie got home she was the greatest star in the class. She was laughing at her; everybody seemed to be laughing at her.

"You try it, you little simp," said Mollie to Benjamine and banged her down on a seat for ten minutes, not forgetting the pin.

"Mama," said Benjamine, but as she had always said that nobody took any notice.

Now that may be why Mollie acquired a habit of brushing a seat before sitting on it again. She even carried this habit to her dollies and toys and that is why, no doubt, teddy bears never again played such a mean trick.

BEDTIME STORY

Uncle Wiggily and Bully's Splash

Copyright, 1925, by McClure Newspaper Syndicate.

(By Howard R. Garis)

Bully and Bawly No Tail, the two frog boys, hopped past Uncle Wiggily's hollow stump bungalow one bright, sunny day when the May flowers were filling the air with sweet perfume.

"I feel so jolly and happy, don't you, Bawly?" asked Bully.

"Yes," croaked Bawly. "I don't wish we could go hopping through the woods with Uncle Wiggily as we used to, and have an adventure. But I suppose, since he got married, and his new wife brought with her so many little rabbits, he won't go off with us any more."

"Maybe not," said Bully. "But it would do no harm to ask. I don't believe Uncle Wiggily will forget his old friends."

The two frog boys hopped to the hollow stump bungalow, where Uncle Wiggily lived, and knocked on the door. The old rabbit gentleman himself opened it, his pink nose twinkling in a happy way. He looked at the frog boys and said:

"Hello, Bully and Bawly!" "Hello, Uncle Wiggily!" they croaked. "Don't you want to come

adventuring with us as you used to?"

"Hurray! Hurray! Indeed, I do!" cried Mr. Longears, dancing about. "As it happens you came at just the right time," he said. "My new wife has taken all the little rabbits to a moving picture show, I stayed home and I'm glad I did, for now I can go adventuring with you. Come on, boys—this is like old times!"

You may be sure Bully and Bawly were as happy as Uncle Wiggily, and soon the three friends were hopping together up hill and down dale, over the fields and through the woods.

They had not gone very far before, all of a sudden, a sad little voice was heard crying:

"Help! Help! I'm stuck! Will someone please help me!"

"Wait a minute, froggie boys!" said Uncle Wiggily, when Bully and Bawly would have hopped on. "We must always help those in trouble. Let's see who this is."

"Perhaps it's the Fuzzy Fox!" whispered Bawly.

"Or the Woosie Wolf!" croaked Bully.

"Not No!" laughed the bunny gentleman. "Neither the Fox nor the Wolf has a gentle, buzzing voice like this one. I think it must have been a bee."

And surely enough, when they looked, there was a big Bumble Bee, with his legs tangled in some sticky gum on the branch of a pine tree, where he had stopped to rest after gathering honey.

"I'll help you, Bumble Bee," said Uncle Wiggily, and with a little silver of wood he gently poked away the sticky gum and the Bee could fly to its home. But before it flew away it buzzed:

"If ever I can help you, Uncle Wiggily, I am going to do it."

"Ho! Ho!" laughed Bully, though he waited until the Bee had gone before he laughed. "How can a bee help you, Uncle Wiggily?"

"I don't know—we'll wait and see," said the bunny. On and on he hopped with the two froggie boys, and before they knew it they had gone a long way, and they began to feel thirsty.

"I'd like a drink!" said Bully, and so did Bawly, while Uncle Wiggily himself was very thirsty. They

CHILD'S STORY OF THE HUMAN RACE

UNCLE RAY

By RAMON COFFMAN

One reason Prince Henry sent his men down the African Coast was that he hoped to find a water-route to India. He thought ships might be able to sail around the southern coast of Africa, then east to India and the Indies.

That did finally happen, but not until long after the prince died. Now comes the question:

"Why were the men of Europe so anxious to be in touch with India?"

The answer is that India was the great trading centre of the Orient. It sold many things which were not raised in Europe, and other things which could not be made so well by the hands of European workmen.

Indian calico and Chinese silk—these were two products Europe could not equal. India was also willing to

sell fine rubies, diamonds and emeralds.

From the islands near India came spices of all kinds: Nutmegs, pepper, cinnamon, cloves and others.

From the Orient also came horax, ginger, opium, rhubarb, dates and (alas!) castor oil.

Most of these things reached Europe through the ports of Venice and Genoa. Sailors from those cities traded with merchants in Constantinople and Alexandria.

Goods had to be taken across a hard route from India to Egypt and Constantinople. At least part of the way, they were carried across deserts on the backs of camels. Parties of men—with loaded camels—were often attacked and robbed—especially by bands of Turks.

That is why a water-route to India was so much needed.

CROSS-WORD PUZZLE FOR THE LITTLE FOLKS

Here is the start of a new series of crossword puzzles which will supplement the series concluded last week. The answer to Puzzle 12 is given to-day, and the correct solution of to-day's puzzle will be given on Saturday next. Keep the patterns as the series will have twelve puzzles and may be used with great effect at a children's party, when you have all the patterns and the answers in your hands. The puzzle-to-day is very simple, mostly three-letter words, but here and there a little catch word is put in to save it from being too easy. There is one word of seven letters, but its meaning is easily guessed. Black squares over a numbered square tell of the beginning of a vertical word. When the black square is to the left of the number the word that follows is horizontal.

1	2	3	4	5	6	
7	8		9	10		
11	12	13	14	15	16	
17	18	19	20	21

HENRY FORD NOW A VERITABLE CROESUS OF INDUSTRY

Making Of Automobiles Now Only Small Part Of Activities Of This Genius

DETROIT, Mich., May 9—Although the public thinks of Henry Ford in the terms of automobiles, he is a modern Croesus of industry who controls more enterprises than any other man.

These businesses run from automobiles to coal mines, through barge canals, railroads, ship lines; and now he is interesting himself in other big projects.

These are the establishment of an airplane freight and passenger line and the growing of rubber in the United States in an effort to break the monopoly.

Efforts on the part of Ford in new lines of business bring out the amazing organization he has already built. Even the bald truth may seem colored and exaggerated.

Yet each year the profits of his company go upward, stimulated by the enterprises which Ford surrounds his original automobile plant.

For in the main he has kept all of his business projects more or less closely related to his manufacturing needs in an organization which reaches to every corner of the civilized world.

Despite the enormous production of the company, it has reached a degree of efficiency of operation which has drawn the attention of scientists and industrialists.

The organization represents a complete industrial chain independent of strikes or shortage of raw materials—such as coal, iron and timber and of every means of transportation from the mines and forest to the finished product.

An announcement just made public by the Ford organization reveals the following lines of endeavor:

Automobiles—Two makes, with a production of 1,676,673 cars in 1924.

Tractors—A production of 64,450 in 1924.

Railroad—Holds a seventy-five-year lease on the Detroit, Toledo & Ironton line, which was purchased at a receivership sale for \$5,000,000 and made into a paying line. It is in a strategic location, cutting across all the main east and west transcontinental lines which run through Ohio south of Toledo and on toward the Ohio River.

Ship Lines—Operates vessels that complete the transportation system that joins the coal from the south with iron from the north at the River Rouge plant. The company controls its own ore boats and five ocean-going freighters.

Coal Mines—Buying coal in open market was unsatisfactory so the Ford organization purchased control of four fields, two in Kentucky and two in West Virginia. These mines have resources of 208,000,000 tons.

Timber—A million feet of lumber supplies the Ford organization's needs, for one day. The company now owns nearly half a million acres of timber land in northern Michigan in addition to 120,000 acres in Kentucky.

Saw Mills—The largest mill is at Iron Mountain, and cuts as high as 300,000 feet of lumber a day. Complete towns are controlled by the company to carry on logging and saw mill activities.

Dry Kilns—Steam-heated dry kilns dry and season wood operated by the company. There are fifty-two kilns, which makes this the largest battery of dry kilns.

Wood Distillation—Largest and most complete of its kind.

Blast Furnaces—About 400,000 tons of iron a year are required for production, and the ore is treated in furnaces having a capacity of from 500 to 600 tons of high silicon iron a day.

Electric Furnaces—Scrap steel worth from \$15 to \$20 a ton is reclaimed in electric furnaces and its value raised to \$50. The furnaces are capable of melting from 200 to 250 tons a day.

Hydro-electric Plants—Five plants in operation for harnessing of water power, cheapest, most efficient and least wasteful of all types of power.

Foundry—The Rouge foundry is the largest in the world. It covers thirty acres and pours 2,000 tons of castings every twenty-four hours.

Coke Ovens—Produces own coke. Coal which costs \$5 a ton delivered is converted into from \$12 to \$13.50 worth of coke and by-products.

All of these various interests developed by the Ford Company create a list of manufactured articles that is astounding.

Glass—Ford industries use about one-fourth of all plate glass produced in United States. More than 20,500,000 feet are required a year. Glass is made at three places, Highland Park, River Rouge and at Glassmere, Pa., a factory purchased by the company.

Artificial Leather—White cloth is put through a coating compound and is turned into artificial leather at the rate of 80,000 yards per day.

Fordite—Forty-five parts of the Ford car, including steering wheel rim and coil box, are made out of a hard rubber substance called Fordite. About 8,500 steering wheels alone are turned out in a day.

Roller Bearings—More than 60,000 pounds of steel ribbon is used in the roller bearing department every day. In 1924, more than 6,309,980 bearings were turned out.

Batteries—About 3,200 batteries a day are made at the Ford Highland Park plant.

Wire and Textile—All insulations is made in the Ford factories, including the enameling of the copper wire and winding wire with cotton.

Radiators—Production schedule calls for approximately 9,000 radiators a day. Normal day's production calls for these materials: 38 tons of sheet steel, 6 tons of terne plate, 68 tons of brass, 9 tons of solder, 18,000 malleable castings and 1,066 gallons of acid.

Motion Pictures—Photographic records are kept of everything the company does. Educational pictures are also supplied to schools and colleges.

Johanson Gages—Rectangular pieces of tool steel, hardened, ground and lapped to give accurate dimensions, are made by the Ford Company, which holds the American manufacturing rights.

Paper—Waste paper and rags that accumulate at various Ford plants are remade into binder board. Some fifteen varieties of boxes and containers are manufactured.

Cement—Slag from blast furnaces is converted into a finished cement.

Magazine—The Dearborn Independent, a weekly magazine, at Dearborn, Mich., was purchased by the Ford Company and now has a circulation of over 700,000.

Special Machinery—Each operation at the Ford plants is closely watched by experts and changes in machinery to expedite work at a lower cost happen regularly.

Airplanes—Airplanes made by the Stout Manufacturing Company are used by the Ford organization in handling freight and it is quite likely that the actual production of planes at the Ford plants will be undertaken.

Rubber—Ford is now interested with Harvey S. Firestone and Thomas A. Edison in an effort to raise rubber in the United States.

In 1924 the Ford Company paid its employees \$253,001,528 in salaries and had a surplus of \$542,476,496. The company was incorporated in 1903 with but \$28,000 in the treasury.

INTELLIGENCE ALMOST HUMAN FOUND BY "APE SCHOOL" PROFESSOR

From Tenerife, Africa, where the world's greatest "finishing school for apes" is conducted by the Prussian Academy of Sciences, has just come Prof. Wolfgang Koehler, University of Berlin, with startling new data on intellectual relationship between chimpanzees and humans.

For more than four years Prof. Koehler, one of the greatest authorities on anthropoids, played a sort of schoolmaster role to a classroom of higher apes, giving them daily problems for solution while making a scientific study of the results.

And his conclusion is this: "Chimpanzees manifest intelligent behavior of the general kind familiar in humans."

Furthermore he has found that:

In many instances higher apes have been found to possess memory that equal, and often excel, that of the average human.

"That the 'language of the eyes' is known to the ape world and is used in love-making even as with sweet-hearts in the world of man.

That they are capable of solving rather intricate problems and even of inventing solutions.

"When the apes are first confronted with a problem," explains Prof. Koehler, who has come as guest professor at Clark University, "there is a period in which they seem to make no progress. Then there seems to come a quick comprehension. Like humans it is necessary for them to realize the significance of what they

see before they can invent a way out of a difficulty."

The experiments conducted by Dr. Koehler are the first of a comprehensive nature on the mental behavior of the "man-like apes" and Prof. Koehler feels that much further study will be necessary before a concrete scientific theory can be developed.

"This much remains true, however," he points out, "chimpanzees not only stand out against the rest of the animal world through physiological characteristics, but they behave in a way that counts characteristically as humans.

"In evolutionary research of the past it was established that these animals were closer to man than to

any other animal, both in the quality of blood and in body chemistry. Then, too, is the similarity of brain structure. But how is the mentality applied?"

Dr. Koehler tells of experiments in which bananas were hung high above the cages and a number of boxes were scattered about the floor. For some time the apes blundered about trying to figure ways of reaching the fruit. Finally it was solved by piling up the boxes and leaving one ape to steady them while another climbed up and got the food.

"He learned also that hours after a desired object had been hidden the ape would recall the exact hiding place and find it.

If an ape died and was taken away

it would not be missed, but if its suffering were witnessed other apes would be greatly affected by looking at the suffering one, Dr. Koehler relates.

When Consul, the world-famous chimpanzee was dying, Rana, a female, passed and took him in her arms seeking to comfort him. Also, he recites, they will sympathetically rush to the aid of a fellow ape that is being punished.

"Of course, chimpanzees vary in degree of their intelligence, just as do humans.

Scientists do not always agree on the course of evolution, but the general theory of evolution is the basis of all modern biology," comments the professor who was denied the privi-

lege of speaking at certain universities in states where such teaching is barred by legislative action.

"The thrilling news had just been received that 'Big Sister' was the proud mother of a darling little girl.

"Oh," said "Little Sister" Jane, "I'm so glad it's a little girl and not a little boy."

"Why," asked her father curiously.

"Because, Daddy," said Jane with a happy sigh, "I never wanted to be an uncle."

"You seem to be working pretty late at the office these days, old man."

"I have to. If I come home early, my wife makes me work in the garden."

What is the matter with your face? Were you in an automobile accident?"

"No, I was being shaved by a lady barber when a mouse ran across the floor."

Emir Must Live On The Ocean Waves—Nobody Wants Him

WASHINGTON, May 9—His Highness Seld Zerdecheno, "Prince of Egypt" and "Emir of Kurdistan," seems due for a life on the ocean waves and a home on the rolling deep with the White Star steamship line footing the bill.

Ordered deported from America, his various other countries won't let him in.

He can't stay here—and he can't go anywhere else!

All of which is causing immigration authorities no concern at all, and neither does it appear to bother his highness.

But according to George C. Tolman, assistant commissioner-general of immigration, it is something for the White Star line to worry about.

"They brought him here," said Tolman, "and they've got to take him away."

"We don't care what they do with

him—but they'll have to keep on paying his expenses until they do it."

DEPORTED TO ENGLAND

The prince was deported to England about a month ago.

The British authorities sent him back.

Now he's waiting to be deported to France, where he lived at one time.

But French officials says the welcome will be erased from the door-

mat if an attempt is made to take him there.

After his trip to France, indications are his next voyage will be to Turkey, as he was born in Kurdistan, now a province of the Ottoman Empire.

The Turks, however, are evincing no signs of staging a Prodigal Son Return Celebration upon his arrival.

Instead, they have declared him an outlaw!

Zerdecheno, came to this country several years ago and cut quite a swath with his various high-sounding titles.

As Emir of Kurdistan he was dined, wined and generally lionized by society.

He married, and for a time settled down in Kentucky, his wife's native state.

When the Princess Fatima, Sultana of Afghanistan, visited America,

he accompanied her party as heir to the Egyptian throne.

He called at the White House, and also visited the State Department to establish his claim to royalty.

A BAD MOVE

This last proved to be a false move. The State Department looked him up—and his courtly presence was soon gracing the District of Columbia Jail!

Immigration authorities made the

arrest at the Egyptian legation, where they found him further pressing his claim.

"He was a clever fakir," said Tolman, "living off his self-manufactured titles."

"He had no money, and he wouldn't work. That made him a public charge, and we ordered him deported."

"According to law, the return expenses of an undesirable alien must

be paid by the steamship company which brought him over.

"That puts it up to the White Star line."

"All we're concerned with is that he doesn't stay here—and we'll see to it he doesn't do that!"

And in the meanwhile, Zerdecheno, assured of free meals and a place to sleep, is placidly preparing for an indefinite period of ocean travel.

ARCHIE, ART CONNOISSEUR

By P. G. WODEHOUSE

Illustrated by JEFFERSON MACHAMER

More Artless Than "Arty" Is Archie On This Occasion— He Buys a Jolly Old Venus Picture That Plunges Him Into His Usual Blunders And His Usual Luck

THE Summer morning was so brilliantly fine, the populace popped to and fro in so active and cheery a manner, and everybody appeared to be so absolutely in the pink that a casual observer of the city of New York would have said that it was one of those happy days. Yet Archie Moffatt, as he turned out of the sun-bathed street into the ramshackle building on the third floor of which was studio belonging to his art-friend, James B. Wheeler, was faintly oppressed with a sort of a kind of feeling that something was wrong. He would not have gone so far as to say that he had the pip—it was more a vague sense of discomfort. And, searching for the cause as he made his way upstairs, he came to the conclusion that the person responsible for this nebulous depression was his wife, Lucille. It seemed to Archie that, at breakfast that morning, Lucille's manner had been subtly rummy.

Musing thus, he reached the studio, and found the room empty. The studio had seen the last of J. B. Wheeler for that day, but Archie, not realizing this, and feeling that a chat with Mr. Wheeler, who was a light-hearted bird, was what he needed, sat down to wait. After a few moments, his gaze straying over the room, encountered a handsomely framed picture, and he went across to take a look at it.

J. B. Wheeler was an artist who made a large annual income as an illustrator for the magazines, and it was a surprise to Archie to find that he also went in for this kind of thing. For the picture, dashingly painted in oils, represented a comfortably plump young woman who was plainly intended to be the goddess Venus. Archie was not much of a nib round the picture galleries, but he knew enough about art to recognize Venus when he saw her, though once or twice, it is true, art-lets had double-crossed him by ringing in some such title as "Day Dreams" or "When The Heart Is Young."

He inspected this picture for a while, then, returning to his seat, libbed a cigarette and began to meditate on Lucille once more. Yes, the dear girl had been rummy at breakfast. There had been in Lucille's manner that curious strained sweetness which comes to women whose husbands have failed to match the piece of silk or forgotten to post an important letter. If his conscience had not been as clear as crystal, Archie would have said that that was what must have been the matter. But when Lucille wrote letters, she just stepped out of the suite and dropped them in the mail-chute attached to the elevator. It couldn't be that. And he couldn't have forgotten anything else, because—

"O my sainted aunt!" Archie's cigarette smouldered, neglected, between his fingers. His jaw had fallen, and his eyes were staring glassily before him.

"ARCHIE, YOU DARLING" His memory was weak, he knew, but never before had it let him down so severely as this. "This was a record. For a man may forget many things—he may forget his name, his umbrella, his nationality, his spats, and the friends of his youth; but there is one thing which your married man, your in-stickness-and-in-health lizard must not forget, and that is the anniversary of his wedding day.

Remorse swept over Archie like a wave. His heart bled for Lucille. No wonder the poor girl had been rummy at breakfast! He groaned hollowly and sagged forlornly in his chair, and as he did so, the Venus caught his eye. It was an eye-catching picture. You might like it or dislike it, but you could not ignore it.

Archie had the whole thing neatly worked out inside a minute. He scribbled a note to Mr. Wheeler, explaining the situation, and promising reasonable payment on the installment system; then, placing the note in a conspicuous position on the easel, he leaped to the telephone—and presently found himself connected with Lucille's room at the Cosmopolis.

"Hello, darling!" he cooed. "There was a slight pause at the other end of the wire.

"Oh, hello Archie!" Lucille's voice was dull and listless, and Archie's experienced ear could detect that she had been crying.

"Many happy returns of the day, old thing!" "A muffled sob floated over the wire.

"Have you only just remembered? Archie, bracing himself up, cackled gleefully into the receiver.

"Did I take you in, light of my home? Do you mean to say you really thought I had forgotten? For Heaven's sake!"

"You didn't say a word at breakfast. Ah, but that was all part of the devilish cunning, I hadn't got a present for you then. At least, I didn't know whether it was ready."

"Oh, Archie you darling!" Lucille's voice had lost its crushed melancholy. She trilled like a thrush, or a lark, or any bird that goes in

largely for trilling. "Have you really got me a present?" "It's here now—the dickens of a fruity picture. One of J. B. Wheeler's things. You'll like it."

"Oh, I know I shall! I love his work. You are an angel. We'll hang it over the piano."

"I'll be round with it in something under three ticks, star of my soul. I'll take a taxi."

It is not far from Washington Square to the Hotel Cosmopolis, and Archie made the journey without mishap. There was a little unpleasantness with the cabman before starting—he, on the prudish plea that he was a married man with a local reputation to keep up, declining at first to be seen in company with the masterpiece. But, on Archie giving a promise to keep the front of the picture away from the public gaze, he consented to take the job on, and, some ten minutes later, having made his way blushfully through the hotel lobby, Archie entered his suite, the picture under his arm.

He placed it carefully against the wall in order to leave himself more scope for embracing Lucille, and when the joyful reunion was concluded, he stepped forward to turn it round and exhibit it.

"Why, it's enormous!" said Lucille. "I didn't know Mr. Wheeler ever painted pictures that size. When you said it was one of his, I thought it must be the original of a magazine drawing or something like—oh!"

Archie had moved back and given her an uninterupted view of the work of art, and Lucille had started as if some unkindly disposed person had driven a bad-awl into her.

"Pretty ripe—what?" said Archie enthusiastically.

Lucille did not speak for a moment. It may have been sudden joy that kept her silent. Or, on the other hand, it may not. She stood looking at the picture with wide eyes and parted lips.

"A bird, eh?" said Archie.

"I-yes," said Lucille.

"I know you'd like it," proceeded Archie, with animation.

"Phone down to the office, light of my soul, and tell them to send up a nail, a bit of string, and the hotel hammer."

"One moment, darling. I'm not quite sure—"

"Eh?" "Where it ought to hang, I mean. You see—"

"Over the piano, you said. The jolly old piano."

"Yes, but I hadn't seen it then."

"I know you'd like it," proceeded Archie, with animation.

"Phone down to the office, light of my soul, and tell them to send up a nail, a bit of string, and the hotel hammer."

"One moment, darling. I'm not quite sure—"

"Eh?" "Where it ought to hang, I mean. You see—"

"Over the piano, you said. The jolly old piano."

"Yes, but I hadn't seen it then."

"I know you'd like it," proceeded Archie, with animation.

"Phone down to the office, light of my soul, and tell them to send up a nail, a bit of string, and the hotel hammer."

"One moment, darling. I'm not quite sure—"

"Eh?" "Where it ought to hang, I mean. You see—"

"Over the piano, you said. The jolly old piano."

"Yes, but I hadn't seen it then."

"I know you'd like it," proceeded Archie, with animation.

when a voice behind him nearly caused him to over-balance. "What the mischief?"

"Not while I have my strength here won't," said J. B. Wheeler firmly. "She's given up painting since I taught her golf."

"But, daddie," said Archie, puzzled, "you talk as though there were something wrong with the picture. I thought it dashed hot stuff."

"Bless you!" said J. B. Wheeler. "At breakfast next morning, Archie once more brought up the question of the hanging of the picture.

"Touching the jolly old masterpiece," he said, "how about it? I think it's time we hoisted it up somewhere."

Lucille fiddled pensively with her coffee-spoon.

"Archie dear," she said. "I've been thinking."

"Add a very good thing to do," said Archie.

"About that picture, I mean. Did you know it was father's birthday to-morrow?"

"Why, no, old thing. I didn't be absolutely honest. Your reverend parent doesn't confide in me much."

"Well, it is. And I think we ought to give him a present."

"Absolutely! But how? I'm all for spreading sweetness and light and cheerfulness up the jolly old papa's sorrowful existence, but I haven't a bean. And, what is more, things

behind the ear like a stuffed eelskin. "It's a birthday present from Lucille, don't you know?"

"Lucille gave me—that?" he muttered.

He swallowed pathetically. He was suffering, but the iron courage of the Brewsters stood him in good stead. Presently, the rigidity of his face relaxed. He was himself again. Of all things in the world he loved his daughter most, and if, in whatever mood of temporary insanity, she had wrought herself to suppose that this beastly dab was the sort of thing he would like for a birthday present, he must accept the situation like a man. He would, on the whole, have preferred death to a life-in-the-society-of-the Wigmores Venus, but even that torment must be endured if the alternative was the hurting of Lucille's feelings.

any loonies in your family?" Reggie stirred in the slumber which always gripped him in the early afternoon.

"Looones!" he mumbled sleepily. "Rather! My uncle Edgar thought he was twins."

"Twins, eh?" "Yes. Silly idea! I mean, you'd have thought one of my Uncle Edgar would have been enough for any man."

"How did the thing start?" asked Archie.

"Start? Well, the first thing we noticed was when he began wanting on the front pages of the morning papers that day. It was Mr. Brewster's opinion that the outrage had

been the work of a game, and that nobody was safe.

Daniel Brewster had spoken of this matter with a strange earnestness, but his words had slipped from Archie's mind when he made his way that night to his father-in-law's suite. Archie was in an exalted mood. In the course of dinner he had had a bit of good news which was occupying his thoughts to the exclusion of all other matters. It had left him in a comfortable, if rather dizzy, condition of benevolence to all treated things.

He found the door of the Brewster suite unlocked, which at any other time would have struck him as unusual, but to-night he was in no frame of mind to notice these trivialities. He went in, and finding the room dark and no one at home, sat down, too absorbed in his thoughts to switch on the lights, and gave himself up to dreamy meditation.

There are certain moods in which one loses count of time, and Archie could not have said how long he had been sitting in the deep armchair near the window when he first became aware that he was not alone in the room. He had not seen anyone enter. Nor had he heard the door open. The first intimation he had that somebody had come in was when some hard substance knocked against some other hard object, producing a sharp sound which brought him back to earth with a jerk.

MR. BREWSTER OFF HIS UNION He sat up silently. The fact that the room was still in darkness made it obvious that something nefarious was afoot. He stared into the blackness, and as his eyes grew accustomed to it was presently able to see an indistinct formy shadowy figure something on the floor. The sound of rather stertorous breathing came from him.

Archie had many defects, but lack of courage was not one of them. Archie was a man of action, and he was out of his chair and sailing in the direction of the back of the intruder's neck before a wiser man would have completed his plan of campaign. The miscreant collapsed under him with a squasy sound, like the wind going out of a pair of bellows, and Archie, taking a firm seat on his spine, rubbed the other's face in the carpet and awaited the progress of events.

At the end of half a minute it became apparent that there was going to be no counter-attack. The dash- ing swiftness of the assault had ap-

parently had the effect of depriving the miscreant of his entire stock of what were you up to when I landed on your spine just now?" "I suppose you thought I had gone off my head."

"Well, I'm bound to say—"

Mr. Brewster cast an unfriendly glance at the picture. "Well, I had every excuse, after living with that infernal thing for a week."

Archie looked at him, astonished. "I say, old thing—I don't know if I have got your meaning exactly, but you somehow give me the impression that you don't like that jolly old work of art."

"Like it?" cried Mr. Brewster. "It's nearly driven me mad. Every time it caught my eye it gave me a pain in the neck. Tonight I felt as if I couldn't stand it any longer. I didn't want to hurt Lucille's feelings by telling her, so I made up my mind I would cut the blamed thing out of its frame-and-tell her it had been stolen."

Archie was thinking. "Well, all this rather gets past me," he said. "Personally, I've always admired the thing. Still, of course, if you feel that way—"

"You may take it from me that I do."

"Well, then, in that case—you know how clumsy I am—you can tell Lucille it was all my fault—"

The Wigmores Venus smiled up at Archie, it seemed to him, with a pathetic, pleading smile. For a moment he was conscious of a feeling of guilt; then, closing his eyes, and hardening his heart, he sprang lightly in the air and descended with both feet on the picture. There was a sound of rending canvas, and the Venus ceased to smile.

"Golly!" said Archie, regarding the wreckage remorsefully.

Mr. Brewster did not share his remorse. For the second time that night he gripped him by the hand.

"My boy!" he quavered. He stared at Archie as if he were seeing him with new eyes. "My dear boy, you were through the war, were you not?"

"Eh? Oh, yes—right through the jolly old war!"

"What was your rank?" "Oh, second lieutenant."

"You ought to have been a general," Mr. Brewster clasped his hand once more in a vigorous embrace. "I'm sure you were in a vigorous embrace. I'm sure you were in a vigorous embrace. I'm sure you were in a vigorous embrace."

Archie was a man of action. The miscreant collapsed under him with a squasy sound. Archie, taking a firm seat on his spine, rubbed the other's face in the carpet.

"I say, old thing—I don't know if I have got your meaning exactly, but you somehow give me the impression that you don't like that jolly old work of art."

"Like it?" cried Mr. Brewster. "It's nearly driven me mad. Every time it caught my eye it gave me a pain in the neck. Tonight I felt as if I couldn't stand it any longer. I didn't want to hurt Lucille's feelings by telling her, so I made up my mind I would cut the blamed thing out of its frame-and-tell her it had been stolen."

Archie was thinking. "Well, all this rather gets past me," he said. "Personally, I've always admired the thing. Still, of course, if you feel that way—"

"You may take it from me that I do."

"Well, then, in that case—you know how clumsy I am—you can tell Lucille it was all my fault—"

The Wigmores Venus smiled up at Archie, it seemed to him, with a pathetic, pleading smile. For a moment he was conscious of a feeling of guilt; then, closing his eyes, and hardening his heart, he sprang lightly in the air and descended with both feet on the picture. There was a sound of rending canvas, and the Venus ceased to smile.

"Golly!" said Archie, regarding the wreckage remorsefully.

Mr. Brewster did not share his remorse. For the second time that night he gripped him by the hand.

"My boy!" he quavered. He stared at Archie as if he were seeing him with new eyes. "My dear boy, you were through the war, were you not?"

"Eh? Oh, yes—right through the jolly old war!"

"What was your rank?" "Oh, second lieutenant."

"You ought to have been a general," Mr. Brewster clasped his hand once more in a vigorous embrace. "I'm sure you were in a vigorous embrace. I'm sure you were in a vigorous embrace. I'm sure you were in a vigorous embrace."

Archie had many defects, but lack of courage was not one of them. Archie was a man of action, and he was out of his chair and sailing in the direction of the back of the intruder's neck before a wiser man would have completed his plan of campaign. The miscreant collapsed under him with a squasy sound, like the wind going out of a pair of bellows, and Archie, taking a firm seat on his spine, rubbed the other's face in the carpet and awaited the progress of events.

At the end of half a minute it became apparent that there was going to be no counter-attack. The dash- ing swiftness of the assault had ap-

parently had the effect of depriving the miscreant of his entire stock of what were you up to when I landed on your spine just now?" "I suppose you thought I had gone off my head."

"Well, I'm bound to say—"

Mr. Brewster cast an unfriendly glance at the picture. "Well, I had every excuse, after living with that infernal thing for a week."

Archie looked at him, astonished. "I say, old thing—I don't know if I have got your meaning exactly, but you somehow give me the impression that you don't like that jolly old work of art."

"Like it?" cried Mr. Brewster. "It's nearly driven me mad. Every time it caught my eye it gave me a pain in the neck. Tonight I felt as if I couldn't stand it any longer. I didn't want to hurt Lucille's feelings by telling her, so I made up my mind I would cut the blamed thing out of its frame-and-tell her it had been stolen."

Archie was thinking. "Well, all this rather gets past me," he said. "Personally, I've always admired the thing. Still, of course, if you feel that way—"

"You may take it from me that I do."

"Well, then, in that case—you know how clumsy I am—you can tell Lucille it was all my fault—"

The Wigmores Venus smiled up at Archie, it seemed to him, with a pathetic, pleading smile. For a moment he was conscious of a feeling of guilt; then, closing his eyes, and hardening his heart, he sprang lightly in the air and descended with both feet on the picture. There was a sound of rending canvas, and the Venus ceased to smile.

"Golly!" said Archie, regarding the wreckage remorsefully.

Mr. Brewster did not share his remorse. For the second time that night he gripped him by the hand.

"What was your rank?" "Oh, second lieutenant."

"You ought to have been a general," Mr. Brewster clasped his hand once more in a vigorous embrace. "I'm sure you were in a vigorous embrace. I'm sure you were in a vigorous embrace. I'm sure you were in a vigorous embrace."

Has your baby the Virol smile?

Well nourished babies are happy babies; fretfulness is an indication of a faulty diet. The Virol fed baby is known by its smile, because Virol contains those food elements essential to growth and development in a form specially suited to baby's power of assimilation.

Virol feeds baby's tissues and strengthens his power of resistance to disease.

More than 3,000 Infant Clinics use Virol regularly.

VIROL

The food that builds strong children.

MUTT AND JEFF

Ima Mutt Calls on His Brother

By BUD FISHER

THE GUMPS

WHERE IS MY WANDERING BOY TO-NIGHT?

SIDNEY SMITH

GEE, NOW I'D HATE TO LET ANY OF THOSE CANNIBALS GET THEIR HANDS ON ME - I DON'T KNOW WHAT THEY ARE CARRYING ALL THAT FIREWOOD FOR - MAYBE THEY INTEND TO BURN POOR CHING CHOW AT THE STAKE - WELL, THEY WON'T HARM HIM WHILE I'M ALIVE -

THE FAITHFUL CHING CHOW IS A HELPLESS CAPTIVE IN THE HANDS OF THE CRUEL SAVAGES - POOR LITTLE CHESTER, ALL ALONE SURROUNDED BY A THOUSAND DANGERS, REFUSES TO GIVE UP HOPE - IN SPITE OF THE ODDS AGAINST HIM HE HAS RESOLVED TO SAVE CHING CHOW OR DIE IN THE ATTEMPT -

THE SAVAGES THINK I AM DEAD OR HIDING SOME PLACE - THEY'LL NEVER DREAM I'D ATTEMPT TO RESCUE CHING CHOW SINGLE-HANDED - IF I CAN SNEAK INTO THEIR CAMP WHILE THEY'RE ALL SLEEPING I'LL SET CHING FREE - THEN WE'LL HIDE IN THE CAVE TILL THE SAVAGES HAVE LEFT THE ISLAND -

BEFORE I START ACROSS THAT OPEN GROUND I'LL FIND OUT IF THERE ARE ANY SAVAGES LURKING IN THE FOREST - THIS TRICK WILL FOOL 'EM - IF THERE SHOULD BE A SAVAGE WATCHING HE WOULD SHOOT AN ARROW AT MY HAT -

IF I CAN REACH THAT UNDERBRUSH I'LL BE HARDER TO LOCATE THAN A BLACK MARK ON A LUMP OF COAL - I'LL RUN AS FAST AS I CAN AND HOPE THAT NOBODY SEES ME - I FEEL KIND OF SCARED BUT I'LL NOT STOP ON THAT ACCOUNT -

IF I EVER GET HOME AND TELL ALL THE KIDS IN SCHOOL ABOUT THIS ISLAND THEY'LL NEVER BELIEVE ME - GEE, NOW I WISH I WAS SAFE WITH MY PAPA AND MAMA - HOW I'D LIKE TO WAKE UP IN MY LITTLE WHITE BED AT HOME AND FIND THIS WAS ALL JUST A TERRIBLE DREAM -

WHEN I THINK HOW NICE CHING CHOW HAS BEEN TO ME I FEEL READY TO RISK MY LIFE A HUNDRED TIMES FOR HIM - HE SAVED MY LIFE WHEN I HAD FEVER - AND WHEN I WAS WASHED OFF THE RAFT IN THE MIDDLE OF THE OCEAN HE DIVED RIGHT IN AND SAVED MY LIFE AT THE RISK OF HIS OWN - I'LL JUST HAVE TO SAVE CHING CHOW - THAT'S ALL THERE IS TO IT -

WHAT'S THAT NOISE? SOMETHING IS CRASHING THROUGH THE JUNGLE - I'D HATE TO MEET A LION HERE -

THAT WARRIOR SAVED HIS OWN LIFE AND MINE BY NOT LOOKING AROUND - IF I FIRE A SHOT THE SAVAGES WILL HEAR IT - THEN THE WHOLE TRIBE WILL BE ON MY TRAIL AND MY CHANCE TO RESCUE CHING CHOW WILL BE GONE -

I WISH I HAD SOME WAY OF LETTING CHING CHOW KNOW THAT I HAVEN'T DESERTED HIM - I CAN'T DO ANYTHING TO HELP HIM TILL TONIGHT - GOLLY, I HOPE IT'S NICE AND DARK TONIGHT. THAT STAKE IS RIGHT IN THE CENTER OF THE CAMP - ONE FALSE MOVE OR ANY NOISE MEANS DEATH FOR BOTH OF US -

OH BOY - I HOPE NONE OF THE SAVAGES ARE STILL AWAKE - IF THEY CATCH ME TRYING TO RESCUE THEIR CAPTIVE I WON'T HAVE ANY MORE CHANCE FOR MY LIFE THAN A LAMB IN A DEN OF FAMISHED WOLVES -

THROUGH THE INKY DARKNESS OF THE TROPICAL NIGHT, SURROUNDED BY COUNTLESS DANGERS, BRAVE LITTLE CHESTER CREEPS SILENTLY ONWARD KNOWING FULL WELL THAT TO BE DISCOVERED MEANS CAPTURE AND AN IGNOMINIOUS DEATH - HOLDING HIS BREATH AND FEARING THE LOUD BEATING OF HIS FEARLESS HEART WILL CAUSE HIS DOWN FALL HE CREEPS NEARER AND NEARER TO WHERE CHING CHOW STANDS BOUND AND HELPLESS IN THE MIDST OF THE SLEEPING SAVAGES -
